SOUTHERN CROSS TO COMPLETE FLIGHT

Scottish Football Team Wins Over English Kingsford-Smith

100,000 See Cheyne Score Winning Goal In Thrilling Match

Victory Gives Scottish Double Victory in International Sports This Year, Having Won Rugby Title Recently; Aberdeen Player Who Scored Lone Goal Included on Scottish Eleven at Last Moment

London, April 13 (Canadian Press Cable)—Scotland defeated England in an international soccer match at Hampden Park to-day by one goal to nothing. A Cheyne, an Aberdeen player included in the Scottish team at the last moment, got the goal.

By winning to-day's match Scotland carried off the season's British international honors in both rugby and soccer.

Well over 100,000 spectators were crowded into the grandstands at Hampden Park an hour before the match was to commence. Among them were thousands who had journeyed from different parts of England to cheer on the visiting eleven.

The match was played in brilliant sunshine. England won the toss. The crowd was mystified when England was awarded a foul six yards from the Scottish goal mouth. An argument ensued on the field, but the referee maintained the ruling was justified. Apparently when Dean passed to Brown and the latter shot hard at the goal, White, who was under the bar, infringed the rules, despite the fact Harkness cleared the shot. Waincoat took the kick, which was smothered by the Scottish defence.

Just before half-time Jackson dislocated an elbow and had to be assisted off the field. He was unable to play in the second half.

FEELINGS RUN HIGH

In the second half Melkielehn was injured, but continued to play, and after this both teams threw science to the winds. Bad feeling began to creep into the match. It was not long, however, before the Scottish team were again crowded in on the English goal. Gollcher was temporarily light out in a scrimmage. At the other end, Scotland forced a corner a minute from time. Cheyne blasted the ball with beautiful accuracy, taking full advantage of the wind, which blew the sphere into the far corner of the net to give Scotland a dramatic victory.

The teams: Scotland—Harkness, Crappell, Niblow, Buchanan, Melkielehn, McMillan, Jackson, Cheyne, Gallacher, James and Morton. England—Hacking, Cooper, Blenkinsop, Edwards, Seddon, Nuttall, Bruton, Brown, Dean, Waincoat and Ruffell.

MAN RESCUED AFTER CLINGING TO PRECIPICE

Scoutmaster and Five Boys Saved on Washington Mountain; One Boy Killed

Chewallah, Wash., April 13—Don Hutchinson, scout master, who had clung for eight hours over the brink of a precipice on Quartzite Mountain, was hauled to safety early this morning by rescuers who dropped 200 feet down a rope. The scoutmaster was suffering from exhaustion and shock, but otherwise was uninjured.

Willis Earl, a half-breed of Chaldeas Palmer, one of the boy scouts who was rescued last night, dropped a rope over the cliff and clambered down to the ledge on which Hutchinson was clinging. He was followed by "Shorty" Kitcher and the two men tied a rope around the man's body and he was hauled to safety. His condition was described as "serious."

He told his rescuers his arms were "paralyzed" and that he did not know how he had "managed to hang on as long as he did."

Had he lost his hold he would have dropped to death as Harold Sufferson, patrol leader, said when the party of seven was thrown from the top of the peak when the ground gave way.

LIV BROKEN

One of the scouts rescued last night had his leg broken.

The group of boy scouts had climbed to the top of the mountain yesterday afternoon. When the edge of the peak tore away they all slid to the edge, where they caught hold of jutting rocks.

HOUSES IN INDIA ARE OVERRULED

Viceroy Goes Over Delegates' Heads and Decries Expulsion of Communists

New Delhi, India, April 13—Baron Irwin, Viceroy of India, using constitutional powers which make him one of the most powerful government chiefs in the world, has gone over the heads of the two Houses of the Indian Assembly and issued an ordinance which will permit expulsion from India of all communists other than of British origin.

Lord Irwin's declaration to a joint session of the Assembly yesterday closed a series of parliamentary disputes as to whether the Government's Public Safety Bill containing the expulsion clause, should or should not be discussed while trials were impending at Meerut of alleged communists arrested in cities throughout India a few weeks ago. Parliamentary powers and rulings were the occasion of the debate.

It was just at the moment when V. J. Patel, President of the Legislative Assembly, had risen to rule out discussion of the bill last Monday that two bombs exploded in the chamber, several members being injured and a general panic being caused.

REPLY TO RULING

President Patel, although he moved for passage of a House resolution condemning the bomb throwing, subsequently delivered the ruling to which Lord Irwin's action yesterday was a reply. Government supporters contested his authority under the Assembly rules to deliver such a ruling. The Viceroy's assumption of power beyond the rulings of the Assembly chiefs is legal under the Government of India Act and is of outstanding importance in the present parliamentary crisis over the communist question in India.

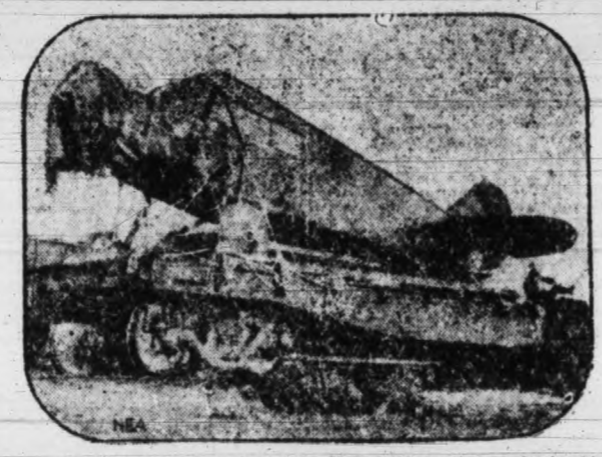

ATHEFORD WINS NEWBURY CUP

Gang Warily Second Horse in Race in England and Residue Third

Newbury, Eng., April 13—Athford, by Blandford-Athea and owned by W. Barnes, won the Newbury Cup to-day. Gang Warily was second and Residue third. The field of twenty-two horses was a record for the cup.

Reign Count, the United States champion and Kentucky Derby winner, which finished eleventh in a field of twenty-five in the Linfield Handicap April 6, finished ninth in to-day's field of twenty.

Plane Is Ready If General Loses Battle

Above is pictured the aeroplane Gen. J. G. Escobar, commander-in-chief of the rebel forces in Northern Mexico, keeps in readiness for use. If the general considers the time ripe for disappearance from the area of the civil war, the presumption is it will not take him long to have it taken from its flat car, fitted with its wings, tuned up and flown away with him as a passenger.

NEW BRITISH AUTO TO MAKE MORE THAN 300 MILES AN HOUR

London, April 13—C. Amhurst Villiers, young British engineer, is reported to have completed the design of a motor car which he will take to Daytona Beach, Florida, in 1930 with a guaranteed speed of 300 miles an hour and a theoretical maximum speed of 400 miles.

For the first time wireless will be used for steering, but the details of this are being kept secret. The engines will have 3,000 horsepower and the car will be fitted with eight wheels. Prominent British financiers are providing the money.

NOT GUILTY VERDICT AT MURDER TRIAL REFUSED BY JUDGE

Ottawa, April 13—The Department of Justice declined this morning to make any official comment on the refusal of Mr. Justice Wright at the trial for murder of Pettit-Rintakom to accept a verdict of not guilty brought in by the jury.

BRITISH M.P.'S GATHERING FOR BRIEF SESSION

Budget and Other Discussions May Be Completed in Three Weeks

London, April 13 (By George Hambleton, Canadian Press Staff Correspondent)—The Parliament of Great Britain will meet again on Monday for its last brief round before the election. Three weeks or so are likely to see the end of the session and the battle joined as the polls. Practically the only business remaining of importance is the budget, which the Chancellor of the Exchequer will submit on the opening day and the budget will be a statement which all parties will scrutinize closely for only the budget may turn the issues of the election.

For some time a Conservative wing has been demanding a more forward policy for the polls, a policy which would at the same time offset the Labor campaign for nationalization and the Lloyd George employment scheme. They illustrate their argument with Conservative by-election losses. They take the ground the Government's derailing scheme, while excellent in itself, lacks magnetic appeal to an electorate which has difficulty in understanding it.

HALDWIN TO SPEAK

There is a widespread belief that in his budget speech Mr. Winston Churchill will indicate an election programme which the Prime Minister will later elaborate. For this reason Mr. Churchill's speech is awaited with more than usual eagerness. His budget will announce a larger revenue surplus, although this is already expected.

JESTERS TO BE INITIATED AT BANQUET

Large Delegation of Order Reaches City From Seattle and Portland

Governor Hartley of Washington and Hugh Caldwell in Party

Roland H. Hartley, Governor of the state of Washington, and Hugh M. Caldwell, former Mayor of Seattle, both prominent Shriners, arrived in the city to-day from across the border.

As members of the Royal Order of Jesters the distinguished Washingtonians led into the city a caravan of seventy-five jesters from Seattle and Portland.

While in Victoria the party is being entertained by James W. Hudson, member of the Victoria Court 100 of the Royal Order of Jesters.

Transportation arrangements for the party were personally supervised by E. L. Sheehan, general agent of the Canadian Pacific Railway passenger department at Seattle.

THREE INITIATIONS

Two candidates from Portland and one from Seattle will be initiated into the order at a banquet which will be held to-night at the Empress Hotel.

THIRTEEN A YEAR

Not more than thirteen candidates can be initiated into the order in a year. Seattle Court 52 has a strong following of jesters with Governor Hartley and Mr. Caldwell holding high office in the order.

The Washington governor, incidentally was born in York County, New Brunswick.

The visiting jesters will remain here over the week-end.

Berry Growers Of Chilliwack District Form Association

Chilliwack, B.C., April 13—Thirty white berry growers formed an organization here to be known as the White Berry Growers' Federation. It is designed to protect the interests of the growers and to fight against the inroads of Orientals.

Provisional officers elected are: President, S. R. Reel; vice-president, G. L. Thornton; secretary, T. H. Wilson; committee, K. W. Munson, H. D. Kelly, V. Corderoy and W. D. Hughes.

KAMLOOPS TO SELL ITS POWER PLANT

Kamloops, B.C., April 13—The Kamloops city council has accepted the offer of \$800,000 for the electric plant and a twenty-five year franchise made by the Canadian Waterworks and Electric Company Limited of Vancouver as the basis of negotiations between the corporation and the city, subject to ratification by the ratepayers and the consent of the Provincial Government. It is expected a by-law will be submitted to the electors early next month.

LITTLE JOE

GOLFERS HANG A LOT OF ALIBIS ON A HOOK.

Two men sighted by a constable.

One of the bodies was identified as that of William Clifford by an acquaintance.

Clifford was one of three men recently tried for the slaying of Albert Pratt last fall.

CALIFORNIA CREW WINS BOAT RACE

Defeats University of Washington Eight By Seven Lengths at Oakland

Washington Juniors Come From Behind to Win; California Freshmen Win

Oakland, Estuary, Cal., April 13.—Jumping into the lead at the start and continuing to increase their advantage with each beat of their oars, California's Varsity crew, champions of the world, overwhelmingly defeated the University of Washington eight by a margin of seven lengths here to-day in their annual regatta.

The unofficial time of the winners was fifteen minutes and fifteen seconds.

Coming from behind in the last mile of the race, the Junior Varsity crew of Washington defeated its rivals from California by three lengths.

By a scant margin of ten feet the University of California freshmen crew defeated the Washington rowing team. The unofficial time of the Bears for the two-mile course was ten minutes and twenty seconds.

If the unofficial time was correct the California freshmen bettered the winning record for the course by two seconds. The old record was 10:22. The Bears' unofficial time to-day was 10:20.

The eight were given a tremendous ovation as they swept across the finish and as they drew up alongside and another the Washington rowing team took off their jerseys and gave them to the victorious Bears.

ANGLICAN CHURCH BISHOPS TO MEET HERE THIS YEAR

Many Other Bodies to Be Represented at Consecration of Christ Church Nave

Victoria will be the meeting place of the House of Bishops of the Anglican Church on September 27, the day prior to the consecration of the nave of the new Christ Church Cathedral, according to information received from Toronto.

There are twenty-six bishops, including four archbishops of the Church of England in Canada, whose dioceses reach from Atlantic to Pacific, and from the United States boundary to the Far North. The meeting has been called by the Primate, the Most Rev. S. P. Matheson, Archbishop of Rupert's Land.

(Continued on page 2)

JUDGE IS TO RULE ON APPEAL MOVE

Three Men Oppose Sentences Imposed on Texada Island Liqueur Still Charge

Vancouver, April 13—Two days before he died, Chief Justice Gordon W. Hunter advised Stuart Henderson, Victoria barrister, that he had reconsidered the refusal to grant leave to appeal to John Henderson, James Stewart and George Broder, who were convicted by Magistrate Alexander here some time ago on a charge of having an illicit still on Texada Island.

Announcement to this effect was made in B.C. Supreme Court chambers yesterday and Mr. Justice W. A. Macdonald has reopened the case and is considering Mr. Henderson's second application for leave to appeal his clients' sentences on the strength of the chief justice's decision.

Mr. Justice Macdonald adjourned until Monday the motion for release of the trio under habeas corpus proceedings pending hearing of the appeal.

"PETER PAN" TO AID ILL CHILDREN

London, April 13—Announcement was made to-day that Sir James Barrie had given the perpetual rights to his famous play, "Peter Pan," to the London Hospital for Sick Children. It was estimated the gift would yield £2,000 yearly for the welfare of the little inmates.

Men Hope Still to Win Great Test

Dramatic Scene When Rescue Plane Reaches Four Weary and Hungry Airmen Who Are With Stranded Monoplane Southern Cross in Northwest Australia; Ulm Says Undamaged Plane Will Yet Carry Them to England.

Sydney, Aus., April 13—First direct word from the four missing airmen of the monoplane Southern Cross was received in Sydney to-day in messages signed by Lieut. C. T. Ulm, noted pilot. His few crisp words, in the form of telegrams, gave some slight inkling of the sufferings which the crew of the plane had undergone since it was forced down in North-western Australia on March 31 while en route from Sydney to Wyndham, on the first stage of a proposed Sydney-England flight.

"We have been through a terrible time, but will be returning to recondition the Southern Cross for the flight to England," said the first message signed by Ulm.

The message was addressed to Chairman G. L. G. of the Sydney Citizens' Fund, through which part of the two weeks' search for the missing men had been conducted.

To the same message Ulm asked Mr. Gollcher to convey his behalf of himself, Captain Charles Kingsford-Smith, the flight leader, and their two companions, "heartfelt thanks to the citizens of Sydney for all they have done for us."

The message was telegraphed from Derby, having been carried there by a Heath Airways plane. The plane had made a landing near the Southern Cross, which was discovered yesterday near Port George. There was a dramatic meeting when the rescue machine reached the castaways.

After a short stay with the castaways, the rescue plane returned to Derby, bearing the messages to the outside world.

LACKED FOOD

A message from Pilot Ulm addressed to his wife said: "All O.K. but still very weak from starvation."

A third message was addressed to the parents of Captain Kingsford-Smith. It read: "All O.K. Returning to Sydney for overhaul."

Sydney, Aus., April 13—Undamaged and in new, at only plane and oil, the monoplane Southern Cross rests on a mud flat near Port George, Northwestern Australia to-day. The arrival of the rescue plane brought to-day by the Canberra, which discovered Captain Kingsford-Smith and his three companions after they had been missing two weeks.

Tobacco and a revolver, eighty-five telegrams from friends and fourteen bags of provisions were dropped to the fliers who now await the arrival of a steamer from Broome, Western Australia, 250 miles distant by sea.

Actual bargaining between Germany and the reparations creditors for a final settlement of the last remaining financial question between them will commence on Monday, when a detailed discussion of the plans and figures will be started.

The size of the bill was not announced officially, but it was said generally it had a present value of £1,000,000,000 to \$12,500,000,000. The story of nearly \$100,000,000 of fifty-eight years totaling around 160,000,000 marks—about \$24,000,000,000. It represents a reduction, it is believed, of nearly \$100,000,000,000 under the maximum of \$125,000,000,000 claimed by the Allies before the Versailles Conference.

The German delegate, headed by Dr. Schacht, showed all the grim solemnity of the opening session of the reparations conference February 11, nearly nine weeks ago.

SUMS WOULD VARY

One version of the bill current as it was being presented was that it entailed annuities rising progressively from 1,800,000,000 gold marks (about \$240,000,000) to 2,400,000,000 gold marks (about \$360,000,000) at the end of thirty-seven years, when they would fall to £100,000,000 (about \$1,500,000,000) marks (about \$225,000,000) for the remaining twenty-one years. The present Dawes plan annuities are about \$50,000,000.

STORM WARNING OFF COAST NOW

Warnings of Easterly Gale Posted Here; Serious Blow Not Expected

With an ocean storm brewing off the coast and the temperature down to forty degrees, the weather forecast for Victoria is "wet and stormy."

This is April, however, and even if the city is taken by storm, it will probably pass over quickly, according to F. Napier Besant, superintendent of the Gonzales Meteorological Observatory.

Storm warnings have been posted here, in Nanaimo and in Vancouver. Mr. Besant said this morning: "An easterly gale was blowing on the West Coast to-day and was moving in this direction."

Despite general rainfall as far south as San Francisco, the Pacific slope generally had mild weather to-day. Mr. Besant said: "In the interior of the Province the mercury dropped, however, and snow fell in the Cariboo area. The prairies are still experiencing freezing weather in the early mornings."

King Suddenly Retires Staff Chief and Thirty-six Other Officers

Belgrade, Yugoslavia, April 13—King Alexander, by royal decree, has retired General P. Peitch, chief of the general staff and the highest military officer of the kingdom, three army commanders and thirty-three other officers. Political and military circles were startled by the announcement.

In diplomatic circles the drastic action is interpreted as a determination to weed out all dissident elements in the army.

General Milan Milovanovitch, a virtually unknown general staff officer, was appointed to succeed General Peitch, a war hero, and the other generals were replaced by much younger men.

Some local circles express fear this summary wholesale retirement of proved military leaders may open the way to a military uprising such as that which broke out in Belgrade, when King Alexander, Queen Draga and five of their intimates were assassinated by army conspirators.

The official reason for the retirements, officially announced last night, was that the officers had reached the age limit.

KING'S PHYSICIANS TO ISSUE BULLETIN

Bogor, Eng., April 13—Lord Dawson, an English physician to King George, who has been only an occasional visitor to Craigville House of late, paid the King a visit to-day and talked over the progress of the case with Sir Stanley Hewitt.

It was indicated one of the medical bulletins, which have become so infrequent of late, probably would be issued to-night.

LYPTICIDE

The new horticultural wash for spraying trees and bushes affected by greenfly, rose mildew and all fungoid growths. It may be used at any strength without harming foliage, bloom or fruit. An effective spray for roses, tin 80¢ and \$2.60.

**BUREAU PREPARES
MAPS AND BOOKS
FOR SUMMER RUSH**

Thirty thousand Vancouver Island holiday resort folders will be run off the press for the Victoria and Island Publicity Bureau within the next few days to meet the growing demand for the folder each year. A few years ago

5,000 folders met all calls for the folder.

Thirty-three resorts are advertised and this year's issue is also featured by community advertising from Sooke, Qualicum, Nanaimo, Port Alberni and Courtenay. Sooke, Courtenay and Port Alberni are using the folder for their first attempt at community advertising with well-prepared articles and pictures calling attention to the attractions of those sections.

The folder is accepted by travel bureaus and transportation companies as an authoritative guide for Vancouver Island.

A new edition of 100,000 Island tour folders is being printed by the Publicity Bureau.

**FREIGHT RATES
SPEAKERS' TOPIC**

McGeer and Others Address Meeting of Representative Men at Vernon

Vernon, B.C., April 13.—The campaign for lower freight rates planned by the Vernon Board of Trade is now under way. G. C. McGeer, K.C., Mayor Sutherland, of Kelowna, Captain Rat-tray, a leader of the orchardists of Salmon Arm, addressed 200 representative men from the Kootenay, Armstrong, Lumby, Okanagan Centre, Oryana, Kelowna and Vernon districts who pledged assistance by their presence at a meeting here last night and their appreciation of the plea for a continuance of the fight which the late Premier Oliver commenced and in which Mr. McGeer has been a central figure for seven years.

T. A. Low, president of the Board of Trade, was congratulated for his breadth of vision and courage in taking up the issue.

JUSTICE FOR ALL
The Fathers of Confederation laid the foundation of a great country on the principles of equality and impartial justice, said Mr. McGeer, who called on the transportation companies to get a true vision of their own and Canada's needs and to fix rates which would give equal chances for development to East and West.

Mr. McGeer spoke of the Canadian Pacific Railway's growth of net surpluses. In 1921, when the company had rates to its liking, it showed only \$3,942,000 to the good, but after the equalizing order of 1923, this grew to \$14,800,000 by 1928, he said.

CHOICE OF COUNSEL
Mr. McGeer criticized the Tolmie Government for appointing A. C. Boyce as counsel to carry the freight rate appeal to Ottawa, when, as a member of the Railway Commission, he had voiced bitter opposition to British Columbia's appeal.

FIGURES QUOTED
Thomas Bulman of Vernon quoted tables which showed the fruit growers on the Niagara Peninsula and Nova Scotia enjoyed rates which were little more than half what the British Columbia growers paid. He said Canada had bonuses C.P.R. to open up the country, not to charge the Okanagan Valley 100 per cent more in freight rates than Ontario or Quebec.

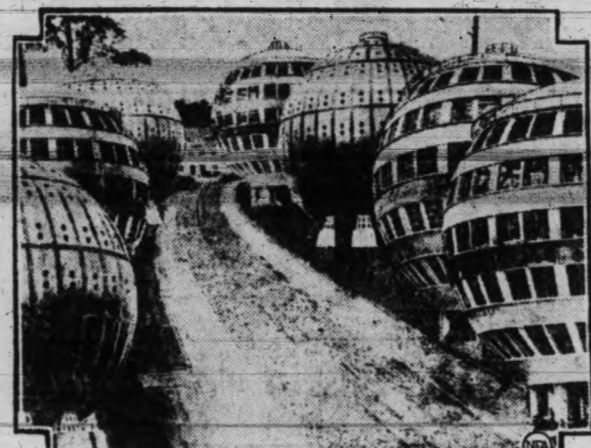

GREAT DIFFERENCE
That the transportation companies levied \$20,000 tolls on 40,000 boxes of apples for a service they would charge about \$12,000 for under rates prevailing in Ontario, was A. H. Howe's contribution to the discussion.

A group of electrical apprentices has been sent by the Theatrical Brotherhood of Electricians to the David J. Rankin Jr. School of Mechanical Trades, St. Louis, for special instruction.

as an authoritative guide for Vancouver Island.

A new edition of 100,000 Island tour folders is being printed by the Publicity Bureau.

GERMAN HOMES ARE BALLED UP

It looks like German householders may get balled up trying to find their own homes. Because half-shaped houses are the latest mode in architecture here, and here you see how an avenue lined with the strange structures will look. They are said to allow for much more fresh air and sunlight than ordinary houses and are being built on a large scale in Germany.

Stephen Walsh Rose From Waif To Cabinet Minister of Britain

Reuter's Special to The Victoria Times
London, April 13.—Stephen Walsh, whose death has aroused widespread regret, was an example of the dominance of personality.

No man ever owed less to the advantages of circumstances. Of his parentage he knew nothing. He was picked up as a waif by a policeman in the streets of Liverpool and was rescued by a charitable miner from the local industrial school. He had not even the chances of an ordinary miner's boy, for he was of diminutive stature, though a humorous puckered face that might have seemed more at home on the variety stage than on the Treasury Bench of the House of Commons testified to his possession of a sweet temper, and this made its impression on all with whom he came in contact.

Added to that valuable qualification for public life was a great fund of commonsense and a kindly human insight into life—an insight which from time to time found expression in verse.

So the waif played a man's part in the world through difficult and dangerous times. He led his party—or he showed them the way—when in wartime patriotism demanded especially a clear call on such questions as the national service and compulsory military service. He gave his son to the Army and the nation, and he dared to maintain that the interests of the community as a whole came before all else.

The outstanding fact of the life of Stephen Walsh was the success of his work as Minister for War in Ramsay MacDonald's Government. Some day, when Cabinet secrets are revealed, there may be many curious explanations of how one man and another received his call to office in that first Labor Government. There was, perhaps, a sign of weakness from the Labor point of view in the fact that for the First Lord of the Admiralty Mr. MacDonald was obliged to call in an "aristocrat"—Lord Chelmsford—but it must count as a "score" to Mr. MacDonald that he had character so well as to expect Mr. Walsh to make friends with the generals at the War Office.

OLD COUNTRY FOOTBALL

(Continued from page 1)

London, April 13.—League football games to-day resulted as follows:

ENGLISH LEAGUE—SECOND DIVISION

Arsenal 1, Leicester City 1.
Birmingham 0, Cardiff City 0.

St. Helens 16, Hunslet 10.
Salford 20, Keighley 0.
Swinton 44, Wigan Highfield 8.
Wakefield Trinity 14, Batley 13.
Wigan 8, Hull Kingston Rovers 10.

IRISH LEAGUE

Belfast Cup
Distillery 0, Ballymena 3.
Glentoran 2, Belfast Celtic 1.
Cliftonville 2, Portadown 0.
Larne 4, Ards 2.
Coleraine 4, Glenavon 1.
Newry 2, Linfield 4.
Queen's Island 3, Bangor 1.

Teacher—"Which is farther away, Africa or the moon?"
"Small Boy—"Africa."
"Africa? What makes you think that?"
"Cause we can see the moon—and we can't see Africa."

The chestnut blight is the most ruinous and destructive disease of forest trees that has ever been recorded.

**Banned Book
Stirs Big Row,
It Outshocks
'Mother India'**

India, Speeded Up, Could Outdistance United States, It Declares

Censuring It Brings Criticism By Members in House of Commons

London, April 13.—Gifted with natural resources on an unparalleled scale, India in one century's time could easily become by far the greatest and most prosperous country in the world—greater and richer even than the United States.

This startling declaration is made in one of the most talked-of books now circulating in England—"Shiva, or the Future of India," written by H. J. Minney, banned by the Indian Government and made the subject recently of a sizzling debate in the House of Commons.

If the much discussed "Mother India" was a shocker, "Shiva" is a whole load of dynamite. Briefly, its thesis is this:

India has three times the population of the United States. It has simply untold natural wealth in minerals, tremendous agricultural possibilities, with such products as cotton, tea, jute, sugar and the like. It has great deposits of petroleum, coal and iron. It could be made to outrank the United States by a long way.

But—if India is to come even close to doing this, both whites and natives must buck up. Caste, religion and sex are three great curses that have put India into a straightjacket. The native Indian spends all of his time sleeping, praying and chasing women, it says.

The proclamation of Queen Victoria, erected in 1858, sets forth that the British Government in India would not interfere with any of the native religious beliefs. Offhand, that looks like a very enlightened and humane policy. But Minney doesn't see it that way.

Instead, he declares that is the exact opposite of the course England really ought to pursue. The British, he says, should break down the caste system. They should destroy the power of the great lords of native priest. They should resolutely rip out the Indian religious customs and beliefs which are the cause of such things as child wives, lack of hygiene, ignorance, disease, dirt and illiteracy.

Nor does he stop there. Instead of prating about giving the rights of self-government to scores of millions of ignorant peasants, the government, he says, ought to go to work to bring education to the appalling untapped masses. It should teach them the proper way to conduct their farms. It should smash the grip of the native money lenders. It should encourage the up-building of home industries.

Lastly, Minney assails those who look on India merely as a place in which they can get rich, and which they can promptly leave, once their money has been made, in order to spend it elsewhere. He accuses them bitterly for their intolerant, over-bearing attitude toward the native Indians, no matter how cultured, well-educated and well-mannered the latter may be.

Thus, obviously, "Shiva" is an unusual sort of book. The Government in India lost 85 times in banning it from circulation. The publishers promptly began selling it in London with a gaudy yellow jacket, announcing:

"This book has been banned in India."

This, of course, set everybody in England to talking about it, and Commander Kenworthy one of the keenest men on the Labor benches in Parliament, was one of them. Furthermore, Kenworthy did his talking in the House of Commons.

He asked the Government why this book had been banned when the Government of India permitted Miss Mayo's "Mother India" to circulate freely. Earl Winterton, under-secretary of state for India, replied that the Indian Government proscribed the book because it dealt with certain subjects in a way certain to give offence to Indian public opinion.

Kenworthy, undismayed, promptly came back with the question whether the book was banned because it might give offence to certain Indian subjects, or because it criticized the policies of the Government. Winterton dodged this saying only that the book commented on the Hindu religion with great coarseness.

Kenworthy, probably, was right. The book is merciless in its criticism of the rules of India. Its attacks on the natives would probably make the natives angry.

MAJESTIC HEADQUARTERS FOR VICTORIA

**ANGLICAN CHURCH
BISHOPS TO MEET
HERE THIS YEAR**

(Continued from page 1)

The annual meetings of departmental boards of the general synod will also be held this year at the Pacific Coast and all members are to be invited to attend the consecration ceremonies in Victoria on September 28 and 29. Others expected to be present include the Bishop of Winchester, Right Rev. Frank Theodore Woods, D.D., representing the Church of England, and some of the United States bishops and clergy.

MANY TO COME

Every parish and mission in the city, and throughout Vancouver Island and the Gulf Islands, will have representatives at the opening services. A large number of citizens and visitors will doubtless desire to enter the cathedral on the day of the consecration, so the total number of those who will assemble here for the two days will probably be greater than on the occasion of the laying of the foundation stone by the Bishop of London on Sept. 9, 1926.

After attending meetings and services here, delegates from the various dioceses in Canada will proceed to Vancouver, where meetings will be held of the Anglican National Commission, the Missionary Society, the General Board of Religious Education, the Council for Social Service, and the Executive Council. These bodies consist of the bishops and a certain number of clergymen and laymen elected by each diocese.

YOUNG PEOPLE

The board of management of the Missionary Society and the Council for Social Service include women members, appointed by the women's auxiliary and other bodies of the church, and representatives of the Anglican Young People's Association are numbered

Conservatives Are Prolonging Session Of Manitoba House

Winnipeg, April 13.—With a barrage of Conservative speeches, criticism of the Government's rural credits scheme, suggestions for alleviation of the "home brew" alcohol problem and many other subjects of provincial debate—the "blockade" on the passing of the Government's estimates was tightly enforced in the Manitoba Legislature for several hours yesterday when Joseph Bernier, Conservative, St. Boniface, and F. Y. Newton, Conservative, Roblin, alternated in occupying the floor.

Premier John Bracken, fighting for three days against the Conservative blockade, scored a minor victory last night, however, when, despite protests of the obstructionists, he announced a decision to hold a session Monday afternoon. He suggested the House "should lose no more time." Ordinarily the House does not meet on Monday afternoon assembling only in the evening.

Toward the close of the session the blockade was lifted and several items of the estimates, including rural credits, were approved.

Search For Lost Radium Tube In Saskatoon Fails

Saskatoon, April 13.—Search for the tube of radium lost by a physician on a downtown street in Saskatoon was still in progress to-day after seven days of fruitless endeavor. A reward of \$5,000 for the tiny receptacle, valued at \$5,000, has been offered.

Twice hopes of the searchers have been raised by youths rushing into the city police station with tubes, but on both occasions the tubes were empty. It is not known whether some practical joker distributed several empty tubes about the streets.

Alberta Oratorical Contest Decided

Edmonton, April 13.—Walter B. McDonald of Red Deer, eighteen-year-old boy, won the final of the Alberta Oratorical Contest here last night when he defeated Gwendolyn Gant of Grande Prairie before one of the largest crowds that ever witnessed a similar contest in this city. Hundreds were turned away from the finals.

TARIFF BOARD Emigration of Great Britain Shows Decrease

CHAIRMAN ASKS CO-OPERATION

Calgary, April 13.—Business men should lend every assistance to the Tariff Advisory Board in its work, William H. Moore, chairman of the board, stated before a men's church association here last night.

"Nor should the problem of guiding the country's destinies generally be left entirely to the members of our Senate and House of Commons," he said.

The board was not concerned with theories or party politics, he said. Its duty was to get at the facts.

NOT CONTROVERSIAL

Ottawa, April 13.—The attention of the House of Commons was called yesterday to a speech delivered at a church meeting in Ottawa recently by W. H. Moore, chairman of the Tariff Advisory Board. Hon. R. B. Bennett, Conservative leader, read a newspaper report of his speech and took the view that it was of a controversial nature and asked what right a civil servant had to take such liberties.

Hon. James Robb, Minister of Finance, explained that Mr. Moore had asked if there would be any objections to his delivering a speech on conditions in Canada as he saw them. The Minister said he had raised no objection and after reading the report of the speech, did not consider it controversial.

WOULD END RUSSIAN BREAK

London, April 13.—Rt. Hon. Arthur Henderson, secretary of the Labor Party of Great Britain, in a campaign speech broadcast by radio last night, reiterated that his party, if it should obtain power in the coming general election, would take steps immediately to re-establish diplomatic and commercial relations with Soviet Russia.

ELSTER CANDIDATE

Belfast, April 13.—Major James H. McCormick, formerly sheriff of Lloydminster, Saskatchewan, has been adopted as the Unionist candidate in St. Anne's in the next Ulster general election. He served under Viscount Craigavon, now Prime Minister of Northern Ireland, as a yeomanry captain in the Boer War, and served in the World War with the 24th Canadian Infantry Battalion of Winnipeg. Major McCormick was wounded five times, and received the D.S.O. for services in the World War.

Simon Commission Is Returning To Britain

Bombay, April 13.—Sir John Simon and the other members of the Indian Statutory Reforms Commission sailed for Great Britain to-day, having completed their work in India.

SCORES RESCUED

Little Rock, Ark., April 13.—Between seventy-five and 100 persons made homeless by the twin tornadoes that took fifty lives in north Arkansas Wednesday night were rescued yesterday by National Guardsmen from three caves in a mountain near the demolished village of Gulon. They had passed two nights in their primitive quarters, for nearly twenty-four hours without food.

SENTENCE OF DEATH

Cochran, Ont., April 13.—John Ivaneuk, Austrian miner, found guilty by a jury on Thursday of the murder of License Inspector Larry Constable here October 12, 1926, was sentenced yesterday by Mr. Justice Wright to be hanged June 21.

French Launch Plane Carrier

Bureau, France, April 13.—The new French aeroplane carrier Commandant Teste, of 12,500 tons displacement and with a capacity of twenty-six planes, was successfully launched here yesterday. Its armament includes twelve guns of 100 millimetres; eight guns of thirty-seven millimetres and twelve machine guns. The vessel will have a cruising speed of twenty knots and is so equipped it can burn either coal or oil.

JOHN LEGGATT DIED

Pasadena, Cal., April 13.—John Leggatt, sixty-two, wealthy retired businessman of Hamilton, Ont., died here yesterday. H. M. Leggatt of Vancouver, B.C. is a brother.

FORMER ENEMIES WORK FOR PEACE

Brig.-Gen. Mitchell and Dr. L. Mueller, War Veterans, Address Vancouver Audience

Vancouver, April 13.—Twelve years ago two officers, were in the muddy trenches beyond Vimy Ridge. One, Brigadier-General C. H. Mitchell, C.B., C.M.G., D.S.O., C.E., L.L.D., of Toronto, was with the Canadians in the big drive up the slope and beyond. The other was a German officer, Ludwig Mueller, a young professor. That was a dozen years ago, in the dark days of warfare. These former enemies met here yesterday and it was General Mitchell who introduced to a Vancouver audience from the stage of the Vancouver Theatre at the triennial conference of the National Council of Education Dr. Mueller as one who had come from Germany to voice at the conference the hopes, the ambitions and the desire for perpetual world peace of the youth of the new republic that has risen from the ashes of the old militaristic German Empire.

The scene was dramatic and touching as the white-haired general mentioned of those dismal days of international enmity and of the parts he and Dr. Mueller had played for their respective countries. As he mentioned the real and heartfelt pleasure that was his in meeting here his old enemy in the cause of lasting peace, education and goodwill, the theatre rocked with applause. And before the representatives of a dozen lands and the citizens of Canada, their hands, once lifted in strife, met in unity and they dedicated their efforts to the constructive purposes of national and international understanding.

It was an interesting and instructive address Dr. Mueller gave of the organization of youth in Germany. He illustrated his talk by the showing of three films, taken especially for this conference in British Columbia by the German Government.

JIU JITSU SEEN IN VANCOUVER

Vancouver, April 13.—Jiu Jitsu was explained to the National Council of Education, in session here yesterday afternoon, by T. Kawasaki, Japanese delegate, whose address was followed by a display of the ancient Japanese art. Two athletes from Tokyo gave an exhibition of the various expressions of jiu jitsu. After an exhibition embracing some thirty ways of putting an opponent out of action, one of the contestants aimed himself with a sword. By skillfully employing the sword the other contestant dashed the sword from his opponent's hand. Eleven jiu jitsu experts recruited here were thrown in a few minutes, one after the other, by one of the demonstrators.

LEADER ELECTED

Ottawa, April 13.—Colonel Wallace Scott, C.M.G., of Toronto, was elected president of the Medical Services of Canada at the annual convention here yesterday.

The Backbone of The Rock Garden

By JOHN HUTCHINSON, F.R.H.S.

The real backbone of the rock garden consists of those plants which "stay put" and increase in size and beauty year by year. There are hundreds of plants which make the rock garden gay at various seasons, but many of them need to be divided often and to be otherwise attended to. There are others which, when once planted, may stay for five, six or a dozen or more years. It is this type of plant which will be spoken of in the present article.

In planning any rock garden it is important to take the general effect into consideration as well as the "close ups." Stand well back now and again and take a good look at the general aspect of the garden as a whole. You will see how the background may be improved, how the landscape may be added to, and how the color scheme may be heightened, all of which you would miss if you simply attended to the welfare of some of the color plants in the moraine and did those other things that go to make up the business of higher rock gardening.

USE OF SHRUBS

It is in this general view of the rock garden that the backbone plants are so important. To begin with, shrubs both evergreen and deciduous form very solid and very necessary backbone plants. The dwarf pines, the creeping junipers, the cotoneasters, the dwarf rhododendrons, the Japanese maples—all these are backbone plants in the truest sense of the word.

You cannot give too much thought and attention to the placing of dwarf conifers in the rock garden, for they are the everlasting features of the whole thing. Dwarf trees, as a rule, look best when tucked into the side of a hill, instead of being placed on the sky line. One must be careful, too, in the matter of what is planted near these little trees because it is quite easy to spoil the whole effect by getting the planting out of scale. As an instance, it would be folly to plant a tall campanula near a dwarf, stunted two-foot pine.

PLANTING IN PROPORTION

The fact is that nothing should be planted near these dwarfs but the closest of close growing type or some other "carpet" Now a word or two about dwarf conifers. It is as well to consider the shape in which one wants a dwarf conifer to grow. It may be that it is planted so as to lean out from a cliff, in which case one should prune it so as to show the shape of the little trunk and branches. This must be done in degrees from year to year so that, in the end, it will look as if nature put it there. There are many varieties of dwarf trees to choose from—and it would take too long to even give a short list of them. The best way is to choose the trees that suit you and suit the situation in which you wish to plant them.

The trailing junipers and the trailing

Pacific Milk In Cake
A lady living in North Vancouver writes:
"I put half the number of eggs in my cakes and use Pacific Milk when following a cake recipe and I get splendid results."
It is statements like this from hundreds of women all over the Province that tell in detail why the demand for Pacific Milk is so great and growing.

Pacific Milk
Factory at Abbotsford, B.C.

ing cotoneasters, such as heterotallia, adpressa and hirsuta are at home anywhere that they can hang or trail down a rock, and nothing can look better.

A NEGLECTED FAMILY

Now outside of the woody things there are certain other plants which are real "backbones." First among these are the encrusted Saxifrage. For some reason or another a great many rock gardeners on this Coast and in other parts of the Dominion do not take kindly to this great branch of the Saxifrage family. Why this is so, is hard to understand, for no plant is more beautiful, both in and out of flower, no plant is longer lived and no plant is more truly Alpine in looks than the encrusted Saxifrage. There are many species and varieties, and a collection of them, planted in suitable surroundings, is really a wonderful sight.

The pinks, such as Dianthus Caesius and Arvensis are backbone plants, beautiful in flower and out of flower, and wonderfully permanent. A well-known writer on rock gardens said recently: "All blue-leaved pinks are good, but some are better than others."

Having got your backbone planted, then, by all means, plant as many choice Alpines as you can lay hands on.

There's Still Time for Planting Roses

But we suggest that you don't delay any longer. Two roses out of our large collection will appeal particularly—the dwarf polyanthus Orleans (pink) and Miss Edith Cavell (crimson). They grow about 18 inches high and bloom from June to December. For spring planting we also offer a large collection of bedding plants and some remarkably fine importations of flowering Japanese trees. Incidentally we build, rebuild and plant all kinds of gardens satisfactorily.

DRIVE A PLYMOUTH

HERE IS AN OPPORTUNITY FOR EVERYBODY DURING

"Learn-the-Difference" FORTNIGHT

We Invite You to Discover Plymouth Superiorities Behind the Wheel

STARTING TODAY, and lasting two weeks, we are holding a "Learn-the-Difference" Fortnight.

We want you to drive a Plymouth and learn the difference between Plymouth performance and any other in the Plymouth price field.

See—Feel—and Experience the Difference

There is only one sure way in which you will know how decisive this difference actually is: That is to see, and feel and experience—to ride in and actually drive the Plymouth.

We invite you to discover for yourself the full-size of the Plymouth which seats five adults in comfort—to note its easy-riding lengthiness—to see how sharply it contrasts with the small dimensions usually associated with low-priced cars.

Feature After Feature is Exclusive

Consider, for instance, Plymouth's exclusive Chrysler-designed "Silver-Dome" high-compression engine. There is a difference—as vivid as it is vital. Come, learn exactly what distinguishes this motor—in power and speed—ability—as well as economical operation—from any others on the market.

There are rubber engine mountings to insulate motor from frame. There are impulse neutralizers on engine and body. No mistaking the difference they make in quiet, vibrationless operation.

What a world of difference, too, in Plymouth driving control—the pivotal steering that responds so easily—the balanced front wheels—the Chrysler-designed weatherproof internal-expanding 4-wheel hydraulic brakes, which are found on no other car near the Plymouth in price.

Do Not Miss This Great Opportunity

Take advantage of Plymouth "Learn-the-Difference" Fortnight at once. See the unmatched features—experience the unprecedented performance.

Once you drive a Plymouth and learn the difference, you will never be content with any other car. Your judgment will insist that you own a Plymouth.

NO OBLIGATION Come for a Ride! Come for a Drive!

We are eager to have you realize the many outstanding advantages of the Plymouth. Come and drive the car—see for yourself how and why it excels. There is not the least obligation. Come in today!

GERMANY'S NEW BILL

AFTER NINE WEEKS OF PRACTICALLY continuous discussions, Germany has been presented with her new bill for reparations. The total of its present value is put at from \$10,000,000,000 to \$12,500,000,000, requiring the payment of annuities over a period of fifty-eight years totaling approximately \$24,000,000,000. It is said the annuities entailed will rise progressively from about \$420,500,000 to about \$600,000,000 at the end of thirty-seven years, when they will fall to a stationary point of about \$425,000,000 for the remaining twenty-one years. Under the Dawes plan the annuities amounted to approximately \$650,000,000.

Dr. Schacht, the president of the Reichsbank, will take the bill to Berlin and consult with the Government and the representatives of various German industries. He prepared them for the final document recently; but we are not told how they received it. More than likely he will return to Paris and ask for further reductions. Meanwhile, however, the nerves of the experts who have been engaged on this business for more than two months must be pretty well on edge. Their task, never at any time a simple one, became more difficult owing to France's objection to agree to the reductions which her allies proposed to make. Of this conflict of view the German delegates became interested spectators and waited for offers to be made to them instead of making them themselves.

The new reparations bill remains at an imposing figure. It is more than eight times as much as the value of the total trade of Canada for 1928; but it is a modest sum when compared, for instance, with that part of Great Britain's national debt which was incurred by reason of her part in the Great War. In 1914 her total obligation was approximately \$3,400,000,000. It now is approximately \$38,000,000,000, with annual charges, including annuities, of \$1,900,000,000. In other words, Germany now is being asked to pay reparations for damages an annual sum, in very rough figures, of one-fourth of the amount which the British treasury is required to find annually for fixed charges alone.

At the conclusion of the war we heard of demands of \$200,000,000,000 for reparations. France put her figure at something like \$130,000,000,000. Then the sum dropped to \$70,000,000,000. Now it is approximately \$24,000,000,000; and Germany may not agree to this. What can the Allies do if she should object, if the peace of the world is to be preserved? The lesson of the reparations controversy, which proves that no great war can be paid for, and that the vanquished is likely to come out of the mess better than the victor, as in this case—should be learned by the peoples of the world. The League of Nations Society in Canada might well preach its moral in its drive for new members next Tuesday.

RECIPROCITY

IT WILL BE OF INTEREST TO Canadians to learn that the people of Glasgow are trying to show their appreciation of the large shipbuilding orders which have been placed by this country with the yards on the Clyde.

Leading Glasgow grocers to the number of 170 have entered for a window-dressing competition in which none but Canadian products will be on display. Shields in the form of the maple leaf, made of Canadian silver and maple wood, will be awarded to the winners. A store in one street, by the way, has been rented for the purpose of a display of all the Canadian food products which may be obtained in Great Britain.

The slogan adopted by these Glasgow grocers is: "Buy from those who buy from you." Thus are thousands of workers, who have been kept in employment by Canadian orders during critical years, being shown the way to mark their gratitude.

OFF FOR A HOLLOW TREE

IT IS NOT HARD TO FEEL A GOOD deal of sympathy for the gentleman who fled to live in a hollow tree because the radio in his own home was kept going night and day. The man was sixty-nine years old, and lived with his son's family. When he made his exodus, he explained later, he was driven to it by the fact that "a fellow can't get any sleep at all" with the radio going at all hours. The police, who took him in on a vagrancy charge before they knew what it was all about, turned him over to a police magistrate, who finally induced him to return home and make one more effort to accustom himself to a constant outpouring of sound.

Probably a good many of us, at one time or another, have felt a sneaking longing to make tracks for the tall timber and find a suitable hollow tree. We may not know much about the peace and quiet of the deep woods, except by hearsay, but there are times when they appear good to us.

Our modern civilization is designed to appeal chiefly to the eye and ear. There is an enormous amount of stuff to look at, and an enormous amount of stuff to listen to, and these two phases of it generally take up so much of

our spare time that we cannot exercise our other faculties.

Usually this suits us well. It is pleasant and it keeps us from worrying. But now and then a man—particularly if he be verging on the three-score and ten mark, as this particular man was—is apt to get the feeling that life is slipping away without being really tasted.

For we realize, down deep, that there ought to be a little bit more to life than a mere collection of surface impressions. Nature, as Thoreau remarked, has provided man with an admirable cushion, whereon he may sit and look at the stars, and out of star-gazing and similar idle pastimes there is apt to come a wisdom and a peace that are beyond price.

Thus wisdom and peace grow out of the discovery that the world is infinitely more mysterious, infinitely more beautiful, infinitely more terrifying than is ordinarily dreamed. It is not a blind machine, nor is it a heedless, self-sustaining bit of cosmic ingenuity in which pettiness and sameness are dominant. It is a thing of infinite depths and infinite vistas; and we stumbling along bravely on the tiny patch with which we are familiar, are integral parts of it. Lost souls we may be, but nevertheless nobility and high destiny are in us.

This is the sort of realization that does not come in the midst of blaring, man-made noise and hectic activity. It dawns on a man slowly, when he has leisure and quiet to make himself receptive to voices that the hum of daily life can drown out.

Perhaps a hollow tree would be too cramped and harsh a place for a city dweller. But at least it would give him a chance to hear things that city noises drown out.

MR. HOOVER'S TARIFF TASK

BY THE TIME THE SPECIAL session of the United States Congress commences its deliberations on Monday, President Hoover and his colleagues in the Cabinet will have absorbed a good deal of advice in the matter of the tariff and what Congress should or should not do about it. Several prominent newspapers have dealt with the matter in a strictly impartial way, most of them reminding the President that the republic's best customer should be given no cause for irritation. The Washington Post, which is a supporter of the Government, says it is the duty of Congress to foster trade with Canada and to avoid any tariff legislation which would be regarded by the Canadian people as provocative or unjust.

This influential daily notes that Premier King has "spoken a few words of moderation to excited legislators in Canada" who have criticized him "for refusing to undertake drastic tariff changes to offset the threatened changes in the United States tariff." This "friendly and frank" statement, The Post continues, "is of great value to United States legislators if they will apply it to the situation that is about to develop in connection with tariff revision." It then adds:

The Canadian Premier points out that the trade between Canada and the United States is the greatest of that between any two countries in the world. The reciprocation of Prime Minister King's policy by Congress will not only allay the apprehensions of the Canadian people, but will work to the advantage of the United States as well as Canada.

The task which faces President Hoover is not one he would have chosen for himself. But certain promises were made by him during his election campaign last year in connection with tariff matters which he will find it difficult to ignore; and he has been constantly reminded of them during the last few weeks. It is obvious, however, that such revisions as Congress shall make in the existing schedules will be nothing like as drastic as some people have feared they might be.

DEATH UNDER THE WHEELS

UNLESS MOTORISTS AND PEDESTRIANS of the Dominion are careful, the toll of traffic accidents can be expected to rise sharply during the coming months.

The arrival of warm weather brings a much greater number of cars on the highways than the winter months have seen. The increased congestion, naturally, renders the possibility of accidents greater, and puts on each driver an added responsibility for care and caution.

In addition, many cars do not get the care during the winter that they get in the summer. A number of drivers will be using cars that need mechanical adjustments or repairs—in brakes, steering knuckles, and so on—in order to make them really safe. This, of course, adds to the hazards of driving.

Every motorist should see to it that his car is in good working order.

NOTE AND COMMENT

"It is better to be acclaimed than to have riches. Friendship is one of the greatest things in life."—John D. Rockefeller.

"It takes three to make a quarrel. There is needed a peacemaker."—Gilbert K. Chesterton (Forum).

It looks as if a motor car with only one hose can throw a man farther than a bull with two of 'em. Kitchener Record.

A "Good Deeds Day" is to be observed at Medicine Hat. But should not every day be one of good deeds?—Lethbridge Herald.

One grows weary of the modern cult of success.—Lord Birkenhead.

It is a strange contradiction that the people who like the country are those who are ruining it. C. K. Chesterton.

TWENTY-FIVE YEARS AGO TO-DAY

The Victoria Daily Times, April 13, 1904

St. Petersburg, April 13.—A semi-official telegram announces that the Russian battleship Petropavlovsk has been sunk off Port Arthur, and that only four of the officers were saved, among them being Grand Duke Cyril, who was wounded.

Loaded with freight to the guards, and with her entire passenger accommodation occupied, the steamer Neil as she lies at Porter's wharf in the upper harbor, ready to sail this evening, suggests the conditions of northern traffic as they exist at present.

Weather Forecast—Victoria and Vicinity—Moderate southerly winds, generally fair and cooler, with showers at night.

Good progress is being made on the new steamers which are to run to the Gorge this year. Captain M. Hare is planning his craft, and expects to launch her early next month.

The Pacific Northwest Golf championship meeting for golf clubs opened this morning at the Oak Bay links.

As the warm weather approaches the day of the opening of the regular baseball season in the East is rapidly coming on. Both the National and the American Leagues will start their season on April 21, and at present all the teams are at their southern training quarters.

A THOUGHT

Wherefore I perceive that there is nothing better than that a man should rejoice in his own works, for that is his portion; for who shall bring him to see that which shall be after him?—Ecclesiastes 1:12.

WHAT OTHER PAPERS SAY

BELOW THE PIO GRANDE

The Houston Post-Dispatch

The first thing a Mexican flier asks when he lands after a flight is, "Who's on top now?"

CANADA'S GROWTH OF BUSINESS

The Toronto Star

An idea of the tremendous development that is taking place in Canada is to be gained by examining the statistics of the nation's trade and commerce.

Almost any comparison one cares to institute between the Canada of to-day and the Canada of twenty or thirty years ago will show the enlarged scale on which the operations of the country are now conducted.

Toronto, for instance, showed last year as a customs port a revenue of \$30,636,723.

In 1909 the customs receipts from all Canada were but \$47,088,444.

So that last year's customs receipts for this city alone exceeded those of all Canada in 1910 years ago.

To extend the comparison somewhat further back, the customs receipts for Toronto last year were almost equal to those of all Canada for the five-year period 1868-1872, inclusive.

For that five-year period for the whole Dominion were \$50,814,560. The single port of Toronto last year nearly equalled that figure.

THE CANADIAN PACIFIC

Witness and Canadian Homestead

When the foreigner thinks of Canada there are three great institutions which immediately leap to his mind—the Royal Canadian Mounted Police, the Hudson's Bay Company and the Canadian Pacific Railway Company, and though comparison is difficult, probably the one which has made the greatest contribution to Canadian progress is the last. Founded in 1869 to bind the new Canadian Dominion into one whole, the Canadian Pacific has, in less than half a century, expanded until it has become by land and sea the world's greatest travel system, drawing the entire world closer together. Aside from a general satisfaction at the country's development, progress and prosperity, it is interesting to Canadians to learn that this famous railway system is able to report to its shareholders a remarkable success for the year just passed. The average Canadian unaccustomed to dealing with statistics, will find most striking the evidence of constructive vision and confidence which the statement discloses and which finds expression in practical plans for expansion in the future.

The WEATHER

Daily Bulletin Furnished by the
Victoria Meteorological
Department

Victoria, April 13.—5 a.m.—The barometer remains low on the Northern coast, and unsettled and warmer weather extends southward to California. The temperatures are slowly rising in the prairie.

Results:—
Victoria—Barometer, 29.23; temperature, maximum yesterday 48, minimum 40; wind, 6 miles S.E.; rain, .67; weather, cloudy.

Vancouver—Barometer, 29.76; temperature, maximum yesterday 50, minimum 38; wind, 4 miles E.; rain, .18; weather, cloudy.

Prince Rupert—Barometer, 29.44; temperature, maximum yesterday 50, minimum 36; wind, 4 miles S.E.; weather, fair.

Esquimalt—Barometer, 29.62; temperature, maximum yesterday 44; minimum 36; wind, 10 miles S.E.; rain, .28; weather, raining.

Talooch—Barometer, 29.70; temperature, maximum yesterday 42; minimum 40; wind, 14 miles E.; rain, .63; weather, cloudy.

Portland, Ore.—Barometer, 29.84; temperature, maximum yesterday 54; minimum 42; wind, 4 miles S.; rain, .08; weather, cloudy.

Seattle—Barometer, 29.80; temperature, maximum yesterday 54; minimum 40; wind, 8 miles S.E.; rain, .12; weather, cloudy.

San Francisco—Barometer, 30.07; temperature, maximum yesterday 58; minimum 49; wind, 10 miles W.; weather, cloudy.

RIDING TRAILS

To the Editor.—May I ask for space for the following information, which will be of great interest to the horse loving members of the community and also to those of our visitors who are interested in riding?

The Victoria Riding Academy has obtained permission from the municipalities of Oak Bay and Saanich to make riding trails through these districts, and it will shortly be possible to get several rides, one of which

will be eight miles from start to finish. The proposed ride will leave the Riding Academy, going up Cadboro Bay Road to the Cedar Hill cross road, and from there along the Gordon Road to the Arbutus Road, and on coming to the Cadboro Bay Hotel one can return to the point of commencement either along the beach or through the Uplands to Cadboro Bay Road and thus back to the Riding Academy. The distance has been measured by cyclo-meter as eight miles. Another ride would be through the Woodlands subdivision on to Telegraph Bay, and in the near future it will be possible to cross Shelbourne Street and go to Mount Douglas. Thanks to the permission of the councils of the aforesaid municipalities the ever-increasing number of horsemen will have good rides and many to choose from so that riding will soon become one of our premier attractions.

D. B. CARLEY.

Smart Doings of Animals

Dog and Dove Close Friends

Visitors at the farmhouse of Cary Carpenter, near Bolton, Conn., used to see a big black and white shepherd dog named Polly and a white dove named Polly which had established a perfect companionship. Everywhere Prince went Polly went too. She flew along from tree to tree, building to fence, always keeping the dog in sight.

Strangely, Polly came to the place from none knew whence. She may have been a wild bird, for all Prince could tell. She made the first overture, without intimacy in the house having first paved the way. She did

CITY PROPOSES NEW MILK LAW

Goat Farms and Licensing of Vendors of Goats Milk Will Be Controlled

Now it's a new milk by-law!

Alderman John Harvey will introduce to the City Council on Monday night the draft of a by-law to repeal the existing milk by-law, and to give the city authority to do everything in the control of dairies and with vendors of milk that the B.C. Milk Act of 1927 says a corporation may do.

The primary difference between the new by-law and the old one, as explained by Dr. Arthur G. Price, City Health Officer, to-day, is that the amending measure will give civic control over goat farms and the licensing of vendors of goats' milk, in addition to the customary control over other dairies and cows' milk. Stabling and other phases of dairying will be placed more rigorously under control by the new by-law.

not live in the house, but every morning when the door was opened, she was on hand to greet Prince, and sometimes to go inside.

Their method of exchanging affection was strange. If Prince was lying on the ground, Polly walked around and pecked at him. Then Prince took her in his mouth and held her awhile.

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

ISLAND ROADS WILL BE GIVEN OILED SURFACE

Extensive Programme of Improvements Outlined By Public Works Department

Details of the road oiling programme which will be carried out on Vancouver Island by the Government this year are announced at the Public Works Department.

In the Esquimalt district forty miles of road will be treated with "black top," including the Summit Road, the Shawigan Cutoff Road, the Shawigan-Mill Bay Road, fifteen miles or more of the Sooke Road, the Happy Valley Road, Admiral's Road, the Westchoin Road from Millbank to the Quarantine Road, the Quarantine Road from Metchoia westerly, the Rocky Point Road from Happy Valley Road westerly, and the Bamberton Road. In addition, parts of the Island Highway requiring it, will be re-surfaced.

In the Saanich district oiling and surfacing will be applied on the Burnside Road, the Helmken Road and the West Saanich Highway.

Considerable work will be done around Sidney and on Salt Spring Island.

IN COWICHAN DISTRICT

Twenty-eight miles of road will be treated in the Cowichan-Newcastle district. This will include the Island Highway from Wellington to Cedar Road, the old Victoria Road, the Island Highway from the South Wellington Road to Cobble Hill and the Wellington Road to Nanaimo.

In the Alberni district twenty-three miles of road will be surfaced, including the road from Parksville to Qualicum, from Qualicum to Qualicum River, from Wellington to Parksville, and from Parksville to the Alberni Road.

Roads in the Comox district, to the extent of thirty-one miles, will be treated as follows: Qualicum to Deep Bay, Grantham to Merville, Courtenay to Royaton, Royaton to Union Bay, Courtenay to Comox and Courtenay to Cumberland.

Extensive work of the same kind will be done on the Mainland, including the improvement of the Transprovincial Highway from the end of paving outside Vancouver to the Chilliwack paving, and the surfacing of the Dewdney Trunk Road.

PLATINUM IS DEBATE TOPIC

Commons Approves No Duty Plan For Wire, Bars and Sheets

Ottawa, April 12.—The clause of the tariff resolutions placing platinum wire, bars, sheets and plates on the free list was adopted following lengthy discussion by the House of Commons in committee yesterday afternoon.

Hon. H. H. Stevens, Conservative, Vancouver Centre, expressed it as his view the Government should take steps to encourage the refining of platinum in this country. He said he was willing to go as far as an export tax.

Mr. Stevens referred to the work of the Consolidated Mining and Smelting Company at Trail, B.C. Thousands of Canadian workmen, he believed, could be employed if metal refineries were given opportunity to establish themselves.

PLACE ADVANTAGE

John Evans, Progressive, Rosetown, Sask., said he could not find any definite principle in the arguments he had heard. If the raw material was refined here, then an industry refining it would have the advantage as the cheapest place to get it would be at the mines. It should not need protection. He contended free trade was the only logical way to build up industries in this country.

AUTOMOBILE PRICES

Members of the U.F.A. group asked if the Canadian automobile producers who in 1926 had promised to pass on to the consumers the benefit of the discounting of the five per cent excise tax on Canadian-made cars up to \$1,200 in value were keeping their agreement.

Hon. J. A. Robb, Minister of Finance, tabled replies to the question from a number of automobile firms assuring him the purchasers were getting the advantage in the prices of their cars. However, some of the firms had not replied.

G. G. Coote, U.F.A. Macleod, and Robert Gardiner, U.F.A. Acadia, thought the Minister should reprimand the firms which had done him the discourtesy of failing to reply to his inquiries.

Mr. Coote said he knew of instances where automobiles, on which there was a duty of twenty per cent, actually sold in Canada at twenty-nine per cent above the price obtained at the point of manufacture. This was an injustice he claimed, and should be corrected.

QUESTION OF REVENUE

Mr. Coote suggested the Minister should take off the excise tax on all cars valued at \$1,200 or less, whether they were manufactured in Canada or elsewhere.

Mr. Robb said there was no proof the majority of the automobile manufacturing companies had not lived up to their agreement and a question of revenue arose in connection with the request of Mr. Coote that the excise tax should be removed on all cars entering Canada valued at \$1,200 or less.

The auto discussion came up when the House was dealing with the tariff item respecting automobiles which adds sidecars, of motorcycles to the advantages enjoyed under the tariff by automobiles. The item was finally agreed to.

Viscount Goto Dies In Japan

Kyoto, Japan, April 12.—Viscount Shimpel Goto, former Foreign Minister of Japan, died here yesterday. The seventy-three-year-old statesman, who had continued his active career to the end, was stricken with cerebral hemorrhage on April 4 while on a strain coming here from Tokyo.

Social, Personal and Women's News

PRINCIPALS IN TO-DAY'S SMART WEDDING

MR. AND MRS. CHAS. HUGO RAYMENT (nee Dunbar)

—Photo by Easthope.

Personal Items

Mr. and Mrs. Hugh Dalton of Van-
couver are registered at the Empress
Hotel to-day.

Mr. W. R. Johnson and family, of 809
Linden Avenue, have taken up their
residence at 241 Belleville Street.

Mrs. Elton M. MacBryne returned to
Victoria Friday morning from a week's
visit to Vancouver and Seattle.

Mr. Frederick Watrous arrived to-
day from St. Paul, Minn., and is the
guest of his cousin, Miss Agnes
"Schumann," Rockland Avenue.

Commander the Right Hon. Viscount
Cullis of Culross arrived in Victoria
last week en route to his summer re-
sidence in Victoria.

Mrs. A. Sidney Roberts of Seattle is
visiting her parents, Mr. and Mrs.
Thomas Humphreys, 2976 Quadra
Street.

Mr. and Mrs. Frank V. Hamm, who
have been residing in Victoria for the
last year will leave on Saturday for
Vancouver en route to their home in
Saint John, N.B.

Miss Gordon of Vancouver, who has
been spending the last week in Vic-
toria as the guest of Mr. and Mrs. E.
Lean, Dallas Road, will leave on Mon-
day for her home on the mainland.

Mrs. H. A. Carney entertained at the
tea-hour yesterday afternoon at her
home on Fernwood Road, complimen-
tary to Mrs. C. A. Pye of Prince George
and Mrs. McElroy of Seattle.

Mr. Leonard L. Phillips arrived in
Victoria on the Emma Alexander on
Thursday, and will spend a few weeks
at his home on the Gorge Road before
returning to San Francisco.

Mrs. McElroy of Seattle, who has
been spending the last few days in
Victoria as the guest of Mr. and Mrs.
E. P. Burden, Yale Street, Oak Bay,
returned this afternoon to her home in
Seattle.

Mr. and Mrs. Haston Herbert Bale
will leave California on April 13 and
return to Victoria, where they will
spend two weeks with Mr. and Mrs.
H. Bale, Stradacona Avenue. It will
be the first visit of Mr. Bale to his
parents for two years.

Mrs. Young, who has been spending
some months with her son-in-law and
daughter, Mr. and Mrs. F. H. Alwood,
St. Ann Street, Oak Bay, is leaving at
the end of the month for her home in
England, spending two weeks in New
York en route.

Mr. and Mrs. J. L. Yagle of Seattle
announce the engagement of their
eldest daughter, Maybelle Anna, to
William Douglas McGinley, only son
of Mr. and Mrs. F. McGinley, also of
Seattle, formerly of Victoria. The wed-
ding will take place the middle of this
month.

Mrs. Edward Mahon was a luncheon
hostess in Vancouver on Thursday,
entertaining in honor of Dr. Winifred
Cullis of London, and her house-
guest, Miss Wilson of Waitaki, N.Z.
Covers were also laid for Mrs. B. D.
Ollie, Mrs. George Richardson, Miss
Jamieson, Mrs. George Phillips of Es-
quimalt and Mrs. J. C. Donald.

An enjoyable afternoon was spent by
the many ladies who attended the silver
tea held by the Hollywood Presbyterian
Sunday School Ladies' Aid in the hall,
Widow Avenue on Thursday. The
following took part in the afternoon
arranged by Mrs. I. B. Dixon: Vocal
soloists, Mrs. Bowen, Mrs. Kyle and Mrs.
Perry, accompanied by Mrs. Harris and
Mrs. McLellan.

ST. MARY'S IS SCENE TO-DAY OF WEDDING

Beautiful Ceremony Unites
Miss Jean Dunbar and Mr.
Chas. Hugo Rayment

One of the most beautiful Spring
weddings of the year was solemnized
at St. Mary's Church, Oak Bay, to-day
at 1:30 p.m. when the rector, Rev. A.
E. del. Nunna, united in marriage,
Jean Ida, only daughter of Brigadier-
General and Mrs. J. S. Dunbar, of
Dunbar, Monterey Avenue, Oak Bay,
to Mr. Charles Hugo Rayment, only
son of Mr. and Mrs. Charles Rayment
of North Vancouver, B.C. Hundreds
of guests were invited for the ceremony
and the subsequent reception.

For the happy occasion girl friends
of the bride, under the direction of
Mrs. James Gray, had transformed the
interior of the church into a floral
bower. At the entrance to the chancel
was an archway of narcissus, Japanese
plum-blossom and primrose, from
which hung a wedding bell of plum
blossom and lilac, beneath which stood
the bride and groom. The chancel rails
were massed with Spring blossoms and
similar flowers designated the guest
pews, the whole forming a fragrant
and beautiful setting for the ceremony.

LOVELY BRIDAL GOWN

Given in marriage by her father, the
bride entered to the strains of the
Lohengrin Bridal Chorus. For her
wedding gown she had chosen an ex-
quisite imported French model of ivory
ring-velvet in period style with slender
bodice and long tight sleeves of nylon,
finished with deep cuffs of the velvet.
The skirt was in three tiers, graduat-
ing in length on the left side to the
ankle. Her full court train was of
ivory nylon lined with seafoam-green
nylon and adorned with a huge true-
lover's knot of the velvet. Exquisite
old Bretonne dentelle lace, an heir-
loom belonging to the bride's great-
grandmother, formed the veil, and her
only ornament was a handsome dia-
mond and pearl pendant, the gift of
her aunt, Mrs. H. C. Oswald of Mon-
trouk. A shower bouquet of freesias,
Ophelia roses and white heather com-
pleted the bride's lovely toilette.

Miss Margaret Rayment of Vancou-
ver, sister of the bridegroom, and Miss
Marjorie Oates of Victoria were the
bridesmaids. They wore charming en-
sembles of cream silk lace over ivory
georgette, the frocks made with sleeve-
less bodices and two-tiered skirts, with
ivory georgette coats finished with
long-scarf-like collars of the georgette.
Their hats were of close-fitting cream
net, with appliqued cream felt leaves
giving the long line over one ear. Their
evening-crope de Chine shoes were fin-
ished with lovely old French paste
buckles, the gift of friends. The
bride carried a bouquet of white
Hartley tulips, tied with ribbon to
match.

Master Michael Curry, small son of
Commander and Mrs. A. D. M. Curry,
was the train-bearer to a Kate Green-
away suit of cream satin with long
trousers and silk shirt finished with
frills at neck and wrist. Capt. R. D.
Kiamond of Vancouver was best man
and the ushers were Lieut.-Col. J.
Bevan Dunbar of Calgary, brother of
the bride, Major P. Hennessey of Vic-
toria, and Mr. R. Shakespeare of Van-
couver.

RECEPTION AT "DUNBEG"

After the ceremony a reception, at-
tended by a large number of guests,
was held at "Dunbeg," Monterey Ave-
nue, the home of the bride's parents.
To receive the felicitations of their
many friends, the bride and bridegroom
stood in an alcove in the drawing-
room beneath an archway of Japanese
plum-blossom, narcissus and flowering
clematis, flanked on either side by
masses of Spring flowers. The deco-
rations at the house were in charge of
Mrs. J. Sutherland Brown and Mrs.
Sydney Barker.

Mrs. Dunbar received the guests in a
smart gown of elephant skin georgette,
with flounce of ring velvet in a deeper
tone and Lohengrin hat trimmed with
black satin. Mrs. C. Rayment, mother
of the bridegroom, also assisted in
receiving.

After the reception, Mr. and Mrs.
Rayment left on the afternoon boat
for Seattle, the bride traveling in a
smart French ensemble of monkeyskin
kasha, over which she wore a hand-
some moose-knit coat, the gift of her
father, and a Russian opossum stole,
the gift of her husband, together with
a small hat of monkeyskin felt. Later
they will make their home at 1165 Ros-
lyn Road, Oak Bay.

Review to Meet—Queen Alexandra

Review No. 1, W.B.A., will meet in the
K. of C. Hall on Monday evening, April
15, at 7:30. The review will entertain
members and friends at a bridge and
five hundred tea in the K. of C. Hall on
Monday afternoon at 2:30.

Victoria West P.T.A.—The next
meeting of the Victoria West Parent-
teacher Association will be held in the
assembly hall of the school on Wed-
nesday evening, April 17, at 7:30. The
children of the school will present the
items which they have prepared for
the Musical Festival, and in addition
there will be lantern slides of Canada
shown by the new school lantern. All
members are asked to please note the
change in time and date, and a spe-
cially good attendance is requested
both for the encouragement of the
children and the pleasure of the mem-
bers.

W.B.A. Card Party—The W.B.A. will
hold a bridge and five hundred tea
at the K. of C. Hall on Monday after-
noon at 2:30 sharp. There will be good
prizes and special prize for each.

Old Dutch Says

"The importance of Healthful Clean-
liness in good cooking can not be over-
emphasized. To assure full food value and
flavor, utensils must be healthfully clean,
free from all impurities, taint or odor."

Old Dutch keeps utensils perfectly clean
and is therefore one of the greatest helps
in good cooking. Perfect for snow-white
and gayly coloured cooking utensils; glass
and aluminum, etc.

For greater economy Old Dutch is
unequalled. No cleaning preparation does
so much as Old Dutch and none can do
it so well.

TOO MUCH NOISE AND SPEED IN MODERN LIFE

Says Dr. Winifred Cullis Before National Council of Education Conference

Vancouver, April 13.—What is the effect of noise upon the human system? This is a problem that is demanding serious consideration by scientists in view of the rapidly increasing volume of industrial sounds; the replacement of wood, which absorbed and deadened sounds, with steel and concrete; the building materials, the construction of skyscrapers and the consequent contraction of air spaces above city streets. Dr. Winifred Cullis, M.D., O.B.E., M.A., D.Sc., discussed the experiments that are being made in Great Britain and the United States in the subject, and told of the importance of establishing the reactions to noise, at a crowded meeting of the triennial conference of the National Council of Education Friday night.

Miss Cullis has given considerable thought and study to the subject. The observations that she made and those of others who have been investigating the effects of noise on the human system have not progressed to a state where definite pronouncements may be made, she said. They have, however, opened up a wide field for research and have indicated some surprising facts and situations.

WHAT IS NOISE?
One peculiarity that has been evidenced is to determine what is "noise," for sound that has been found to seriously disturb one person has been welcomed by another. She laughingly illustrated this point by saying that a jazz band that to some youths might appear to be sweet music would hardly appeal to a neighbor trying to go to sleep as being of such a pleasing character.

The one evident truth that was outstanding in all the volume of noise that had developed of late years was that it was innumerable upon each individual to have consideration for others in producing noises whether by voice or mechanical means.

VOICE DISCUSSED
A reminder that man is the master and that it is for him to change modern conditions if they do not meet his needs or benefit was made by Dr. Cullis at the afternoon session when she discussed "Speed." If speed could be used to increase leisure and the enjoyment of life she favored the adoption of those modern machines which would extend its benefits. But she warned that if it did not meet modern needs it should not be accepted.

In introducing her subject, Dr. Cullis reminded her hearers that by the very nature of the universe they were traveling at 200 times that of Major Segar's record-breaking automobile. Science had very little information on speed and there was need for the investigation of speed on the human body.

RHYTHM IN WORK
She told of a number of interesting experiments of the National Conference on Industrial Psychology whereby workers' productivity was speeded up and fatigue lessened through the development of rhythm in work.

"My idea of leisure," she said in conclusion, "is just thinking, and I think that we all would gain a great deal of good from pausing to consider. Many of us just go on and unless there is some time for thought, one can not develop those fine shades of appreciation which go to make life richer."

Stitches Are Demonstrated By Women's Institute

The demonstration of fancy needlework stitches given by Mrs. Barber of Vancouver on Friday afternoon at 203 Union Building headquarters of Victoria Women's Institute was largely attended and proved most interesting. Prior to the demonstration, Mrs. Barber gave a short talk in which she said that many of the newest stitches were in reality very old. A wonderful piece of work shown was a piece of Turkish tambour embroidery. The stitches in which the women seemed most interested were those of the eleventh century known as West Gothic. At the close of the demonstration afternoon tea was served by Mrs. Laird and her committee. A beautiful embroidered purse, donated by Mrs. Woodburn, was won by ticket No. 22. Mrs. Laird announced that the W.I. had arranged to hold court what in their rooms next Thursday afternoon at 2.30.

The business meeting of Lodge Primrose No. 32, Daughters of England, was held on Friday evening in the S.O.E. Hall, the worthy president, Mrs. Baron, presiding. Excellent reports of the preceding year were given by the secretary and the silver tea was served. The memorial service to be held at Ross Bay cemetery on Sunday, April 21, was announced. The gates at Dallas and May streets at 2 p.m. An invitation was received and accepted from the Lodge Royal at New Westminster for a fraternal visit on June 13. It was decided to hold another of the popular dance and card parties after the next social meeting, April 26.

Lodge to Meet—The regular monthly meeting of the Daughters of St. George, Victoria Lodge No. 83, will be held in Harmony Hall on Monday evening at 7.30, followed by a dance. Members are requested to attend and supply refreshments.

SOCIAL SERVICE LEAGUE GAVE AID TO 350 FAMILIES

Annual Reports Show Beneficent Work of This "Family Service Society"

W. B. Lanigan Urges Greater Correlation of Relief Work in Victoria

"The corner stone of the Social Service League is an unshaken belief in the worthwhileness and permanence of family life. It is an unflinching faith in the power of good that has been the daily encouragement of the staff as they have tried to meet the problems. The League is a family service society whose every effort is directed toward the possible happier home life, bringing to each individual within the family greater opportunities for self-expression and a normal development of personality."

This definition of the aims and purpose of the Social Service League was made by Miss Snyder, the general secretary, in her report presented at the annual meeting of the League at the Empress Hotel last evening. Mr. W. B. Lanigan presided.

OUTSTANDING PROBLEMS
"The outstanding problems have been illness, unemployment, death and non-support, intemperance, insufficient earnings, wrong attitudes among the various members of the family, immorality, death of the breadwinner and lack of parental care," the report continued.

"Helpful service was given to 350 families during the year, or 1,241 individuals. 599 of these were children under fifteen years of age. In going over our records we found fifty per cent of the families to have been English-born."

1,843 VISITS PAID
During the twelve months ending March 31, the staff made 1,843 visits. This does not include the visits made by our volunteers who services have been much appreciated by the families as well as the board.

"A sick and tired voice came over the telephone one morning, wondering if anything could be done. After a few moments of conversation, the mother said, 'Oh, thank you so much, I shall try it at once' and the next day she called again in a much more cheerful voice. Our telephone has thus proved helpful in more than 3,000 just such interviews. A total of 2,246 visits the office in person for advice."

"Much that we do for our families cannot be tabulated or classified, but we would gladly welcome at any time a visit to our office or perhaps a visit with us to our families."

OUT-OF-TOWN INQUIRIES
Inquiries in the form of letters and telegrams come to us from all parts of the world. The Social Service League is the agency for Victoria listed in the World's Directory of Social Agencies. Prompt attention is given to these inquiries and reports sent to the agency. During the past twelve months thirty-three requests came to us, and these entailed many visits. On our own problems we frequently find it necessary to ask for this assistance from agencies in other countries and thus have secured help for our clients."

MENTAL HYGIENE CLINIC
To understand something of the mental health of our community and know something of the personality problems entering into our family life of today one would need to visit the office on a clinic day. Dr. W. A. Dobson, psychiatrist of Vancouver, has again given so generously of his services. Children of normal intelligence yet problems in their homes and in the school, have been seen and parents advised. The medical fraternity has been asked for consultations. Several cases of epilepsy among children have been treated."

"A very distressing problem is that of the subnormal child for whom no effort is made to train for independence. He attends school, but when he leaves he is not fitted to earn his living and therefore many could be made self-supporting if proper training along technical lines were possible."

SUMMER CAMP
During 1928, the Summer camp was in operation for six weeks during which time three parties were taken out, each being given two weeks. Thus sixteen mothers, forty children and twenty-six girls enjoyed a much needed vacation. For many of the mothers it was their first release from household responsibilities, a happy marriage. All showed a decided gain in health and strength as well as weight.

"In passing, we wish to express our thanks to Dr. Price, who examined all children before going to camp and weighing them on their return. The entire cost of operation for the six weeks was \$783.63, less than 70 cents per day per person. Now that a site has been purchased, we are hoping to extend this very valuable service. We have sufficient names for our first party and hope that none will be disappointed. Many of our mothers are looking forward to the holiday, and hope the intervening months will pass quickly."

"In closing, we wish to thank other organizations for their co-operation and the churches for the interest they have shown; also we wish to express our indebtedness to the board of directors and to all who assisted in any way, and their names are many, and to the Times and Colonist."

TOO MUCH OVERLAPPING
Mr. Lanigan in his address urged closer supervision and correlation of charitable work in the city, claiming that at present there were many receiving relief who were not entitled to it. He urged the necessity of working on the same lines as that based in Winnipeg, Toronto and Montreal, where the duplication and triplication of misplaced charity was thereby made impossible.

Speaking of Social Service Sunshine Camp at Sooke, he said that this was well established for the ensuing year. Some three or four thousand more dollars were needed for its completion, but it would then be a permanent and it would be possible to double its capacity in a few years at a very small expense.

The meeting voiced its appreciation of the medical fraternity in general, and of Dr. W. A. Dobson in particular, for the disinterested manner in which they had assisted the work of the league.

BOARD OF DIRECTORS
Those elected on the board of directors were as follows: R. A. Anderson, G. R. Chisholm, Miss G. Chesley, W. C. Gough, W. C. Douglas, Mrs. J. Galt, J. Goldie, Mrs. A. Hibernon, Mrs. D. Holmes, Mrs. A. James, F. Landsberg, W. B. Lanigan, Mrs. E. Lobb, Mrs. E. McDonnell, Mrs. M. Macintosh, A. R. Merritt, Miss H. O'Brien, Miss Ogilvie, Mrs. F. A. Osborne, Mrs. W. Parry, J. Patrick, Dean Quinlan, Mrs. J. E. Reppath, Rev. E. M. Schindler, Mrs. C. D. Schofield, Miss S. Spencer, Rev. J. Strachan, Mrs. A. Sullivan, Mrs. E. A. Taylor, Miss V. Wilson and Mrs. F. F. Wilson.

Authors' Association—The paper read by Mrs. Mary H. Rathorn before the Victoria and Islands branch, Canadian Authors' Association, was taken from the diary of Commander John Buttle, in charge of the Vancouver Island Exploratory Expedition of 1865, and not from the Vancouver Island Historical Society, as announced in a previous report of the meeting. C. C. Pemberton brought to this meeting a copy of Dr. Lorne Pierce's book, "Marjorie Pickthill—A Book of Remembrance," which is a book of verse and prose at whose summons the writers of the Victoria and Islands branch of the Canadian Authors' Association.

LAST MONTH BUSY ONE FOR V.O.N.

Nurses Paid 980 Visits to Sick; Board Members Did Much Sewing

Miss Thornley, head nurse of the local branch of the Victorian Order of Nurses, reported a total of 980 visits during the month of March to the meetings of the board this week. Of these 543 were bedside nursing visits including 292 which were free. Other free visits were 52 pre-natal, 15 post-natal, 168 child welfare, 222 instructive, 4 well-baby clinics attended, 12 classes in mothercraft and home nursing were held. Four nurses were on duty with a fifty per cent half time, and their total hours of work during the month were 920.

The board wishes to thank the following donors: Mrs. Durand, clothes for child; Mrs. Foxford, two beds; Mrs. Ellington, bedding; Mr. Afferton, sick room utensils; Mrs. Willing, jackets for baby; Mrs. Barton, woollies; Mrs. Selden Humphreys, woollies; Mrs. Selden Macey, woollies; Mrs. B. Goward, flannel; Mrs. James Angus, woollen garments for children; old linen from

Mrs. Gilmore, Mrs. Coe, Mrs. Brodigan, Mrs. H. J. Davies, Miss Bate, Miss Alexander, Mrs. Ella, Mrs. Winslow, donations in money from Mrs. Patterson, Mrs. Charles Todd, Capt. Allen, Mrs. Tooker, Mrs. F. Robertson.

LENTEN SEWING

During Lent the members of the local board of the V.O.N. met every Tuesday at the home of Mrs. H. G. Lanson, the president, for the purpose of making such articles as are needed by the nurses during the year. In addition to the members there were several friends of the order who extended the meetings very faithfully and did much good work and the board wishes to extend very hearty thanks to Mrs. MacHaffie, Mrs. Barton, Mrs. J. M. Semmes, Mrs. Winslow, Mrs. W. H. Squire, Mrs. B. S. Heisterman, Mrs. Proctor, Mrs. E. W. Boak, Miss King and Miss Wright for their help.

The work accomplished during the Lenten meetings was as follows: 47 baby dresses, 34 barracosts, 37 shirts, 40 jackets, 12 drawers, 77 diapers, 12 pneumonia jackets, 20 receiving blankets, 20 dressing squares, 2 laundry bags, 32 bags for nurses' implements, 6 aprons and baby binders.

Thanks are given for the following donations to the Lenten work: Mrs. Demark, blankets and material; Mrs. Herbert Wilson, children's clothing and old linen; Mrs. Strangman, flannel; Mrs. J. A. Macdonald, St. Charles Street, baby bonnets and dressing

United W.M.S. To Hear Secretary

Miss Evelyn Mitchell, field secretary of the W.M.S. of the United Church in Canada, will address a joint meeting of the Victoria auxiliaries on Friday, April 19, at 3 p.m., in the First United Church. All members of local auxiliaries are urged to take this opportunity of hearing Miss Mitchell speak on her work throughout the Dominion.

L.O.B.A. Meeting—The Queen of the Island, L.O.B.A. 209, held their meeting in the Orange Hall April 10, the worthy mistress, Sister Davis, presiding. There was a good attendance of officers and members and visitors from sister lodges. Two candidates were initiated into the order and two sisters given the second degree. The fancy fair held in the Orange Hall in March was a financial success. Sister Anderson will give a card party at her home, 408 Dallas Road, on April 23. Members and friends are cordially invited to the proceeds to go to the building fund of the Orange Hall. Members are requested to attend the regular meeting on April 24, drill at 7.30.

Typographical W.A.—The regular monthly meeting of W.A. No. 65 to Victoria Typographical Union was held on Thursday afternoon in Eagles Hall, Mrs. P. J. Woodley, president, in the chair. The auxiliary is doing all it possibly can to assist the union with a dance being held at Empress Hotel on May 1. It was decided to accept the offer of the use of the home of Mrs. J. Skellern, 3048 Washington Avenue, for a card party, on Saturday, April 20.

GIRL GUIDE AND BOY SCOUT DANCE

Tickets for the dance to be given under the patronage of the local Association of Girl Guides and the Scout Association on April 19 in the Amphion Hall, may now be secured from Fletcher's Music Store or from any member of either organization, or from the officers of Guide and Scout companies. The dance will be under the distinguished patronage of His Honor the Lieutenant-Governor and Miss Mackenzie. A good orchestra has been secured and refreshments will be served.

Typographical W.A.—The regular monthly meeting of W.A. No. 65 to Victoria Typographical Union was held on Thursday afternoon in Eagles Hall, Mrs. P. J. Woodley, president, in the chair. The auxiliary is doing all it possibly can to assist the union with a dance being held at Empress Hotel on May 1. It was decided to accept the offer of the use of the home of Mrs. J. Skellern, 3048 Washington Avenue, for a card party, on Saturday, April 20.

It is estimated the proposed banquet would cost \$100,000,000.

Miss Helen Wills will have one obstacle less to overcome in her efforts to retain world tennis honors. Mrs. L. A. Godfree, one of the few British women regarded as capable of putting up a fight against Miss Wills, will be unable to play this year because of a broken arm. Mrs. Godfree has won several tennis championships at Wimbledon this Spring. She plans to play in the doubles, however. Mrs. Godfree, who before her marriage to a British tennis star, was Miss Kitty McKane, won the Wimbledon singles title in 1924 and 1926, both years in the absence of Miss Leng. She defeated Miss Wills in the final in 1924, but in 1926, when she was again defeated by Miss Wills, she was not a professional. She hopes to stay in tennis.

Pictures Taken On Inaugural Cruise of Princess Norah

BY HARRY POLLARD, STAFF PHOTOGRAPHER OF THE C.P.R.

A TOFINO INDIAN

One of the group of Indians in picturesque dress who greeted the party on the wharf at Tofino.

THE ENTIRE PARTY AT CACHELOT

Harry A. Pollard, C.P.R. photographer, caught the entire party aboard the Princess Norah on the old whaling station wharf at Cachelot. Their Excellencies are seen standing in the foreground holding a small lad of Cachelot by the hand, while Capt. Neroutsos is sitting in front of the group between two Indians with their baskets.

IN HOLIDAY ATTIRE

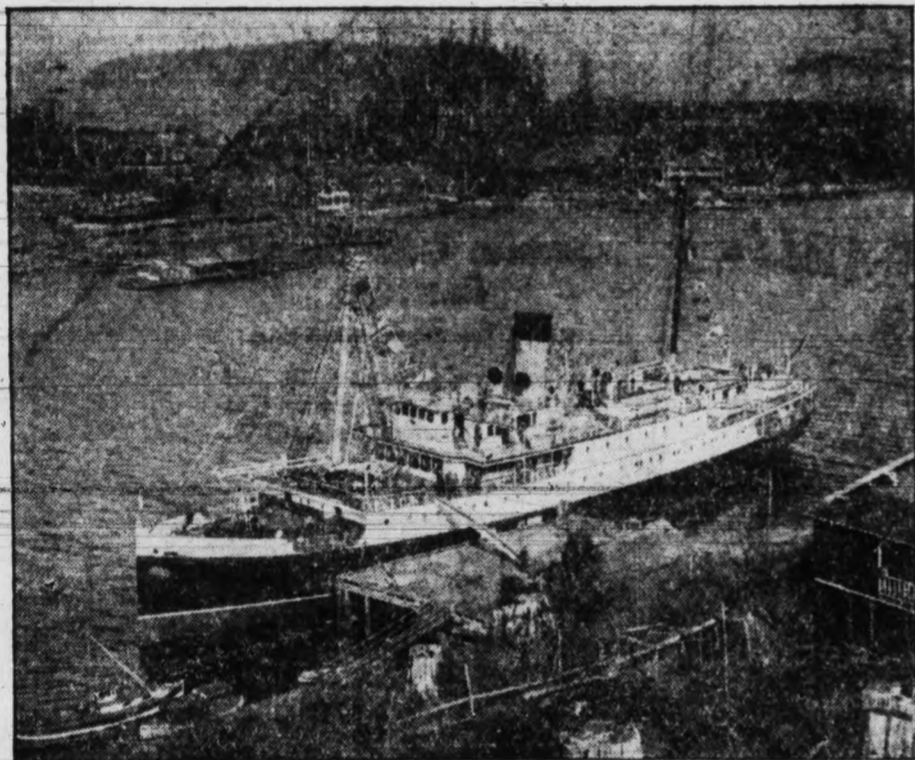

One of the braves of Uchelet, in native dress to receive the vice-regal party. The feather, it will be seen protrudes through a hole made in his nose.

ENJOYING THE SEA AIR

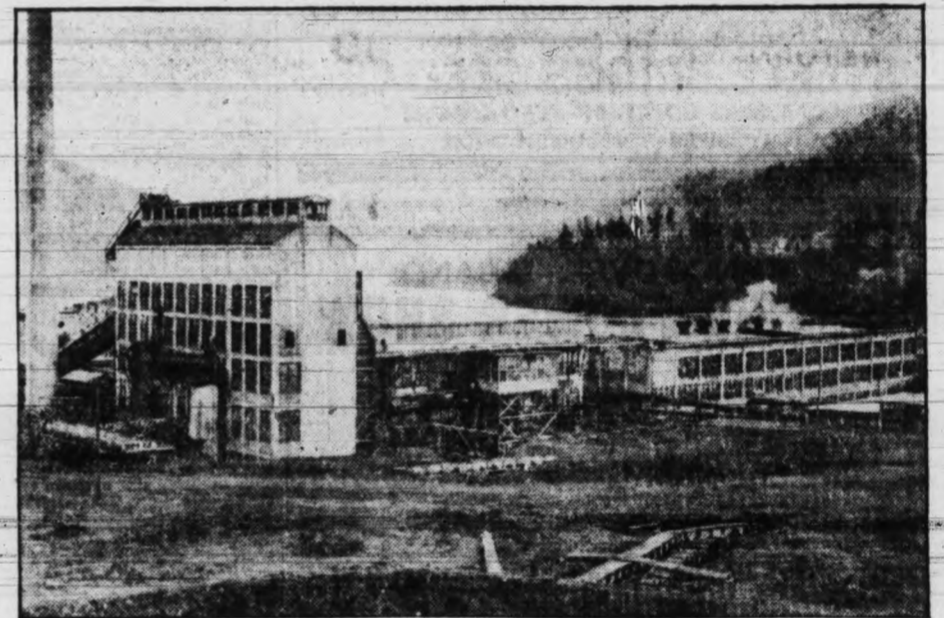

Their Excellencies pose in front of the smoking room for a photograph while enjoying a walk on deck.

THE PRINCESS NORAH AT BANFIELD

The new C.P.R. steamer Princess Norah, on which the four-day cruise was made, was the centre of attraction at all West Coast points and large numbers of residents took the opportunity of looking over the new vessel.

THE LARGEST PORT ON THE COAST

Above is shown a view of the large pulp mill at Port Alice.

A NOOTKA LADY

Jessie Wilson and her baskets snapped on the pier at Nootka.

THE SKIPPER

CAPT. CYRIL D. NEROUTSOS, manager of the B.C. Coast service of the Canadian Pacific Railway, who was host to their Excellencies and the party during the cruise.

THE HOST

H.A. Davie Ltd. To Build Garage

Permit was taken out at the City Hall this morning by H.A. Davie Ltd. for extensions to the existing premises of the firm. A public garage to face on Johnson Street, in rear of the motor showrooms of the firm, will be constructed to plans prepared by C. E. Watkins, and will be executed by Williams, Terrie and Williams at a cost of \$8,500.

Many Trade Secrets Still Closely Guarded

Reuter's Special to The Victoria Times
London, April 13.—A revelation made by Lady Haig the other day reminds people that, even in these days of big combines and mergers, and of co-operative research, there remain trade secrets that are very closely guarded.

All the preserved leaves used in war memorial poppy wreaths have to be imported from Italy, because, though experts in this country have tried many different ways, they cannot discover the particular mode of making these leaves; and Signor Mussolini has refused to ask his countrymen to open their lips.

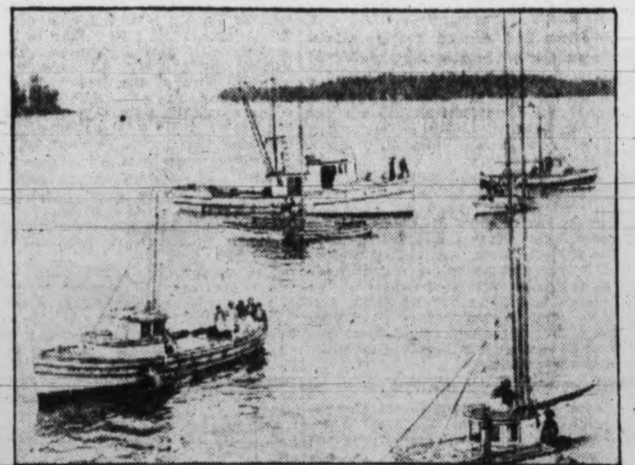

Perhaps he remembers how an Englishman, John Lombe, carried from Portugal the secret of silk-spinning. Until only a few years ago the modern method of weaving Persian carpets was unknown outside Persia. It was revealed by a Finnish manufacturer of carpets who went on tramp to the East in the guise of a simple workman, obtained access to a Persian factory, and soon learnt the "tricks of the trade."

A PRESENT

The large totem pole at Friendly Cove which was presented to their Excellencies by Chief Jack, shown standing between Lord and Lady Willington.

PART OF THE FISHING FLEET

Above are shown several of the fishing craft which came out to greet the Princess Norah as she lay at anchor off Kyuquot.

SOCIAL WORKERS ARE ADDRESSED

Seattle Man Deplores Wrong Handling of "Submerged Tenth"

Some interesting views on social work among "the submerged tenth" were expressed by F. P. Folsie, lecturer of the University of Washington and of the College of Business Administration, at the annual meeting of the Social Service League last night.

taken by many social workers, he spoke of the very obvious pride at the numbers of social agencies and the magnificence of the brick and mortar in which they were housed, and of the idea that, if intelligence entered into social work, sympathy went out. Few could understand the view of the person needing help, said Mr. Folsie, and he described as an outrage the oft-quoted statement that "any man can get a job if he is willing to work."

The development of a high form of family living should be the objective of the right attitude of social work, the speaker claimed. Only by this development could be softened and ameliorated the successive shocks which made life so difficult for "the submerged tenth." Social case work was an invaluable factor in helping these unfortunate citizens, he said.

It Must Be Good When So Many Buy It

IN every city, town and village there is abundant evidence of the value of life insurance in sustaining the home following the death of the husband or father and in providing funds for the evening of life.

TSETSE FLY ONE OF AFRICA'S BIG PROBLEMS TO-DAY

G. R. Stevens Tells Women's
Canadian Club of Condi-
tions at the Cape

"Africa and African Problems" was the subject of the absorbing address by G. R. Stevens, Canadian trade commissioner for Peru and recently commissioner for South Africa, before the Women's Canadian Club at its meeting yesterday afternoon. Mrs. C. C. Spofford presided.

Disclaiming any pretence to being an authority on Africa, Mr. Stevens declared that the continent of Africa was so vast and so little known that there were no real authorities upon the subject. Many writers had written of it, succumbing to its glamour, including those who told stories of the unicorn and the mines of Ophir, and those who related stories of Trader Horn, but all their books were romances rather than accurate accounts of the real Africa.

GREAT BRITAIN'S RIGHTS
After touching briefly upon the geography of the Cape, the speaker described it as a land of drought, of too many politicians and not enough rain. It became a veritable tavern of the seas in the early days owing to its position on the route to Asia, and later in the years of Holland's marine greatness many of her people had settled there. After describing Great Britain's jurisdiction in Africa, "which came to her by the double rights of conquest and pur-

chase," Mr. Stevens spoke of the conditions in the nineteenth century when many of the Dutch settlers reverted to nomadic, and of the new era which opened with the discovery of gold.

CECIL RHODES'S VISION
He paid a tribute to Cecil Rhodes as the only man who saw Africa as a people and a nation, and who was also the only man to make plans for turning the continent into a nation, for orientating the blacks into the political fabric for merging the Dutch and English in natural trusts. But Rhodes's great vision had not been realized for the world had gone beyond Africa, and it was still a land of little peoples with a wall between them, lacking community of thought or interest. One of the greatest barriers to the formation of a national consciousness was the tsetse fly, which kept the people apart and prevented commerce or even traffic between villages.

"The great problem is that you have freed a people, what are you going to do with them?" he asked. "There is no social problem in Africa, according to Mr. Stevens, but the economic and political problems are well-nigh insuperable."

The Afrikaner attitude of both Dutch and English speaking residents of the Cape is that the basis of white civilization must be preserved by coercive measures if necessary, but the Colonial attitude, arising from Gladstone Liberalism, is that the white man has a trusteeship over the native and that the native must be protected, he said.

Mrs. Gladys Stark sang two delightful numbers, including a poem of Sir Rabindranath Tagore's set to music, "The Bird in the Wilderness," and "Ships That Pass in the Night," with Miss Bronson at the piano.

Wind-burned Skins — need — Cuticura

Soap and Ointment. They do so much to allay irritation, redness and roughness of the face and hands, remove dust and grime and keep the skin soft and clear under all conditions of exposure.

Soap 25c, Ointment 25c, and 50c. Talcum 25c.
Sold everywhere. Sample each free.

TAGORE WILL SPEAK HERE

Famous Poet of India to Ad-
dress Sikhs at Temple
To-morrow

Coincident with the return of the great poet of India, Sir Rabindranath Tagore, to this city to-morrow, will be the celebration by the local Sikh sect of the anniversary of the founding of Sikhism. Authorities of the temple are preparing a great welcome for the famous poet, who is expected to arrive by the afternoon boat from the Mainland. He will address his fellow-countrymen at the Sikh Temple, Topaz Avenue, it is announced.

The ceremonies in connection with the celebration at noon to-day will consist of readings from sacred Scriptures, lectures, prayers and hymns.

OPEN TO PUBLIC
To-morrow's meeting will commence soon after the arrival of the boat bearing the poet. Temple authorities stated the gathering would be open to any wishing to attend.

A feature of the occasion will be the presentation by the local Sikh organization to Tagore, of a purse of money for use at his international university at Bolpur, near Calcutta. The university is said to be laboring under financial difficulties, the poet having mortgaged his ancestral estate to aid in carrying on the work.

OTHERS IN PARTY

Several other delegates to the National Council of Education conference are also expected here to-morrow. With the poet will be Rev. C. F. Matthews, his intimate friend, it is expected, while Professor K. V. Chandra, one of the directors of Tagore's University, will also accompany him.

Kastur Singh, who has recently come to the coast from Toronto to start a magazine called "India and Canada," will also be here.

FRENCH PEASANTS ARE EULOGIZED

Comte Serge Fleury Criticizes
Great French Writers' Views

A large audience comprising the French people of Victoria, students of French and lovers of France and of her literature assembled yesterday afternoon in the lecture room of Victoria College to hear a delightful discourse on "Provincial France" by Comte Serge Fleury, under the auspices of L'Alliance Française. This distinguished speaker, who is a delegate to the Educational Conference, was introduced by Madame Halet, who designated his address as a happy chance fulfillment of the third French lecture in L'Alliance's season of four conferences.

OFF BEATEN TRACK

Comte Serge Fleury invited his audience to make a little tour of some of the French provinces best known to him, and which were too seldom visited by travelers in France to whom Paris and the environs were far more familiar. The fine buildings, museums, theatres, libraries, seats of science and learning, and the many churches were all worthy of prolonged attention, but provincial France, which is the real heart of the country, was proven by the speaker, both in word and in pictures, to be of great beauty and attraction. A fine chart projected upon the screen gave a vivid picture of Languedoc, which, with Perigord and adjacent lands, while sharing like the same characteristics, were shown to possess also a delicious and distinctive differential charm. Some corners of these provinces have succeeded in keeping their forests free from the vengeance of nations, though many fine trees here, as elsewhere in the world, have been sacrificed in the cause of paper and ink.

PEASANTS NOT UNDERSTOOD

The peasants of France have not always been understood, said the speaker. Frequently great writers, even as Moliere, have made them speak in an unheard-of language to provide the comic relief in their plays or stories. Others depicted them as curious beings knowing only how to curse in the earth, the only way suggested by the lecturer of forcing the earth to yield her products. Again as in the tales of Balzac, they are represented as old and faithful servants, or else as they are and live with greed their predominant passion. Those who write of the country should find their inspiration in the country, and not in the city, said M. Fleury.

ZOLA CRITICIZED

Emile Zola's "La Terre" was mentioned and its horrors of country life pronounced fit for the Criminal Gazette. The real peasants of France were eulogized as being possessed of more sense than the average philosopher, deeply interested in their work, industrious and occupied with exterior politics. The problems of the country were full of practical value and healthy teaching.

Comte Serge Fleury, in closing his lecture, which was illustrated by fine slides, expressed the hope that his comments and the illustrations might urge travelers from Canada to visit these less frequented parts of France, which were filled for him with the poetry and romance of childhood. Madame E. Sanderson Mongin, in voicing the thanks of L'Alliance, congratulated the Comte upon his presentation of this new aspect of France, which, coming at the end of a series of lectures upon art, literature and the stage, was in truth "la piece de resistance," and the land would indeed be found lovely by the dwellers of a friendly country like Canada.

Prior to the lecture Madame Halet regretted the unavoidable absence of three of the most faithful members and to these members, Mrs. Hebdon Olliphant, Mrs. B. T. Drake and Mrs. Schramm, the sympathy of L'Alliance was offered in the bereavements they had each suffered.

At the close of the lecture, Comte Serge Fleury was the guest of M. and Madame Georges Halet, Truett Street, when some of the French people of Victoria were invited to meet their distinguished countryman.

LEAVES SUNDAY

On leaving Vancouver on Sunday Comte Fleury will proceed to Calgary, where he will address the Canadian Club, and in Winnipeg he will also speak before some groups, as well as in Toronto, where he is looking for-

ward with keen pleasure to meeting again his war-time friend, General Mitchell, dean of the Faculty of Applied Science, University of Toronto.

A sojourn in Montreal and Quebec will terminate his Canadian tour, which Comte Fleury hopes will not be the last opportunity of visiting this country, with which he finds himself greatly enamoured, and where he has been obliged to decline so many invitations to speak on account of the shortness of time and the fatigue of travel, though this latter he has found much less trying than the prospect of so long a journey had warranted.

RADIO COMMISSION DUE HERE TUESDAY

The Royal Commission on Radio will arrive in Victoria on Tuesday morning, April 16, according to information received from E. J. Haughton, divisional superintendent of radio, 1230 Government Street, not later than Monday afternoon, April 15.

By courtesy of the Acting Premier.

Hon. R. H. Pooley, a room in the Parliament Buildings has been set aside for the use of the commission. On Tuesday at 10:30 a.m. the broad-casting situation will be discussed with officials of the Provincial Government, and on Wednesday with those delegates who have made arrangements to meet the commission.

Any communications in connection with the Commission's meetings here should be sent to E. J. Haughton, divisional superintendent of radio, 1230 Government Street, not later than Monday afternoon, April 15.

J. E. CYR DIES IN MANITOBA

St. Boniface, Man., April 13.—J. Ernest Cyr, superintendent of the Federal Public Works in the Winnipeg district, former member of the House of Commons for Provencher, Man., and former mayor of St. Boniface, died at his home here. He was born in Montreal September 4, 1834, son of Mr. and Mrs. Michael Cyr. He was well known

as a lecturer and a writer. He had planned to retire from public life on May 4 of this year.

Rheumatism Crippled English Girl

But Gin Pills soon brought relief

A stranger in a strange land, only nine months out from England and six of these a cripple with Rheumatism. No wonder Miss Florence Hallett was despondent. Writing from Ottawa she sums up in a few sentences those dreary, painful months—three doctors, a foot specialist, a month in hospital, then work again when she "should have been in bed."

Gin Pills earn Miss Hallett's warmest praise. "I found an improvement after the first box," she declares gratefully. "I shall always keep your pills by me. I think they are wonderful."

The great value of Gin Pills lies in their soothing and tonic effect upon the kidneys. The relief they give sufferers from Rheumatism, Sciatica, Lumbago, etc., is wonderful. But these acute conditions should never be allowed to develop. Take Gin Pills the first time symptoms of trouble show themselves—backache, dizziness, spots before the eyes, swollen joints, headache, brick dust in urine, a burning sensation attendant on scanty or too frequent urination. See a box at all druggists. National Drug & Chemical Co. of Canada Limited, Toronto, Canada.

SEEK ROAD TO MENZIES BAY

Up-Island Trade Board Makes Representations to Works Department

Strong representations for a road north from Campbell River to Menzies Bay with a claim that it will throw open to the markets of Courtenay and the upper Island a payroll of \$150,000 a month have been made to the Public Works Department by the Courtenay Board of Trade, and will be followed by a delegation calling on the department soon.

At a recent meeting of the board, members reported that they had walked over the proposed seven-mile route and were impressed with the simplicity of the undertaking. Seven miles of the easiest road building would enable the loggers of the district to visit Courtenay and other Island cities, whereas at present all the business went to Vancouver, it was stated. It was claimed that \$15,000 would build the road.

WANT EARLY START

Mayor Theed Pearce, who had been the first of the local business men to hike over the proposed route, gave a short description of his trip. He described the building of the road as a "simple proposition" for the reason that it is an easy grade with no streams or boggy land to cross and only two ravines to be bridged. He commented upon the beautiful view of Seymour Narrows the road would command and the large part this would play in bringing tourists to the district, for the Narrows were destined to become known and talked about as a beauty spot over the length and breadth of Canada.

When an accident happens in one of the camps at Menzies Bay the unfortunate victim has to be taken by boat to Campbell River, which takes about an hour, whereas with a road the journey could be accomplished in twenty minutes.

WILL TALK ON B.C.'S COPPER

An address will be given before the Vancouver Island Prospectors Association next Tuesday at 8 p.m., J. D. Galloway, Provincial mineralogist. The meeting will be held in the Unity Centre Hall, Yates Street. Mr. Galloway's subject "Copper in British Columbia, Past, Present and Future." He will deal with the general mining, smelting and milling practice and the future of copper mining in British Columbia. A cordial invitation is extended to all to hear the address.

A landlord wrote to his tenant: "Dear Sir, I regret to inform you that my rent is much overdue. Will you please forward me a cheque?" Back came the reply: "Dear Sir, I see no reason why I should pay your rent. I can't pay my own."

wonderful macaroons!

THERE'S a recipe on every package of Rice Krispies that makes the best macaroons you ever tasted!

Rice Krispies is the new cereal that's making such a hit. Toasted rice—so crisp it crackles in milk or cream. Serve it for breakfast—and lunch or supper too. At grocers. Made by Kellogg in London, Ontario.

snap! crackle! pop!

CANADIAN RADIO STATIONS URGED BY LOCAL CLUB

Recommendations Will Be Made to Broadcasting Commission Next Week

Subsidization of Canadian broadcasting stations by the Dominion Government so that the quality of programming can be improved will be advocated by the Victoria Radio Club to the Royal Commission on Radio Broadcasting when it sits in Victoria next week.

Suggestions on how a chain of Government-sponsored stations should be operated are contained in a memorandum approved by the club at a well-attended meeting last night. Licensing of radio and a better system of inspection to prevent interference are also dealt with in the memorandum, which reads as follows: "We, the Victoria Radio Club Inc., in response to a letter received from the Royal Commission on Radio Broadcasting, have embodied the following suggestions for the betterment of Canadian broadcasting, after securing the approval of a public meeting and incorporating the suggestions made at that meeting.

IS UNSATISFACTORY

"First, we are resolved that radio conditions in Western Canada are unsatisfactory in the respect that, owing to lack of quality in Canadian stations, we are forced to listen to United States programmes.

"Conditions can only be bettered by having operation of Canadian stations subsidized by the Dominion Government.

"Since the United States has monopolized the wavelengths, leaving only six clear and six shared channels for Canada, the only solution is to have a chain of six super-power stations operating on the six clear channels with a minimum power of 50,000 watts. We suggest taking over the Canadian National Railway stations, as they now hold the clear wavelengths. These stations should operate individually and in chain.

"The six shared channels should be distributed among the low-power broadcasters. The broadcasters should have the use of the key stations on a pro rata basis when the latter are not on their own programmes. This would allow each part of Canada to be advertised, especially by such organizations as the Chamber of Commerce. Federal aid is recommended for small stations which broadcast school educational programmes approved by the Provincial Department of Education.

WOULD BAR POLITICS

"Each section of the country should be fairly represented on the national entertainment programme. This could be arranged by having a central directing body made up of representatives from the various provinces. Politics should be prohibited on the chain broadcast except by party leaders at a national election.

SHOULD REPORT SALES

"The present system of licensing should be remodelled. The present discount system should be abolished and all dealers should supply a license at the customer's cost with every set, and report all sales to the Government. Customs houses should report all importations of radio equipment. Any person selling a radio shall report the sale of such, and a license must go with the set. Further, that it be made an offence, punishable by law, to sell a set without reporting the sale.

"All licenses shall fall due on April 1 and anyone not having a license by May 1 shall be liable to a fine of not less than \$25 or confiscation of set.

"Licenses for crystal sets without amplification be issued free.

"Licenses for sets having at least one stage of controlled radio frequency, be \$2.50 a year.

"The use of oscillating sets on the broadcast band be prohibited, and any such set, if found, to be confiscated if not remedied. An experimenter breaking this rule shall have his license cancelled for the balance of its validity.

INSPECTION URGED

"An adequate system of inspection be put in force for tracing interference. This should include a separate department for night work, since most of the trouble occurs at night, and it is unfair to call on a man who has been working all day and expect him to hunt trouble at night as well. Also all inspectors to have more power to act than they now hold.

"The manufacture, importation, sale and use of vibrating chargers be prohibited. All electronic apparatus, where possible, be equipped with proper filter circuits for eliminating interference, and that a penalty be fixed for violation of this.

"Lastly, that all radio broadcasting stations be at least ten miles outside the city."

Exhaustive Experiments Result in Improved Cord For Late Model

Greater Acceleration, Speed and Better Braking Make Change Necessary

Ford Co. April 13.—One of the many problems in designing the Model "A" Ford, and by no means the least difficult to solve, was the necessity for a totally new kind of tire to match the car's advanced performance. It was found from every aspect a different kind of problem for the designing engineers to tackle. The new tire was for a car with greater acceleration, greater speed and more braking efficiency than any other car of similar size and weight.

The first consideration was to prevent the problem of the leading tire manufacturers—who embraced the ac-

uation as a test of their knowledge and ingenuity. Accordingly, the designers of the Ford Model "A" joined hands with expert tire manufacturers in exhaustive tire experimentation lasting many months.

As a result of these experiments certain definite specifications were developed for a special new kind of tire. These specifications called for cord of a pre-determined strength and texture, a greater area of tread and a considerably larger volume of side wall rubber, a sturdy non-skid design with reinforced plies for protection against bruise breaks—all the strong points of construction formerly considered only

in the manufacture of the largest tires.

SPECIAL DESIGN

From these specifications had to be evolved the best kind of tire to be used in conjunction with the very sensitive combination of transverse springs and hydraulic shock absorbers. The new Ford tire, though measuring nominally 30x4.50, actually offers the resiliency and air space of a considerably larger tire. This result is effected through the new method of construction and the special design which the Ford drop-centre steel-spoke wheel makes possible.

The special Ford tire further ex-

plifies the fetish of balance, which is essentially a characteristic of the Ford car; in the tire wall a red spot has been inserted to denote the point at which the valve stem must be placed when inserting the inner tube. When assembled the wheel and tire make a perfectly balanced unit. This new method insures a uniformly high standard of tire performance at all speeds.

NEEDS CARE

The Ford tire requires precisely the same care and attention that all tires require but so few actually receive. It has been designed to take an air pressure of thirty-five pounds, and this pressure must be maintained if

the car owner is to receive the service the tire has been designed to give. Under-inflated tires become creased and the walls ruined. Generation of heat destroys the rubber insulation and allows the disintegration of the cords. For the further protection of the Ford Motor Company of Canada recommends that front wheels be checked for correct alignment after 5,000 miles, or when the front wheels are due to be filled with grease. In the event of punctures this type of tire is remarkably easy to remove from the wheel.

ARION CLUB TO HOLD CONCERT

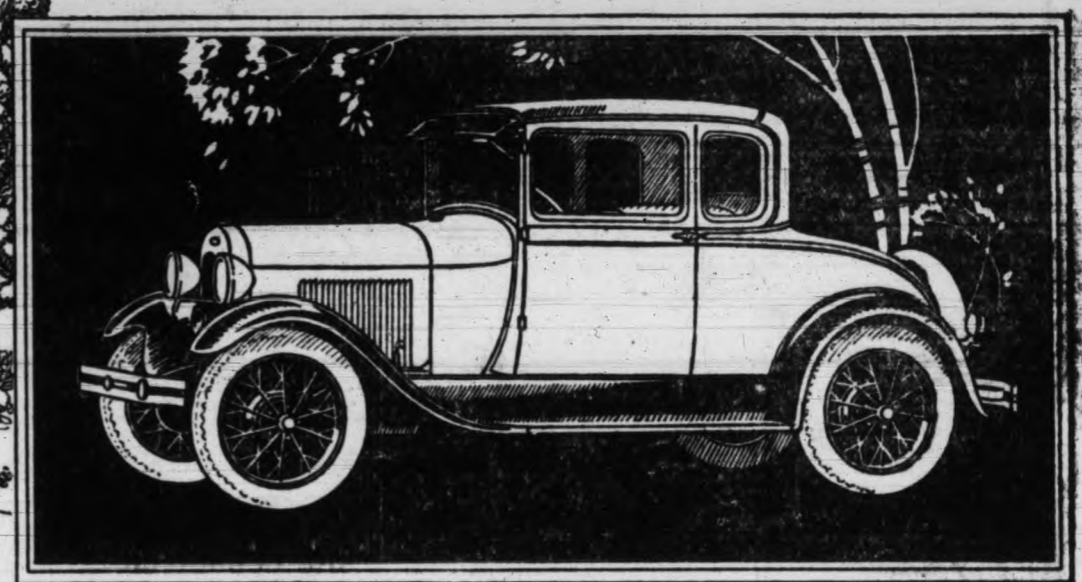

Second Recital of Season at Royal Victoria April 26

The Arion Club of this city will hold their second concert of the thirty-seventh season on the evening of Friday, April 26, at the Royal Victoria Theatre. The singers, now numbering sixty, have been faithfully and dili-

gently rehearsing for sometime, under the conductorship of Herbert Kent, and a well-balanced programme has been prepared. Associate members will have their tickets mailed to them in due time, and crowded theatre will no doubt welcome this event in the musical life of the city.

TRAFFIC ON "800" CANALS

Although the Sault Ste. Marie canals (Canadian and United States locks) opened almost three weeks later than in 1927 and closed two days earlier, the total traffic in 1928 was 80,993,124 tons, an increase over last year of 3,640,084 tons.

Alert and Powerful

SUPERB action both in traffic and on the open road has won world wide demand for the Ford Car. This great performance together with remarkable beauty of line and colour makes every owner of a Ford Car its enthusiastic champion. A short turn behind the wheel will explain such staunch pride of ownership.

Ask your Ford dealer to let you drive a Ford Car. He will be glad to take you out. Select the steepest hills, the heaviest going—you will be amazed at the power at your command. Make for the thickest traffic. Drive alongside other cars. Try the quick getaway, the swift pickup in second, the easy gearshift. Feel the smooth, sure action of the six brake system. A demonstration will convince you of the outstanding merit of the Ford Car. Drive it yourself, there is no better test.

ENDURING QUALITY—Power; ability to endure sustained high speeds; smooth operation of the remarkable Ford engine; quietness of the transmission and rear axle; ease and certainty of control; braking efficiency; acceleration and riding comfort—these are the result of quality inbuilt throughout the Ford Car.

RIDING EASE—The unique Ford Car feature of transverse, semi-elliptic springs has much to do with its road tenacity, reducing the

effect of body sway on rounding turns. Torque tube drive, an original Ford feature now adopted by a number of the more expensive motor cars, relieves the springs of all driving strain. Four Houdaille hydraulic shock absorbers cushion road shocks and provide smooth riding even on rough stretches.

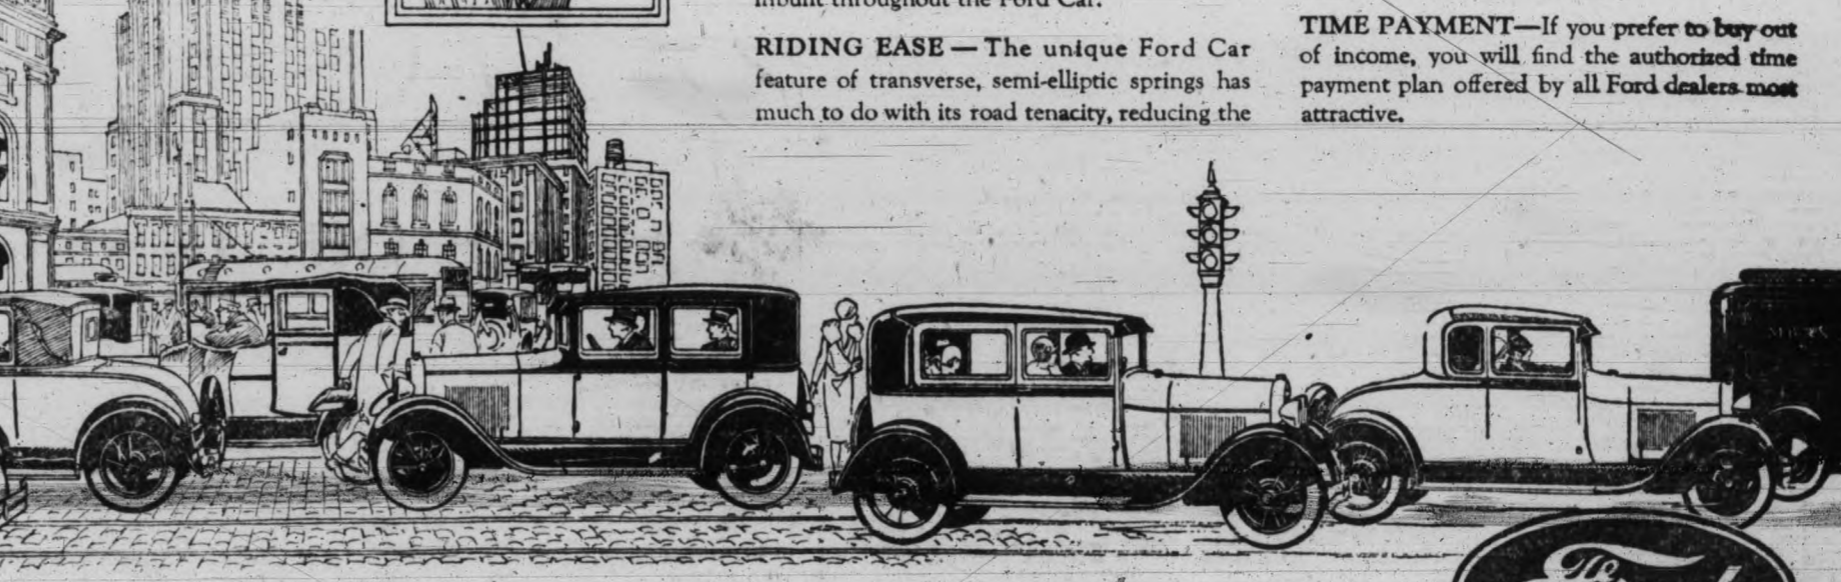

TIME PAYMENT—If you prefer to buy out of income, you will find the authorized time payment plan offered by all Ford dealers most attractive.

Drive it Yourself—there is no Better Test

Ford Car Features

- Choice of colours
- 55 to 65 miles an hour
- 40-horse power engine
- Full balloon tires
- Fully enclosed six-brake system
- 4 Houdaille hydraulic shock absorbers
- 20 to 30 miles per gallon of gasoline
- Shatterproof glass windshield
- Theft proof ignition lock
- Reliability and low upkeep

This illustration shows the convenient location of the wedge that adjusts the brake shoes on the Ford car.

Your Baby and Mine

By MYRTLE MEYER ELDRED

USE OF CARRIAGE HELPFUL
DURING ILLNESS

Mrs. M. J. W. writes: "It has been
nearly a year since I wrote you last,
but I haven't missed your department
once. My two-year-old girl recently
had the measles. I thought perhaps
my experience might be helpful to
others. Doctors and all books say,
'Keep the child in bed.' All mothers
know how hard this is when the child
is on the mend and doesn't feel like
it. I discovered that our little girl was
much happier in her buggy and it
was much easier to take care of her.
When she got lonesome I could push
her into the room in which I was
working. She felt safe many times,
watching me, and she rested com-
fortably—one reason I'm glad I pur-
chased a 'large-sized' carriage. She
wasn't dressed for several days and I
kept the room warm and the blinds
lowered, and she has recovered beau-
tifully. I think it too bad when a
mother discards the carriage too soon.
This winter it was so much easier to
keep her warm in it than in her
stroller."

"As she convalesced she amused her-
self by putting crackers in pint milk
bottles, also hairpins in small dishes.
These were simple things for her to
do and didn't tire her. She would sit
at the table and watch the canary
in his cage."

"Your advice on feeding is simply
wonderful. If it hadn't been for you,
I imagine Jean would not be eating
anything and would probably still be
on the bottle. I give her her meals
a few minutes before we eat and simply
ignore her. And how good it sounds
to hear her ask for 'more' of some-
thing. I used to watch her and tease
her to eat this and that until she
got to the place where she refused
everything but her bottle and orange
juice. Then I heeded your advice."

"Just a word about cereals. Jean
never cared for them until I began
putting dates and raisins in them.
She won't eat them plain. Does it
matter a lot, Mrs. Eldred? About twice
a week I give her ready-cooked cereal.
She loves it. Jean is a dear, good little
girl. Sleeps from 8 o'clock at night
to 7 in the morning and is now at
the stage when she wants to help me
with everything. Some day I hope
to send you a snapshot of her."

ANSWER
It is quite right to make food as
attractive as you can to a child. We
all have d'vices for this or that, and
some day she may surprise you by de-
manding the cereal plain. Meanwhile
the dates and raisins are fine addi-
tions to it. I am so happy that the
advice to ignore the child at the table
has worked so well. It usually does if
mothers don't weaken.

MOTHERS And THEIR CHILDREN

CONFINE PLAY SUITS
One Mother Says:
My boy received as gifts at different
times an Indian suit, aviator's suit and
cowboy outfit. His little sister won-
dered why she had no such splendid
"uniforms." Now as her play suits wear
out, I am replacing them with little
costumes which though they cost no
more than ordinary dresses, are a con-
stant source of pleasure to her.

The first one I made, and it is
still her favorite—is a nurse's uniform,
consisting of a blue dress, a long white
bib apron, and a red cross cap. This
was followed by a Scotch kilt made from
a pattern loaned by a Scotch neighbor.
Next came a clown suit. We are plan-
ning others. Sister no longer feels left
out.

(Copyright, 1929, Associated Press)

Mooseheart Legion—Women of
Mooseheart Legion, Victoria Chapter,
No. 22, will give a social court whist
drive at the home of Mrs. Hatcher,
Armstrong, Bay Street, on Wednesday,
April 17, commencing at 8 o'clock.
Good prizes and refreshments will be
provided.

Canadian Daughters—The Canadian
Daughters' League will hold their
regular social meeting next Tuesday
evening in the Native Sons' of Canada
Hall. The fourth birthday group will
have charge of the programme, and an
interesting time is assured.

Bedding Week

Featuring HBC Values in Beds, Springs and Mattresses

This Three-piece Outfit Complete

Continuous Post Steel Bed
in walnut or ivory finish
with double-woven wire
spring and an all-felt mat-
tress. Price, complete

19.75

Simmons Square Tube Beds
In two-tone walnut continuous
post design with wide centre panel
and square tube fillers.
Full size only \$18.95

Simmons "Grace-line" Beds
Full panel head and power style foot
with bow bottom rail finished in for-
est grain walnut hand-painted de-
coration.
Price \$40.00

All-felt Mattress
Filled with good quality cotton felt
covered in fancy art
ticking \$7.75

Heavy Cotton Felt Mattress
Filled with all white cotton, felted in
layers, guaranteed not to jump.
Stitched roll edges \$14.75

"Seal of Quality" Mattresses
Superior quality white cotton felt of
the best quality covered with high-
grade art sateen
ticking \$16.75

Simmons Steel Cribs
Size 24x48 inches, white enamel fin-
ish with link fabric spring and let-
down sides \$8.50

Ivory Enamel or Walnut Finish Crib
Continuous post style with "grace-
line" tubing. Link fabric spring and
let-down sides \$12.50

Large Wooden Cribs
Size 27x52 inches, finished in ivory
enamel, let-down side
and link fabric spring. \$12.50

Crib Mattresses
Roll-up style with pillow edge and
corded felt filling.
All stock sizes \$3.25

Bedding Week Specials in the Staple Section

Snow-white Bleached Pillow Cases
These Pillow Cases are of a fine even
texture, linen finished with neat
hemmed ends. Hard wear ensured.
Width 44 inches. Special at, per
pair \$7.50

Unbleached Sheet
One of our best qualities, being of a
fine even texture and good weight.
Four different widths as follows:
63 inches, at, per yard 49¢
72 inches, at, per yard 55¢
80 inches, at, per yard 65¢
90 inches, at, per yard 75¢

Felt-with-straw Finds Clever Expression
In "Nona," the Newest Adjustable

Jauntie

With all the air of a far more expensive creation—subtly moulded to head—gracefully brimmed—with a straw band to be drawn to perfect fit—this is the new Jauntie Hat—an intricate interlacing of two-tone straw adds verve to its soft crown.

Price 8.95

Fur Repairs

If your fur coat or necklace needs repairing or altering you should come in and get the advice of our Mr. E. F. Ford, now in charge of our Fur Department. Mr. Ford brings to our customers the skill in fitting and cutting that only many years of experience throughout Canada and United States can give.

New Linings Have Arrived

They offer the newest shades and designs in figured brokettes and crep. silk and can be put into your coat at a very small charge. Repairs and alterations will be executed at special Summer rates.

Fur Storage

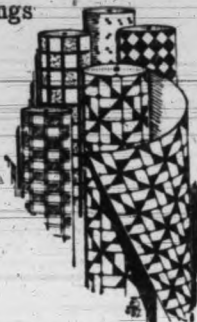

Have your furs, your heavy winter coats and other valuable garments placed in our cold air storage vaults, the only one of its kind in Victoria. It is now in the course of being greatly enlarged.

Linoleum Week

Rich Oriental Designs of Rare Beauty and Color

Baristan Rugs are exquisite reproductions of rare old Oriental de-
signs possessing all that quiet splendor of rich Eastern coloring—all
that lustrous sheen and bloom. They are seamless, with a thick
heavy pile, and while wondrously soft underfoot they combine
durability with beauty.

First Showing of Baristan Rugs in Victoria

Baristan Rugs are the exclusive creation of the Toronto Car-
pet Manufacturing Company, manufacturers of the widely
celebrated Barrymore rugs. We have them in the following
popular sizes:

43x66 \$53.00 56x83 \$89.00 82x116 \$179.50

—Third Floor, HBC

Special Sale of English Open Stock Dinnerware

An open stock pattern is the most economical to buy, for if your
should happen to break a piece you can replace it at once. For the
next few days we are offering at special prices the following:

PROPERTY FOR SALE
 GORDON HEAD

A CHANCE FOR IMMEDIATE PROFIT
 GOOSEBERRIES AND BLACK CURRANTS are more reliable producers with less trouble than most of the usual fruits. We have 8 1/2 acres, close to Victoria, the greater part planted with 4,000 of these bushes in full bearing. A purchaser now will have this season's crop profits to give him a dividend at once, helping materially with the purchase price.

PRICE \$4,500 CASH OR \$5,000 HALF CASH
 In this growing district the acreage alone is worth more than the price asked. A buyer is advised to act quickly.

BRITISH M.P.'S GATHERING FOR BRIEF SESSION

(Continued from page 1)

marked for the rating relief suspense account. But what secrets will it also reveal—development of Rhoire trade, a permanent scheme for meeting unemployment, widened plans for Empire migration?

EMPLOYMENT PROBLEM

It may be taken for granted, however, that unemployment will be a dominant if not the main issue at the polls. The workless army remains an army even if it is diminished in numbers. Its drag continues both on the national exchequer and on the local authorities.

Both the Lloyd George scheme and the Government's derating scheme aim at the problem of the unemployed. Mr. Lloyd George pledges the work put in hand under the Liberal scheme would "reduce the terrific figures of the workless in the course of a single year to normal proportions."

The basis of his pledge is construction and improvement of roads. He would complete the national system of trunk roads. He estimates that every million pounds sterling expended on roads would mean the employment of 5,000 men directly or indirectly.

TAX RELIEF PLAN

The Government's derating scheme, which has already passed both Houses of Parliament, aims at the development of industry by relieving it largely of its load of rates or local taxation.

The derating scheme proposes: (1)—to relieve agricultural lands and holdings of the whole of the rates (local taxes) now levied upon them and (2) to relieve productive industry of three-quarters of the rates.

The rates thus removed are estimated to yield \$120,000,000 a year to the local authorities. They will be recouped from the national exchequer figures issued from Conservative headquarters estimate that in the iron, steel trades alone the burden of rates took \$1,500,000 out of productive industry in 1926-27.

POLLING MAY 30
 London, April 13—Premier Baldwin today announced the general election is expected to take place early in May 30.

NEWS IN BRIEF

Ward Four Liberals, of Nanich, will meet at Morigold Hall on Monday at 8 p.m. when Francis Simpson will speak on "Canada's Part in the League of Nations."

J. W. Hale has been awarded contracts for two modern stucco bungalows, one for Wm. Allen, Colville Road, and another for C. S. M. Gregor, Thistle Road.

The annual meeting of the Victoria Subdivision of the Catholic Women's League will be held on Tuesday evening at the K. of G. Hall, Government Street. A full attendance of members is invited.

A charge of vagrancy against Reid Johnson was withdrawn in city police court this morning by City Prosecutor C. L. Harrison, who explained the accused had been taken in charge by the immigration authorities.

There will be a silver tea, sale of home-made plain sewing and fancy work on Tuesday afternoon, April 17, at 3 o'clock in the local hall of the Victoria West United Church, under the auspices of the Ladies' Aid.

A special joint meeting of the Girl Guide and Boy Scout Associations will be held on Monday at 8.30 at the headquarters, Langley Street, when reports will be presented concerning the forthcoming dance at the Amphion Hall on April 19.

Elias Hughes, who pleaded guilty to a charge of being intoxicated in a public place, was fined \$50, or in default of payment ten days imprisonment, by Magistrate George Jay in city police court this morning. It was the second conviction against the accused.

The question of providing parking areas on municipal owned land adjacent to the business districts is being studied by the city. It is announced a large area behind the City Market and other vacant ground is being looked at with this in mind. No report has yet been made to the council on the plan.

Prizewinners at the card party held under the auspices of the Esquimalt Women's Institute at the Parish Hall on Thursday evening were: First Mrs. R. Ricketts and Mrs. R. Dent; second, Mrs. D. McLean, Mrs. Grimes; third, Mrs. A. Stewart and Billy Rogers; special Mrs. R. Douglas and Peter Moore.

The City Council will be without the genial assistance of Alderman James Adam on Monday evening, as the chairman of the reception committee is leaving tonight for an extended holiday trip in Southern California. Alderman Adam will take civic greetings to the mayors of San Francisco and Los Angeles, he stated at the City Hall today.

Philian Sisters Island Temple No. 8, held its regular meeting on Thursday with M.E.C. Mrs. White in the chair. Arrangements were made for the twenty-third anniversary of the party, to be held on April 25. There will be a good programme and a banquet for this event. It is hoped there will be a large attendance of present and past members.

Gradual progress in the Greater Victoria movement was reported at a meeting of the committee in the Chamber of Commerce yesterday when reports from the various municipal councils in regard to appointment of delegates to the body were filed. It was decided to hold the next meeting on Thursday, April 18, in the chamber committee room.

Keen interest which has been shown in the closing days of the idea contest for the May 24 celebration has led to an extension of time for accepting suggestions to Monday, 5 o'clock. Twenty-five dollars will be divided among the competitors. From those received we already have a number of valuable ideas which will help us in planning the Victoria Day celebration. Harold Palmer, secretary, stated.

A musical programme to be followed by a dance will form the programme to be held under the auspices of the Royal Society of St. George on Tuesday next in Amphion Hall, Yates Street. The concert will commence at 8 o'clock following which refreshments will be served. The dance will proceed at 10 p.m. Card games will be provided. Tickets for the St. George's Day banquet to be held on Tuesday, April 23, may be secured at this meeting.

The required number of herds having been obtained to form a Cow-Testing (Milk Record) Association on the southern part of Vancouver Island, a meeting is to be held on Tuesday next at 3.30 p.m. in the office of the Dairy Branch, Parliament Buildings (front entrance). During the meeting by-laws, election officers and discuss the work of the association. All those interested are asked to attend this important meeting.

On the inaugural trip of the Princess Norah, when their Excellencies, the Governor-General and Lady Willington were making a tour of the West Coast ports, accompanied by His Honor the Lieutenant-Governor and Miss Macdonald, a collection was taken up for purchase and equip a cot at the Queen Alexandra Hospital for the children of seamen, to be known as the "Princess Norah Cot." The sum raised was \$67. The captain and crew hope, during the tourist season, to be able to make up the sum necessary to endow the cot for a year.

The number of primary ballots received at the Chamber of Commerce in the last few days points to a representative vote of the membership for the election of directors. The last day for receiving ballots is Monday, five o'clock. On the primary ballot members may name twelve members for the directorate. From those named the highest twenty-four will be placed on the next ballot and directors will be selected from these returns. The highest nine will be elected for a two-year term. The next three will sit for one year.

The auditorium of the Oaklands School was filled to capacity on Monday evening for the regular meeting of the Parent-Teacher Association. At the close of the business two of the school choirs gave their test pieces for the Musical Festival in a very pleasing manner. Frank McFarley delighted the audience with his slight but effective dance, which was cleverly executed by little Miss Frances McFarley. The five hundred card party, held by the Parent-Teacher Association on Wednesday evening, was quite a success. The prize winners were as follows: Ladies, first, half cord wood; second, consolation, Mrs. H. Bosson. The cord of wood was kindly donated by W. D. Todd.

BUILDING IN CITY HOLDS STEADY GAIN

Permits For Week Total \$225,220, With \$2,827,610 For First Quarter

Forty New Homes and Much Business Type Construction Is Listed

Building permits issued at the City Hall for the week ending today authorized new construction valued at \$225,220, for twenty-three permits. It was stated by James Barf, city building inspector, today. The Jubilee Nurses Home, \$156,000; additions at the Phoenix Brewery, \$20,000; the Shrine Temple, \$20,000; and incidental alterations to business premises bulked largely in the total.

Permits issued from January 1 to April 12 total \$70, or in excess of \$1,000,000 over the building figures for the entire twelve months of last year.

The new wing of the Empress Hotel, at \$2,000,000, with incidental alterations in the main building, accounted for much of the difference. Excluding the Empire Hotel, building figures for the first quarter of this year were \$827,610, as compared with \$307,931 in the same period last year. Some 200 new dwellings are included in the totals for the first of the year.

OBITUARY

The remains of Frederick George Lynde were laid to rest in Ross Bay Cemetery yesterday afternoon, the funeral taking place from Hayward's R.C. Funeral Chapel, Rev. W. A. Guy officiating at the chapel and Rev. Mr. Cropper at the grave. The hymns sung were "For Ever With The Lord" and "Abide With Me." Many friends were present and numerous beautiful floral tributes were received. The following acted as pallbearers: Messrs W. D. Kennedy, G. Cordner, W. E. Bell, C. Hudson, D. C. Robertson and W. G. Agar.

The funeral of Oscar M. Mickleton, who passed away on April 8, took place yesterday afternoon from the St. James Funeral Chapel, Rev. P. A. P. Chadwick officiated. Relatives and friends were in attendance, and the pallbearers were Messrs. W. Hall, A. M. Huber, W. Hopper and H. Stanley, and the remains were laid to rest in the Royal Oak Burial Park.

Daniel Morrell Ford a veteran of the Great War, passed away this morning at 11 o'clock at 471 Constance Avenue, Esquimalt. The late Mr. Ford was born in Greenock, Scotland, and went overseas with the Canadian Engineers. The remains are resting at McCall Bros. Funeral Chapel and funeral announcements will be made later.

Head of Confucian University Here

Promulgator of the teachings of Confucius, Dr. Chen Huan-Chang, president of the Confucian University of Peking and head of the National Confucian Association of China, is at the Empress Hotel today.

Dr. Huan-Chang reached Victoria yesterday afternoon from Vancouver after making a tour of Canada and the United States and plans to see something of Vancouver Island before leaving next week for China via San Francisco.

During his recent visit to Europe, Dr. Huan-Chang addressed a gathering of university leaders at Geneva, and spoke on world peace while in Paris.

Universal peace was the goal of Confucius, said Dr. Huan-Chang following his arrival here.

The promulgator of the teachings of the great philosopher the National Confucian Association was founded in China in 1912 by the Nanking government. The association has branches in various parts of the world.

This, in the opinion of Dr. Huan-Chang, is a great loss, not only to China, but to the whole world.

TEACHER WEDS PUPIL OF 16

Miss Marie Jones, twenty-one, school teacher at Arden, Texas, recently wedded Sam Ault, sixteen, one of her pupils. She is still teaching, but young Ault has quit books to take a job on a ranch.

LEAGUE WILL HEAR LEADER

David Hunter Miller Will Address Victoria Branch of League of Nations

The League of Nations Society's annual meeting will be held in Memorial Hall on Monday at 8 o'clock. David Hunter Miller, one of the outstanding men who drew up the Covenant and took an active part in its formation, will tell of his experiences. In connection with the League, Mr. Miller's notable services are alluded to in Winston Churchill's new book "After Mr. Miller's address the annual meeting will be held in the League of Nations Day will be observed April 16 from coast to coast.

SEATTLE SINGER GIVES RECITAL

Mrs. George T. Warren Heard at Metropolitan Church Last Night

Mrs. George T. Warren, Seattle mezzo contralto, sang before an appreciative audience at the Metropolitan United Church last night. Throughout her varied programme she displayed a fine technique, easy stage presence and wealth of tone quality.

One of the outstanding numbers on the programme was her rendition of "The Cycle of Life." Opening with the prelude, "Life," the artist continued through the four parts, "Spring," "Summer," "Autumn" and "Winter," with flawless voice, and gave a fine interpretation of the artistic theme.

Another feature was the piece "Dost Thou Know That Fair Land?" from "Entrance" by Rudyard Kipling, William's Minister of the State of Patiala, said in an address before the Vancouver Canadian Club yesterday.

OIL DRILLING TO BE REGULATED

New York, April 13.—As a means of curbing the waste that threatens "The Cycle of Life," the Federal Oil Conservation Board has taken steps to regulate drilling through the formation of interstate compacts, to which the Federal Government through Congressional action would be a party.

This was revealed by Secretary of the Interior Wilbur in a letter to the American Petroleum Institute.

CANADIAN CLUB INVITES TAGORE TO SPEAK HERE

Hopes to Hear Noted Hindu Philosopher at Luncheon Next Week

Kiwianians to Hear District Governor; Mr. Justice Murphy to Speak to Gyro Club

Through Professor Chanda, last week's speaker at the Canadian Club luncheon, the Canadian Club has extended an invitation to Sir Rabindranath Tagore, Indian philosopher and poet, to address its members at a luncheon next week. Since Dr. Tagore is anxious to meet as many people as possible during his stay in Canada, Frank Sehl, secretary of the Canadian Club, says that there is a possibility the poet may give an address. Unfortunately he has been ill owing to the weather in Vancouver.

"MONEY AND WEALTH" An interesting address is expected when J. C. Newmarch, manager of the North Victoria branch of the Canadian Bank of Commerce speaks to the Knights of the Round table on "Money and Wealth" in the private dining-room of the Empress Hotel on Tuesday evening.

To illustrate some points of his lecture, Mr. Newmarch has secured a collection of rare coins.

The Gyro Club will hear Hon. Justice Murphy speak at their luncheon in the Chamber of Commerce on Monday. The programme is in the hands of the legal group and an instructive and entertaining meeting is expected.

DISCUS MAY 24 PLANS Plans for the May 24 entertainment will be discussed at the Kuntakus supper meeting in the Y.W.C.A. on Monday evening. Preceding the business session the club will dine at 6.15 o'clock.

Harry Gorman, district governor of the Kiwanis Pacific Northwest district, will be the speaker at the Kiwanis Club's luncheon in the Empress Hotel on Tuesday at 12.10 p.m. Miss Edna Moore, field representative of the Canadian Tuberculosis Association of Ottawa, will also attend the meeting. Musical selections will be rendered by the Kiwanis Club orchestra.

On Wednesday evening the Victoria Group T.O.C. will hold an informal meeting in the clubrooms, 521 Bastion Street. The meeting will commence at 8 o'clock.

The local T.O.C. group has recently received a gift of \$250 to be used in furnishing their rooms. The donation was given in memory of F. C. Holland, first chairman and pilot of the Victoria group.

The Rotary Club luncheon programme is still being arranged. The club will meet as usual in the Empress Hotel on Thursday at 12.10 p.m.

Patiala Minister Is Speaker In Vancouver

Vancouver, April 13.—The greatest and most powerful factor between India and the British Empire is the influence of the Indian princes," Prof. Lawrence P. Russell, William's Minister of the State of Patiala, said in an address before the Vancouver Canadian Club yesterday.

"The Indian princes and the territories they represent not only have a tremendous reserve of fighting men, but they also have virgin, unexplored natural resources," Prof. Williams said.

"The princes are moving with the times," he continued, "and while endeavoring to maintain undamaged the British connections, they are also moving towards the development of their states and the association of their people with public affairs.

The result is that the influence of the native states will increase rather than diminish, and all those who are interested in Indian questions will do well to remember, when they read of troubles in India, that there is a strong section of Indian which is never vexed by revolution, but remains as the tie between India and the British Commonwealth. The continued connection of India with the Empire is one of the best guarantees for the peace of the world for it links the East with the West."

AERO BUSINESS SHOWS BIG BOOM

Los Angeles, April 13.—The Fokker Aircraft Corporation of America has delivered to L. P. Fisher of Fisher Bros., Detroit, a \$100,000 de luxe, fourteen-passenger plane ordered some time ago.

It is also announced that the first airplane for taking sound movies has been built by Fokker and delivered to the Fox Film last week.

New York, April 13.—Wright Aeroplane is reported to have nearly \$12,000,000 in unfilled orders on its books. The gross business for Wright for the first quarter of 1929 of about \$3,000,000 is the largest for any quarter in the company's history.

Famous Churches of the World

ROSKILDE CATHEDRAL, DENMARK

From the tenth to the fifteenth century Roskilde was the residence of the Danish kings, the see of the first bishop of the land, and the capital as well as the most important city in the country. To-day, however, the cathedral is all that is left of the past glory of the little town on the island of Zealand; and its pair of steeples forms with its red brick bulk a conspicuous object for many miles over the flat area of this part of Denmark. The first church erected on the site was that built by King Harold Blaatand. It was of wood and remained for about a hundred years until it was replaced in the eleventh century by a limestone structure erected by Bishop Svend Nordbange and King Knud. It was in this limestone church that King Sweyn II caused to be murdered a group of his guests at mass at the time, and it was here that he was refused admission on the following day by the Bishop.

Some time later King Sweyn II repented and received pardon, upon which he caused the establishment of an endowment for Roskilde. This sum plus a large amount granted by Canute the Great, assisted materially in building the present cathedral, which was erected on the site of the limestone structure, construction being commenced early in the thirteenth century. It was originally a simple structure of brick and stone, embracing

an aisle and nave, transepts, and apsidal choir with aisles continued round it but no chapels. But the church assumed additional features during the next four centuries, the present ground plan assumed shape between 1300 and 1772. Bishop Oluf made extensive changes and additions in 1310, and added the Lady Chapel in the same year; another chapel in honor of St. Lawrence, was dedicated by Bishop Nels in 1384. Twenty years later Bishop Peder Jensen dedicated the Chapel of St. Sigrid in the base of its northern tower; in 1411 Queen Margaret founded the Bethlehem Chapel in the southern tower, and nine years later the present fine double row of choir stalls was erected as a memorial to Bishop Jens Andersen.

Roskilde is sometimes called the Westminister of Denmark because of the many royal tombs which it has guarded during the centuries of its existence. It contains the coffins of many of Denmark's kings and their families, among them the following: Duke Christopher (1326); Queen Margaret (1412); King Christian IV (1648); his Queen, Catherine (1612); and their eldest son (1670); Frederick III (1670) and his consort, Sophia Amalia (1685); King Christian V (1699); Queen Charlotte Amalia (1714); King Frederick VII (1730); his Queen, Ann Sophia, and three children; and all the Danish Kings from Frederick V (1746) to King Christian IX (1906).

Tell Me a Story

There was once a tiny kid whose growing horns made him think that he was a grown-up Billy Goat and well able to care for himself. And so when his mother called him to go home one evening he kept right on playing and paid no attention to her. After a while while he looked up and discovered that he was all alone and it was getting dark.

The dark shadows frightened the little kid, reminding him of the terrible Wolf. Bleating in fear he started running home to his mother.

But he had not run half the way before he came upon the dreaded Wolf. Now the kid knew that there was very little hope for him.

"Oh, please, Mr. Wolf," he begged, "I know you are going to eat me up but won't you first pipe me a tune so I can dance?"

The Wolf liked the idea of a little music before his feast, so he struck up a tune and the little kid danced. Meanwhile the shepherd's dogs heard and recognized the tune. They came running to the little kid's rescue and the old Wolf had to drop his pipe and flee for his life.

Do not let anything turn you from your purpose.

HALF MINUTE SERMONS

? QUESTIONS ?

About the Life of Christ

- 1-What reference did Christ make to the woman who lost a piece of silver?
 - 2-What did He mean to illustrate?
 - 3-What took place when Christ was eating in the house of Matthew?
 - 4-What remark did the Pharisees make regarding the event?
 - 5-How did Christ answer?
 - 6-What was the incident of the Withered Hand?
 - 7-Why was it important?
 - 8-What did the Pharisees do?
 - 9-What was the nature of the Sabbath according to Jewish interpretations?
 - 10-Who were the strictest Sabbath-keepers of the time?
- The answers to these questions will be found below. How many can you answer?
- 1-The woman who had lost a piece of silver, lost one and found it, would celebrate the event.
 - 2-That even a single stater, many publicans and sinners, will sit down with the disciples.
 - 3-Why eateth the Master with publicans and sinners?
 - 4-They that be whole need not a physician, but they that are sick.
 - 5-Christ cured the lame hand of a stone-cutter.
 - 6-It took place on the Sabbath day.
 - 7-They criticized the act because it

TAGORE'S POESY DEAN LECTURES ON MYSTICISM TO TRED MIND

Mystic Lacks Remedy For Problems Portrayed; Protests Dr. Clem Davies

City Temple Pastor Will Suggest Way Around Difficulties To-morrow Evening

Sir Rabindranath Tagore's lecture on "A Philosophy of Mysticism" was only a beautiful lyric of language, framed in a setting of majestic words, and had no practical message to Occidentals, according to the considered declaration of Dr. Clem Davies as his reaction to the Oriental seer's brilliant address at the Royal Victoria Theatre last week.

"While impressive in poetic poesy, the address was disappointing to tired minds seeking solution of problems emphasized by the Indian mystic. This lack of a sense of satisfaction is to be traced to the failure or omission of Tagore to offer any suggestion of relief or the condition he portrayed," says the City Temple pastor.

Dr. Davies is to attempt an appraisal of the problem in his address to-morrow evening, and will suggest some ways and means to overcome our difficulties under the subject, "The World's Need and Christianity's Response." The world does not need to gope for light, according to the Temple pastor, who will outline his message by a theme, "O That I Knew Where I Might Find Him."

Llewellyn Jones, Welsh tenor, will sing Mendelssohn's great composition, "O That I Knew Where I Might Find Him," and Jean Harrison Smith will render a soprano solo, "The Lord Is My Light" (Allison).

Some Little Things That Need Attention will be the morning pulpit theme, a popular sermon to youth. Under the direction of Lucy Bosward, Mus. Bac. M.E.M., The Temple Choir will sing "The Cherubim Song," and at the morning service Spohr's "Teach Me Thy Way."

Opinion regarding the new theory of the estimate Herr Einstein. And he said, "With many a wrinkle on his sweating brow and with a look of the greatest learning, he gave it for the creation of a mass of sadness of humor is woven into this picture of the eminent sausage-maker talking about a theory which only an exceptional mind, a mathematician, can understand. Yet it is not at all a rare spectacle, as those who read of interviews with the great well-known scientists, leagued tracts on science by theologians, theological studies by stock-brokers, pronouncements on molecular structure from politicians, international relations formulae from manufacturers and stock-market tips from everybody.

We seem to believe in the theory that because a man has amassed a million in his chosen field, or has achieved great success in the arts or sciences, he is therefore qualified to speak with the authority of a genius on all subjects and problems of the universe; and the theory is as full of holes as the sky is full of stars.

Let us thank our sausage manufacturer for his excellent and juicy wares, which undoubtedly have an important place in the natural order of things; and let us be grateful for the works of the other great ones who contribute so largely to our comfort and happiness, but let us also be a little sceptical when we listen to their advice on things of which they can know but little.

And should we perchance some day acquire the well-known bubble of fame or wealth, let us too observe that golden silence on subjects which are as strange to us as Einstein is to sausages.

The meetings arranged are as follows:

Wednesday, April 17, at 3 p.m., when Rev. J. B. Rowell will preside, and at 8 p.m., Rev. Daniel Walker presiding.

Thursday, April 18, at 3 p.m., when H. G. Portway presiding.

Friday at 7 p.m. there will be a young people's rally, when Mr. Cuthbertson will give a lantern lecture showing beautiful pictures on life in Japan.

The concluding meeting will be held at 8 p.m. on Friday.

A public meeting of the Mission Circle, under the direction of Mrs. Ireland, will be held at 2.30 in the church. One of the teachers at the Oriental Home will speak and some of the children from the Home will sing. The Young People are having a crokinole tourney on Monday evening at the home of Mrs. Quick.

Services to-morrow at St. Mary's Church, Oak Bay, will be: Holy Communion at 8 a.m., matins and sermon at 11 o'clock, evening song and sermon at 7 p.m. In the evening service will render the anthem, "Like as a Hart Desires the Waterbrook," by the recent Novello. The rector, Rev. A. E. L. Nunns, will preach at both services. The Sunday School meets as usual—the senior classes at 9.45 and the junior at 11 o'clock.

The Venerable F. C. C. Heathcote, Archdeacon of Vancouver, will preach at the morning and evening services in Christ Church Cathedral to-morrow.

There will be celebrations of the Holy Communion at 8 and 9.30 a.m., matins and sermon at 11; children's service at 3 p.m., and evening song and sermon at 7.30.

The Dean's tutorial class will meet on Thursday, April 18, at 3 p.m. Dean Quinlan will deliver a public lecture on "Some Elements of Mysticism" on Monday, April 22, at 8 p.m. in the Memorial Hall. Much local interest has been aroused in the question of mysticism by the visit and lecture of Sir Rabindranath Tagore. Not everyone knows what it is, nor the chief differences between the mysticism of India and that of Christianity. The lecturer will deal in an elementary way with these questions and also point out the dangers and the value of mysticism and the trustworthiness or otherwise of mystic experiences. The Dean of Columbia is paying a week-end visit to Cumberland Island, where he will lecture twice and preach twice.

PLAYGROUND OF LIFE IS THEME

Rev. J. P. Westman To Discuss "Leisure, Pleasure and Treasure"

At Centennial United Church, Gorge Road, Rev. J. P. Westman will preach to-morrow morning on "The Life of the Spirit With Its Crises and Vicissitudes, the Unwritten Law of God." The choir will sing "O Worship the Lord."

The evening subject will be, "The playground of life, or how to be happy all the time. Leisure—pleasure and treasure." The choir will sing the anthems, "The Radiant Morn" and "Comes the Sunday." The Sunday school meets at 2.30 o'clock, and will hold anniversary services on the first Sunday of May, when special addresses and programs will be presented.

Famed Healing Oregon Bishop To Speak Here

The Rev. T. E. Rowe, Warden of the Canadian Guild of Health, will address the members and friends of the Guild of Health on Tuesday evening, April 16, at 8 o'clock, in the Chapel of the Memorial Hall.

There will be another meeting on Friday evening, April 19, at 8 o'clock, in the Chapel, when the Guild will welcome Rev. William P. Remington, Bishop of Eastern Oregon.

Bishop Remington is an exponent of spiritual healing, and all who are interested in this work are invited to attend.

Christ Witness TO SPEAK ON IS Plan In All BIBLE USAGE Japanese Towns

Under the auspices of the International Japan Evangelistic Band, a special missionary convention, for the deepening of the spiritual life, will be held next week in the Missionary Alliance Tabernacle on Yates Street.

The speaker will be James Cuthbertson, field director of the Japan Evangelistic Band.

Beautiful Japanese lantern slides will be shown to illustrate the evening addresses.

The meetings arranged are as follows: Wednesday, April 17, at 3 p.m., when Rev. J. B. Rowell will preside, and at 8 p.m., Rev. Daniel Walker presiding.

Thursday, April 18, at 3 p.m., when H. G. Portway presiding.

Friday at 7 p.m. there will be a young people's rally, when Mr. Cuthbertson will give a lantern lecture showing beautiful pictures on life in Japan.

The concluding meeting will be held at 8 p.m. on Friday.

A public meeting of the Mission Circle, under the direction of Mrs. Ireland, will be held at 2.30 in the church. One of the teachers at the Oriental Home will speak and some of the children from the Home will sing. The Young People are having a crokinole tourney on Monday evening at the home of Mrs. Quick.

REV. DR. WILSON ON BUSYBODIES

"Peacemaker or Busybody" Morning Theme at First United Church

Two arresting themes will be discussed to-morrow at First United Church. At the morning service Rev. Dr. Wilson will take for his subject "Peacemaker or Busybody." This will be another address in the series on "The Happy Life," and something will be said on a neglected source of joy and satisfaction.

At the evening service Rev. Mr. Bompass will speak on "Pilgrimages and Sacred Places," an old subject as new as the latest excursion to a famous shrine, and full of human interest.

The choir will contribute special music at both services.

MANNA MIRACLE NOW CONFIRMED

Science Proves Israelites Found Food in Desert

Rev. F. A. Chadwick will preach at St. John's Church to-morrow morning on "The Miracle of the Manna." Interesting facts have been discovered regarding this mysterious food with which the Israelites were fed in the wilderness. Investigations carried out under the auspices of the University of Jerusalem show the nature of manna, and make even more impressive the ancient miracle, Mr. Chadwick says.

The theme for the evening service will be "The Risen Lord and Peter." This will be a continuation of an Easteride series dealing with the various appearances of the Saviour after His Resurrection.

The Sunday School will assemble in the schoolroom at 10.45, and after the marking of the class books, will meet in the guild room at 10 o'clock, adjourning in time for the morning service.

Answer Queries Upon Purgatory

"The Purgatory of the Papacy, or the Purgatory of the Bible" will be the subject discussed to-morrow evening at Central Baptist Church. Rev. J. B. Rowell, the pastor, will answer the following questions: "What is purgatory?" "Where are the different ways of getting out?" "What is the 'Sale of Indulgences'?" "What is an 'Indulgence'?" "Have the rich a better chance of getting out than the poor?"

In the morning the pastor will continue the series on the Epistle to the Hebrews, speaking on "Compassion on the Ignorant and Erring."

"TUNING-IN" IS PULPIT SUBJECT

Well-known phrases supply titles for the addresses at First Baptist Church to-morrow. The morning sermon will have for its title "Tuning-In," and in the evening sermon, "Buying on Margin." The morning service will begin at 11 o'clock, and Harold Beckwith will be the soloist.

There will be a song service at 7.15, preceding the regular evening service. The choir will sing "Hark! 'Tis the Watchman's Cry."

The morning service will be followed at noon by the regular church school. Rev. James Strachan, the minister, will preach at both services.

The Young People Society of the church will meet on Monday evening at 8 o'clock. The midweek meeting of the church will be held on Wednesday at 8 o'clock.

D. L. M'LAURIN SHOWS HOW MEN SELF DENIAL

"MOTHER INDIA" Normal School Principal Will Soeak at Emmanuel Church On Monday Evening

A public meeting, under the auspices of the Women's Mission Circle of Emmanuel Baptist Church, will be held on Monday evening at 8 o'clock in the schoolroom, Gladstone Avenue, when D. L. MacLaurin, principal of the Provincial Normal School, will give an address on the much criticized book, "Mother India," by Katherine Mayo.

An "Extra Grace" will be the subject of the sermon by Rev. Henry Knox at Emmanuel Baptist Church to-morrow morning. The choir and congregation will sing the "Te-Deum" (Jackson).

At the evening service the choir will render the anthem, "In Thee, O Lord" (Tours) and Rev. Henry Knox will preach on "What is Your Life?"

RE-CREATION OF MAN WILL BE REVIEWED

At the Victoria West United Church to-morrow Rev. H. J. Armitage will conduct both services. The subject of the morning sermon will be "Relief from the Pressure of This Life." The subject of the evening sermon will be "The Re-creation of Man." Special music will be given by the choir.

The Living Message of the Book of Nahum will be the subject for study at the regular service on Wednesday evening at 8 o'clock.

On Tuesday afternoon the Ladies Aid of Victoria West United Church will hold a home-cooking sale in the church parlors. All the ladies of the congregation and community are invited to attend.

"FISHING IN DEEP WATER" KNOX THEME

Rev. T. Hafren Davies, M.A., will conduct the usual services to-morrow at Knox Presbyterian Church, corner of Gladstone and Stanley Avenues. "Fishing in Deep Waters" (Luke v. 3) will be the theme of the morning sermon at 11 a.m. The subject of the evening's address at 7.30 o'clock will be "The Gospel of Work" (John v. 17). The Sunday School will meet as usual at 9.45 a.m.

Vimy Ridge Anniversary At St. Paul's

A military parade service in memory of the battle of Vimy Ridge will be held to-morrow morning at 10.30 o'clock at St. Paul's Garrison Church, Esquimalt. Rev. F. C. Chapman, chaplain and rector, will preach.

Holy Communion will be celebrated at 8 o'clock and the evening service will be held at 7 o'clock.

Unlimited Supply Given Man By God

"Opulence: The Gift of God" will be the subject of a lecture by Miss Jessie Porter of Vancouver, in the Alexandra Hall, Campbell Building, on Thursday, April 18, at 8 p.m., under the auspices of the Absolute Science Group.

On this subject of abundance arguments will be brought forth and practical suggestions given as to how to attain it. It will be pointed out that the founder of Christianity demonstrated this gift of God and announced that the Father provided all necessities of life.

SHOULD HOW MEN SELF DENIAL CAMPAIGN TO START MAY 4

Rev. Hugh Nixon Will Discuss Example Given By Jesus

At Fairfield United Church to-morrow morning Rev. Hugh Nixon will take as his subject "The Happiness of Jesus." In this discourse he will point out how men can be happy when life is hard and disappointments numerous, for the happiness of Jesus continued to the end.

In the evening the subject will be "The Tribute Paid by a Great Educationist to Jesus." The special music for the morning will be "Tenor Soloist, J. Dismore, and a duet, 'O Sweetly Sobered Thought,' by J. Dismore and Stanley Honeychurch."

In the evening the soloist will be Frank Partridge and an anthem by the choir.

WILL DESCRIBE WORK OF LORD'S DAY ALLIANCE

Rev. G. G. Webber Speaks on "Canada's Sunday" at St. Andrew's Church

The work of the Lord's Day Alliance to protect Sunday in Canada, will be described at the morning service to-morrow at St. Andrew's Presbyterian Church, Douglas and Broughton Streets, by Rev. Geo. G. Webber, secretary for Alberta and British Columbia of the Lord's Day Alliance. He will take as his theme "Canada's Sunday: What is It Worth?"

At the evening service Rev. H. P. S. Luttrell, B.A., the minister, will preach on "A Warless World: Do We Believe in It?" This theme is timely in view of next Tuesday having been appointed as League of Nations Day in Canada.

Hear Voice of Dead General On Centenary

The centenary of the birth of William Booth, founder and first General of the Salvation Army, was observed by the local corps on Wednesday night, with a parade headed by the Citadel Band, each branch of the senior and junior corps being represented. The Life-Guards, Sunbeams and Chimes paraded in uniform. A meeting in the Citadel followed, led by Adjutant Merrett, when through the kind courtesy of Fletcher Bros., gramophone selections by the founder, and music by Army bands, were played.

The week-end meetings at the Salvation Citadel, Broad Street, will be led by V.P. Sergeant-Major Turton and his assistants in the Sunday School, with the exception of the afternoon junior corps being represented. The League of Mercy will hold a meeting to-morrow, at 8.15, Adjutant Merrett will open the usual praise meeting and there will be an enrolment of Junior Soldiers. Parents and friends of children becoming members of the Junior Corps are invited. These meetings are open to the public, also those held on Monday, Thursday and Saturday nights.

The League of Mercy will hold a "Get Acquainted" social on Thursday evening at 8 o'clock. Refreshments will be served after a short program of music and song. A cordial invitation is extended to all who can attend, particularly visitors in the city who make the Army their church home.

A notable British authority, at a public meeting in London, recently declared, "The Salvation Army, to my knowledge, can get more out of a five-pound note than any other organization in the world. In my opinion, it is one of the best investments for ratepayers that exist, and there is no cheaper form of social insurance than a substantial contribution to the Army's Self-denial fund."

Anacortes Visitor Will Preach Twice At Elbethel Hall

Elbethel Gospel Assembly will be visited by Mrs. R. L. Krook of Anacortes, Wash., this week-end. Mrs. Krook will preach at both morning and evening services to-morrow. Special music will be given.

In the meantime the chief priests held council with the elders and the scribes as to the next act in the eventful drama. They decided to call Jesus before them for examination.

Salvation Army's Annual Appeal Supports Important Undertakings

Linking the drive as part of the world-wide celebration this year of the 100th anniversary of the birthday of William Booth, its founder, the Salvation Army in British Columbia, will undertake its annual self-denial campaign for funds, for the extension and maintenance of social welfare institutions, from May 4 to 18. Announcement of this effect is made by Staff Capt. James Merritt, officer commanding Salvationist forces at the Coast.

Self-denial Week, to members of the Salvation Army, is pointed out, means much more than a slogan upon which to base a drive for funds. It is a period during which every member of the army, from the little children up to General Higgins, the supreme commander, undertakes practical personal self-denial, by abstention from luxuries, of non-essential expenditures, in order to accomplish two things: (1) achievement of personal purification by fasting or near-fasting; (2) a saving in living expenses which can be donated to the self-denial fund.

By the command of the revered founder, who frowned upon fanatical asceticism, Salvationists do not go without necessities of life, but during the period they reduce their way of life to a minimum on behalf of these two laudable aims.

In addition to these personal self-sacrifices, said Staff Capt. Merritt, thousands of Salvationists, particularly those enjoying remunerative employment or conducting paying private businesses, donate generously from their private savings, so that each year a substantial portion of the self-denial fund comes from Salvationists themselves.

NO DIFFERENCE

It is for this reason that officers and members of the Salvation Army feel no difference about going to the public and asking them to share in 1929's worthwhile financial effort.

Salvation Army social work is well known. Rt. Hon. David Lloyd George said of it: "The Army social work does more to prevent crime than any other single factor in civilization."

This comprehensive statement is borne out by statistical consideration of army activities.

In various parts of the world the Salvation Army has—15,517 corps and outposts; 1,553 social institutions and agencies; naval and military homes; 30, officers and cadets, 24,513; others wholly employed; 9,124; local officers—none of whom receive any remuneration whatever; 105,034; shelters and food depots for men, 123; similar institutions for women, 18; hotels (cheap clean—hotels, 180—total accommodation of hostels and shelters, 35,443 persons daily; children's homes, 1,000; baby crèches where mothers going out to work may leave their babies in safety without charge, 10; industrial schools, 24; women's industrial homes, 12; maternity homes, 12; youth hostels, 12; total social institutions, including hospitals, 309.

Authorities everywhere endorse the work of the Army, it being commonly accepted now that were it not for Salvation Army social activities in many respects, the work would have to be done by municipal, provincial or federal government departments, at infinitely greater expense than the Army incurs.

A notable British authority, at a public meeting in London, recently declared, "The Salvation Army, to my knowledge, can get more out of a five-pound note than any other organization in the world. In my opinion, it is one of the best investments for ratepayers that exist, and there is no cheaper form of social insurance than a substantial contribution to the Army's Self-denial fund."

UNITY CENTRE

At the Unity Centre on Sunday at 11 a.m., Harold Pratt will speak on "Getting Back to God." He will first give the children one of his interesting talks. Songs will be a special feature of the service. Mrs. Victor Crawford will sing a solo and the children will also take part.

In the evening Mrs. Gordon Grant will speak on "The Omnipresence." There will be special music with Miss Bonshor as the accompanist.

Jesus in Prison

In Our Churches

FELLOWSHIP WORTH MORE THAN BELIEF

Rev. Dr. Sipprell Says Jesus Provides Opportunities For Close Fellowship

Rev. R. J. McIntyre Preaches To-morrow Evening at Metropolitan

That religious life is a matter, not of faith alone, but of fellowship, will be the theme of a sermon by Rev. W. J. Sipprell at Metropolitan Church, in the theme, "Christ's Appointments With Us." The disciples were chosen that they might be with Him, and the pastor will assert that the essential of Christian experience to-day is not so much the matter of belief as of intimacy in fellowship with Jesus Christ. He will show that development of this fellowship is not a haphazard matter. It is arranged by Christ himself in appointments at the Cross, in the Temple, at the Communion, in the prayer closet, in the field of service and in the soul's heavenly abode. At the morning service Mrs. George Warren of Seattle, a celebrated mezzo-soprano, will sing.

The Sacrament of the Lord's Supper will be observed at the conclusion of the morning service. At the evening service Rev. R. J. McIntyre will preach. The soloists will be P. Wright, bass, and Mrs. F. Roberts, contralto of Seattle. On Monday evening Rev. Dr. Crowther, author of "The Wayfarer," will speak in the interests of prohibition, selecting as his subject, "Christ or Barabbas." Dr. Crowther is pastor of University M.E. Church of Seattle, and is one of the greatest orators on the Pacific Coast. Great interest is already manifested in his coming to Victoria.

Reborn Souls To Be Studied

The morning topic to-morrow at New Thought Temple Inc., 842 North Park Street, will be the "Pursuit of Lives." The evening subject will be "Spiritualism, Its Truth and Dangers." Questions Mrs. Evelyn Davis will answer will be: "Is man given but one life to learn to be perfect?" Is communication with the dead possible? "What is clairvoyance?" Is immortality a proven fact? On Wednesday evening at 8 o'clock Mrs. Davis will lecture upon "The Power Within." This lecture will deal with the subconscious mind and the innate powers of man. On Thursday evening the Ladies' Club of the New Thought Temple Inc. will give a social and dance at Temple Hall, 842 North Park Street.

Future of Jews Shown By Bible

Interest in prophetic studies at the Mission and Bible School is steadily increasing. Organization has been completed and much better results are expected. What is sought is to make plain the unmistakable utterance relating to this age, and regarding coming changes in the Jewish world. Dr. Day believes the same scholarship of Europe has much to offer students.

Nations Arming For World's End

Last Sunday at St. David's Hall, Pastor N. C. Emison spoke on "The League of Nations and the Renewed Promise to 1914." There were more than 300 peace societies in the world. Through these people said, "Nations shall not lift up sword against nation, neither shall they learn war any more." God's prediction of what the people would say came true, but as all know the people were mistaken. "The facts are that while the League of Nations is talking peace, every nation is preparing for war on the largest scale in the history of the world." Pastor N. C. Emison will speak to-morrow evening on "The Two Covenants." What are they? Who were they made with? How many of the ten commandments are included in the New Covenant?

"KARMA, LAW OF JUSTICE," THEME

"Karma, the Law of Justice," will be the subject matter presented and discussed at a public meeting of the Victoria Independent Theosophical Society on Monday evening at 8 o'clock in the rooms of the society, Jones Building, Port Street. An invitation is extended to the public to join in the discussion.

E. E. Richards Speaks

An illustrated lecture on "The British Throne and Coronation Stone" will be given by E. E. Richards in Matthews Hall, Sidney, next Friday at 8 p.m. On Tuesday, April 23, Mr. Richards will give an illustrated lecture on "St. George and Our National Emblem," in the K. of P. Hall, Duncan, when Dr. Primrose Wells will preside.

Thirty million copies of the Bible are circulated every year, according to the New York Bible Society.

R. J. MCINTYRE TO GIVE MESSAGE

Rev. R. J. McIntyre will be the special preacher at James Bay United Church to-morrow morning. This is the first visit Mr. McIntyre has paid to James Bay for some years. Special interest is attached to his coming at this time, owing to the reviving interest in matters pertaining to the sale and use of intoxicating liquors. Rev. Thos. Keyworth, the minister, will conduct both services and will preach at the evening service, his topic being "Forgiveness." Rev. Mr. Keyworth will answer the question, "Has the New Attitude to God Dispensed With the Idea of Need of Forgiveness?" The choir will render "Like as a Heart" by Lorenz.

A guest tea will be held at the parlour, Battery Street, on Tuesday afternoon, under the auspices of the Ladies' Aid Society. In the evening there will be a housewarming, to which all the members of the congregation are cordially invited.

At the Tabernacle of the Christian and Missionary Alliance, Yates Street, the pastor, Rev. Daniel Walker, will preach to-morrow morning on "The Wonderful Promises of God" and the overflowing blessings promised to those fulfilling the conditions. He will show that whenever a revival takes place it is accompanied by a time of conviction and that it is only when men feel the need that they cry to God.

At the evening service he will preach on "A Great Man With Great Need," who got a great blessing by fulfilling the condition.

At the evening service Rev. R. J. McIntyre will preach. The soloists will be P. Wright, bass, and Mrs. F. Roberts, contralto of Seattle.

On Monday evening Rev. Dr. Crowther, author of "The Wayfarer," will speak in the interests of prohibition, selecting as his subject, "Christ or Barabbas." Dr. Crowther is pastor of University M.E. Church of Seattle, and is one of the greatest orators on the Pacific Coast. Great interest is already manifested in his coming to Victoria.

Hall, Duncan, when Dr. Primrose Wells will preside.

EVOLUTION OF MAN TO BE DISCUSSED

To-morrow morning at the Progressive Thought Temple, Dr. A. F. Barton will speak on "The Pursuit of Happiness." The New Thought philosophy teaches that happiness is a state of mind.

At 7:30 p.m. Dr. Barton will speak on "The Evolution of Man," and will trace the ascending character in man. On Wednesday at 8 o'clock, Dr. Barton will lecture on "Spring Fever." Holt's orchestra will again be in attendance from 7:30 to 8.

Mrs. Lefevre is the soloist at Sunday evening service.

Mrs. Durrant and Miss R. Bailey will conduct Sunday school at 11 a.m. Ladies' club meets 2:30 Wednesday, at Mrs. Bailey's home, 400 Burnside Road. All ladies interested are invited to attend this re-organization meeting.

The average number of hours worked a week for all unionized trades has decreased 10 per cent during the past twenty years. Wages have increased 275 per cent.

America consumes 1,000 tons of pepper a month. Britain consumes 5,000 tons a year.

Many birds mate for life and many keep within sight and hearing of the mate year in and year out.

At the evening service he will preach on "A Great Man With Great Need," who got a great blessing by fulfilling the condition.

At the evening service Rev. R. J. McIntyre will preach. The soloists will be P. Wright, bass, and Mrs. F. Roberts, contralto of Seattle.

On Monday evening Rev. Dr. Crowther, author of "The Wayfarer," will speak in the interests of prohibition, selecting as his subject, "Christ or Barabbas." Dr. Crowther is pastor of University M.E. Church of Seattle, and is one of the greatest orators on the Pacific Coast.

Richards in Matthews Hall, Sidney, next Friday at 8 p.m. On Tuesday, April 23, Mr. Richards will give an illustrated lecture on "St. George and Our National Emblem," in the K. of P. Hall, Duncan, when Dr. Primrose Wells will preside.

Thirty million copies of the Bible are circulated every year, according to the New York Bible Society.

At the Tabernacle of the Christian and Missionary Alliance, Yates Street, the pastor, Rev. Daniel Walker, will preach to-morrow morning on "The Wonderful Promises of God" and the overflowing blessings promised to those fulfilling the conditions.

He will show that whenever a revival takes place it is accompanied by a time of conviction and that it is only when men feel the need that they cry to God.

At the evening service he will preach on "A Great Man With Great Need," who got a great blessing by fulfilling the condition.

At the evening service Rev. R. J. McIntyre will preach. The soloists will be P. Wright, bass, and Mrs. F. Roberts, contralto of Seattle.

On Monday evening Rev. Dr. Crowther, author of "The Wayfarer," will speak in the interests of prohibition, selecting as his subject, "Christ or Barabbas." Dr. Crowther is pastor of University M.E. Church of Seattle, and is one of the greatest orators on the Pacific Coast.

Great interest is already manifested in his coming to Victoria.

BRITISH ISRAELITES

W. H. Blackaller will give a lecture before the British Israel Association, at the Board of Trade Building, 521 Bastion Street, on Monday evening at 8 o'clock. The speaker will discuss: "When did the Gentiles come under the curse of the law?" The address will be a continuation of the series on Israel in the New Testament.

Druggist: "What will it cost to have my car fixed?"

Garage Man: "What is the matter with it?"

Druggist: "I don't know."

Garage Man: "Fifty-two dollars and fifty cents."

It is estimated that rubber from the Guadalupe shrub, now growing wild over thousands of acres in Texas, would cost 50 cents a pound.

At the evening service he will preach on "A Great Man With Great Need," who got a great blessing by fulfilling the condition.

At the evening service Rev. R. J. McIntyre will preach. The soloists will be P. Wright, bass, and Mrs. F. Roberts, contralto of Seattle.

On Monday evening Rev. Dr. Crowther, author of "The Wayfarer," will speak in the interests of prohibition, selecting as his subject, "Christ or Barabbas." Dr. Crowther is pastor of University M.E. Church of Seattle, and is one of the greatest orators on the Pacific Coast.

Great interest is already manifested in his coming to Victoria.

The morning topic to-morrow at New Thought Temple Inc., 842 North Park Street, will be the "Pursuit of Lives." The evening subject will be "Spiritualism, Its Truth and Dangers." Questions Mrs. Evelyn Davis will answer will be: "Is man given but one life to learn to be perfect?" Is communication with the dead possible? "What is clairvoyance?" Is immortality a proven fact?

On Wednesday evening at 8 o'clock Mrs. Davis will lecture upon "The Power Within." This lecture will deal with the subconscious mind and the innate powers of man.

On Thursday evening the Ladies' Club of the New Thought Temple Inc. will give a social and dance at Temple Hall, 842 North Park Street.

Interest in prophetic studies at the Mission and Bible School is steadily increasing. Organization has been completed and much better results are expected. What is sought is to make plain the unmistakable utterance relating to this age, and regarding coming changes in the Jewish world. Dr. Day believes the same scholarship of Europe has much to offer students.

Last Sunday at St. David's Hall, Pastor N. C. Emison spoke on "The League of Nations and the Renewed Promise to 1914." There were more than 300 peace societies in the world. Through these people said, "Nations shall not lift up sword against nation, neither shall they learn war any more." God's prediction of what the people would say came true, but as all know the people were mistaken.

"The facts are that while the League of Nations is talking peace, every nation is preparing for war on the largest scale in the history of the world." Pastor N. C. Emison will speak to-morrow evening on "The Two Covenants." What are they? Who were they made with? How many of the ten commandments are included in the New Covenant?

"Karma, the Law of Justice," will be the subject matter presented and discussed at a public meeting of the Victoria Independent Theosophical Society on Monday evening at 8 o'clock in the rooms of the society, Jones Building, Port Street. An invitation is extended to the public to join in the discussion.

E. E. Richards Speaks

An illustrated lecture on "The British Throne and Coronation Stone" will be given by E. E. Richards in Matthews Hall, Sidney, next Friday at 8 p.m. On Tuesday, April 23, Mr. Richards will give an illustrated lecture on "St. George and Our National Emblem," in the K. of P. Hall, Duncan, when Dr. Primrose Wells will preside.

Thirty million copies of the Bible are circulated every year, according to the New York Bible Society.

Friday, April

ENTITLED

Member of The Christian Science Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in
Boston, Mass.

**WITH THE
BOY SCOUTS**

Third Victoria Pack—At the pack's last meeting the following games were played: "Dribble," "Pass It," "Knott-ting," Akela told them the jungle story of "Bagherra, the Panther and His Hunting." Then the pack performed the jungle dance of "Bagherra." Ernie Bance being the "deer" and Lawrence Macrae the leader of the pack.

St. Bernabe's Pack—Christopher

Enith was made sixer of the timber wolves, and Raymond Moore second of the redskins. The boys used their stripes, first star work was taken, most of the time being taken up with knots. Games played were "stand up," down ball and "balloon." Two recruits taken into the pack were Curford Howell and Billy Stedman.

St. Mary's North—The pack made a trip to Loon Bay on Friday. Instead of the regular meeting, Cub Instructor John Gornall and Scout Will Gornall met at the Akela at Lansdowne Avenue and organized a game of "tracking," which was played before lunch. Afterwards Akela started a sea, called the "Pirates Pirates," each cub telling part of the story. "Union trail" and "French cricket" were played and just before the pack left for home Tenderpac Jack Kirk received his first proficiency star and Cub Fred Gornall his second proficiency star. Both cubs renewed their "promise."

Oaklands Pack—On Friday the pack left headquarters for a day's outing to visit the Glaciers. From there they walked to the falls where they played games for an hour. There were then taught fire building and lighting in scout fashion. After supper they smoked home, having spent a thoroughly hot afternoon.

CHURCH PARADE

St. Mary's North and South packs will join the troop in a parade to St. Mary's Church tomorrow. Cubs are asked to be at troop and pack head-

quarters, Chaucer Street, at 10.30 a.m. Particulars of the second star work taken at the last meeting was signalling, the cubs working hard in preparation for the signalling contest. Cub Instructor Hill-Tout took tenderpawed in ball-throwing, while Baloo instructed recruits in the "grand howl and salute." A game of "bombing the dug-out" was enjoyed out-of-doors, and a dumb show story was acted by sixes.

Thursday evening was spent in ceremony took place, when Douglas Hill-Tout, sixer of the brown wolves, went up into the troop, and was welcomed by S.M. Frampton into the hawk patrol. The evening was spent in games, a bun-fest and sing-songs.

Military Activities

Fifteenth Division Train C.A.S.C.
—Classes for the Provisional School Army Service Corps will be held on Mondays, Wednesdays and Fridays at 8 p.m. sharp.

Thursday evening, Driver W. H. Robinson of the H. I. Corps, having been discharged is struck off the strength as from April 10.

HUGH ALLAN, Capt. and Adj.,

Battalion Orders.—By Lieut.-Col. D. B. Martyn, D.S.O., M.C. commanding the 1st Battalion, 16th C.E.F., the Canadian Division.

Duties for the week ending Monday

April 22, 1929. Officer for the week
Lieut. D. Pyatt. Next for duty, Lieut.
R. D. Travis. Battalion Officer, Sergt.
Sergt. A. E. Mercer. Next for duty,
Sergt. C. J. Armstrong. Battalion Officer,
Corpl. C. B. Tyte. Next for duty,
Corpl. J. Rogers.

Monday, April 15, the battalion will
parade as strong as possible at the
Drill Hall, Bay Street, at 8 p.m. Dress
drill order.

Lewis gun instruction for the purpose
of qualifying all members of the
unit, preparatory to range practice.
Future parades will be under the order
and direction of company, signal and
drum major. The range practice in-
struction will be discontinued until Summer
parade, to allow full attendance and at-
tention to the many schools now in
session. The company will be ordered
to complete organization of the
commands for their annual Summer
training. Recruits will be attended on
Monday evenings, and a senior N.C.O.
will be in command of the recruits.
He will make recruits class in elementary drill
and rifle exercises.

**Royal School of Signals, Visual Tele-
graphy, Camp Borden.** A course for
the purpose of training recruits in
the above mentioned units, to qualify
as instructors and assistant instructors
in visual telegraphy, will be held at
Camp Borden, from two weeks from July
1st to August 24th.

2.—Candidates must be in possession
of first-class V-T certificates, be medi-
cally fit and be able to pass the
physical test and lamp work at a rate of
sixty words per minute, with an accuracy

Attestations.—The undersigned men having been duly attested at taken on the strength of the battalion, the following are the dates of the dates shown opposite their names: No. 913—Pte. E. E. Mills, No. 1 Co., 688th Central Postal Directory Co., 8-4-20. 914—Pte. W. Eaton, No. 1 Co., 688th Central Postal Directory Co., 8-4-20.

Certificates of Qualification.—The following certificates of qualification were received from the Adjutant General's School, Camp Hughes, held August 31, 1926, to September 20, 1926: 913—Pte. E. E. Mills, C. Turner, No. 1 Co., 688th Central Postal Directory Co., 8-4-20. 914—Pte. W. Eaton, No. 1 Co., 688th Central Postal Directory Co., 8-4-20.

Promotions—The following promotions have been announced by the War Department:

Lieutenant Colonel J. C. Gray, April 9, 1929; No. 3108. Gnr. J. W. Burbridge, April 9, 1929.

Captain D. H. McEwen has been promoted to sergeant. No. 11607.

Sergeant D. B. Hockley, 53th Hyv., April 9, 1929; to lieut.-sergent. No. 1034.

Lieutenant E. M. Custance, 53d Hyv., April 9, 1929.

Parades—The units of the brigade will parade as detailed below for instruction under their respective O.C.'s:

The 5th Cavalry, 1st Brigade, 1st Div., 16th Hyv. Batteries and 2nd A.A. Section, on Tuesday, April 16, at 8 p.m.; The 5th and 56th Field Batteries on Friday, April 19, at 8 p.m.

Applicants must be in possession of first class V.T. certificates. Be medically fit and be able to pass a reading test in 60 seconds and a word reading test in 30 seconds per minute with an accuracy of 98 per cent. Transportation and pay of rank will be provided to eliminate any undue financial burden. Officers are requested to submit names of candidates to these headquarters by April 24 next.

Annual training—Prize \$60 is awarded to the winner of the Fifty-eighth Field and 12th How Batteries will proceed to Searce Camp, Alta., for annual training leaving Victoria on Tuesday, August 12, 1929. (Auth. H.Q. 35-184-2, March 19, 1929.)

P. T. STERN,
Major.

Great Audience Hears Speech By Lloyd George

London, April 13.—More than 100,000 persons, said to be the largest political audience ever to listen to one speaker in England, were estimated to have heard ex-Premier Lloyd George at the second mass demonstration of the Liberal general election campaign held in Manchester last night. Besides the Free Trade Hall in Manchester, which was crowded to the doors, audiences in twenty-eight towns were able to hear the liberal leader by an elaborate telephonic relay system using 1,800 miles of line.

Mr. Lloyd George said that the Liberals were putting forward their unemployment plan as a united party. "The remarkable speech by Lord Grey at an assembly not of my special admirers—bears testimony to that fact," he said.

The whistle of a locomotive can be heard to a height of one and one-half miles in the air.

Cotton produced in the United States totals around 14,000,000 bales annually. Each bale weighs 480 lbs.

Third Victoria Pack—At the pack's last meeting the following games were played: "Drabble," "pass it," "knotting." Akela told them the jungle story of "Bagherra, the Panther and His Hunting." Then the pack performed the jungle dance of "Bagherra." Ernie Rance being the "deer" and Lawrence Macrae the leader of the pack.

Eleventh Division Train C.A.S.C.
Classes for the Provisional School
Army Service Corps will be held on
Mondays, Wednesdays and Fridays at
8 p.m. sharp.

Strength increases—Driver W. E.
Robinson of the H. I. Corps, having
been discharged is struck off the
strength as from April 10.

HUGH ALLAN, Capt. and Adjt.,
Eleventh D.T. C.A.S.C.

Battalion Orders.—By Lieut.-Col. D.
B. Martyn, D.S.O., M.C. commanding
the 16th C.E.F., the Canadian
Scottish Regiment.

Duties for the week ending Monday.

Sept. 22, 1929. Officer for the week.
Lieut. D. Fyvie. Next for duty, Lieut.
Sergeant. J. Armstrong. Ortl. Sergeant.
Sergeant. A. E. Mercer. Next for duty.
Sergeant. C. J. Armstrong. Battalion Ortl.
Corpl. C. B. Ty. Next for duty.
Corpl. C. B. Ty. Next for duty.

Monday, August 13, the battalion
parade as strong as possible at the
Drill Hall, Bay Street, at 8 p.m. Dress
order.

Lewis gun instruction for the pur-
pose of training all members of the
unit, preparator to range practice.
Future parades will be under the order
and direction of company signal and
Lewis gun officer. Battalion main-
taining will be continued until the
camp, to allow full attendance and
attention to the many schools now in
progress, two to permit unit commands
to be held. The Battalion will be
commanded for their annual Summer
training. Recruits will be attended
at Monday evenings, and a senior N.C.O.
make recruits class in elementary drill
and rifle exercises.

Royal School of Signals, Visual Tele-
graphy, Camp Borden.—1. A course for
instructors will be held for 4 weeks
as the above mentioned units, to qualify
as instructors and assistant instructors
for visual telegraphy. Will be held at
Camp Borden for 4 weeks from July
24 to Aug. 24 next.

2.—Candidates must be in possession
of first-class V-T certificates, be medi-
cally fit and be able to pass a reading
test of 100 words per minute, with an accuracy
of 95 per cent.

of nine percent per cent.

3.—Transportation and pay of rank and file candidates attending the school.

Candidates for this school are requested to submit their names to the orderly room at once.

4.—Theoretical Portion.—For the information of all officers attending the militia staff course, the theoretical exams will be held at Worcester, Mass., on Monday, April 22 and at 9:30 Sunday, April 28.

5.—Equipment.—Immediate return of all full-dress equipment is required. Pipeband equipment issued prior to April 1, 1918, is to be returned to the armament stores for the purpose of rechecking.

6.—Musketry.—Attention of all ranks is directed to Summer training on the range at Fort Slocum, N. Y. Officers are entitled to participate in Wednesday and afternoon shoots. Transportation is always available to those desiring to attend the past.

7.—Attendants.—The undersigned has men having been duly attested as taken on the strength of the battalion and posted to companies from the States shown opposite their names:

No. 913—Pte. W. H. Hill.
8-4-29. No. 914—Pte. W. Eaton, No. 8-4-29.

Certificates of Qualification.—The following certificates of qualification have been granted from the Small Arms School, Camp Hughes, held August 13, 1928, to September 20, 1928:

1.—Sergeant, 1st Regt. C. Turner, No. 678, Sergeant, 2d Regt. C. Turner, No. 679, Sergeant, 3d Regt. C. Turner, No. 680, Sergeant, 4th Regt. C. Turner, No. 681, Sergeant, 5th Regt. C. Turner, No. 682, Sergeant, 6th Regt. C. Turner, No. 683, Sergeant, 7th Regt. C. Turner, No. 684, Sergeant, 8th Regt. C. Turner, No. 685, Sergeant, 9th Regt. C. Turner, No. 686, Sergeant, 10th Regt. C. Turner, No. 687, Sergeant, 11th Regt. C. Turner, No. 688, Sergeant, 12th Regt. C. Turner, No. 689, Sergeant, 13th Regt. C. Turner, No. 690, Sergeant, 14th Regt. C. Turner, No. 691, Sergeant, 15th Regt. C. Turner, No. 692, Sergeant, 16th Regt. C. Turner, No. 693, Sergeant, 17th Regt. C. Turner, No. 694, Sergeant, 18th Regt. C. Turner, No. 695, Sergeant, 19th Regt. C. Turner, No. 696, Sergeant, 20th Regt. C. Turner, No. 697, Sergeant, 21st Regt. C. Turner, No. 698, Sergeant, 22nd Regt. C. Turner, No. 699, Sergeant, 23rd Regt. C. Turner, No. 700, Sergeant, 24th Regt. C. Turner, No. 701, Sergeant, 25th Regt. C. Turner, No. 702, Sergeant, 26th Regt. C. Turner, No. 703, Sergeant, 27th Regt. C. Turner, No. 704, Sergeant, 28th Regt. C. Turner, No. 705, Sergeant, 29th Regt. C. Turner, No. 706, Sergeant, 30th Regt. C. 5TH (B.C.) COAST BRIGADE, C.A.

Orders by Lieut-Col. J. C. Harris
V.D. commanding headquarters, Vancou-
ver, B.C.

Strength increases. The following
men have been taken on the strength
from the dates set opposite their respec-
tive names: -
Grady, April 9, 1929; No. 3108, Cnr. J. P.
Burbidge, April 9, 1929.

promotions. "V.O.C." has been
pleased to approve the following pro-
motions: - To sergeant, No. 1108
Spedding, and D. Hockley - 68th Bn.
April 9, 1929; to be 1-sergeant, No.
5057, Bdr. T. M. C. Custance, 55th Bn.
Hvy. April 9, 1929.

Parades-The units of the brigaded
will parade as follows below for in-
struction under their respective C.O.'s
dress, drill order: Fifty-fifth and
66th Hvy. Batteries and 2nd A.A. Sec-
tion, on Tuesday, April 16, at 8 p.m.
The 55th and 66th Hvy. Batteries, on
Friday, April 19, at 8 p.m.

will parade under Sergeant A. H. Rudge. B. C. A. will parade under Sergeant Wingate on this and each succeeding Tuesday.

Certificates—The following certificates have been granted: No. 7224, Sergeant W. O. August, Class 2, Camp No. 6081; No. 7488, L-Sergeant A. G. Harrison, bombardier, Cert. No. 6066; No. 7146, L-Sergeant W. M. James, bombardier; Cert. No. 6067.

Royal School of Signals, Visual Telegraphy, Camp Borden, Ont.—A course for officers and regimental signalers to qualify as instructors and assistant instructors, visual telegraphy, will be held at Camp Borden for six weeks, commencing August 2, 1929. Candidates must be in possession of first class V.T. certificates. Be medically fit and be able to pass a reading test in flash and lamp at a rate of six words per minute. Candidates must be 20 years of age. Transportation and pay of rank will be granted to candidates attending school. Commanding officers are requested to submit names of candidates to these headquarters by April 24, 1929.

Annual training—Para. 40 is amended as follows: "Fifty-eight Field and 120th How Batteries will proceed to Harcourt Camp, Alberta and assemble there, leaving Victoria on Tuesday, August 6, 1929." (Auth. Hqs. 35-184-2, March 19, 1929.)

P. T. STERN,
Major.

Adjutant 5th (B.C.) Coast Def. Bn.

Great Audience Hears Speech By Lloyd George

London, April 13.—More than 100,000 persons, said to be the largest political audience ever to listen to one speaker in England, were estimated to have heard ex-Premier Lloyd George at the second mass demonstration of the Liberal general election campaign held in Manchester last night. Besides the Free Trade Hall in Manchester, which was crowded to the doors, audiences in twenty-eight towns were able to hear the Liberal leader by an elaborate telephonic-relay system using 1,600 miles of line.

Mr. Lloyd George said that the Liberals were putting forward their unemployment plan as a united party. "The remarkable speech by Lord Grey at an assembly not of my special admirers—bears testimony to that fact," he said.

The whistle of a locomotive can be heard to a height of one and one-half miles in the air.

Cotton produced in the United States totals around 14,500,000 bales annually. Each bale weighs 480 pounds.

CANADA MUST BUILD MORE GOOD ROADS

General Motors' Official Sees Need For Better Transportation Facilities

Growing Tourist Business Indicates Necessity, He Says

Good road and prosperity march hand in hand. This is an axiom on which Canada, already prospering and forging ahead to an unprecedented extent, is building her plans for still further and greater prosperity, according to H. H. Henchel, general sales manager of the truck and coach division of General Motors.

"We know full well the prosperity which was brought about by the age of steam," he says. "We know that the steam roads opened up the great empire to the West and placed Canada before the world as a land teeming with opportunity and with natural wealth. But to-day, having opened up this great empire, the railroads find for themselves a task which is and will for years to come tax their utmost facilities."

"The railroads are the great arteries through which must flow the wealth of the great western empire to its ports on two oceans. Through them the prairie provinces must send their golden streams of grain to market. There is an opportunity and a task which is adding, and will continue to add, millions to the growing wealth of the Dominion."

FEEDER LINES

"But, with this unprecedented de-

MR. H. H. HENCHEL
General Sales Manager, General Motors Products (Truck and Coach Division) Limited

velopment, comes another situation which opens up another field of development—that is the feeder lines to these routes of steel. If the railroads are to garner this golden stream, economy dictates that it must be directed to strategic points where it can be gathered in. There must be feeder lines. The great railroads may be likened to great rivers, with feeder lines as the tributaries.

"These feeder lines are roads over which grain and other produce must

be transported by trucks to the railroads. There must be good roads and they must be kept up. The farther these roads penetrate the more produce can be transported over them and the better the outlet to market for the farmers.

TOURIST FACTOR

"Into this general scheme of prosperity also enters the tourist. As a factor in Canada's prosperity, he can not be underestimated, for he leaves approximately \$175,000,000 annually in the Dominion. This means more business for merchants, service stations, hotels, garages, railroads—and bus lines. Here again come in the railroads, and with them good roads. The rail lines can transport these tourists to the beauty spots of the far Northwest, to Niagara, to Quebec and its historic points of interest—but when the tourist gets there he wants good roads on which to drive, and bus service direct to the main points of interest."

"Supplementing the rail service has grown up a healthy and enterprising system of bus transportation. Many of these lines are operated by railroads and electric lines. According to a report compiled by the Electric Railway Journal, there are 425 bus lines operated by electric railways, supplementing their long-distance hauls. In Montreal a great \$2,000,000 merger involving thirty-two lines has just gone into effect with the purchaser by the Provincial Transport Company of the fleets of thirty-two owners and amalgamating practically all of the bus lines operating within a radius of sixty miles of Montreal."

MORE ROADS

"All of this means that Canada's good roads must be kept up—and that Canada must build more good roads. 'Keenly aware of this situation, Quebec is laying out a comprehensive and extensive programme of road construction, which will involve the spending of \$17,000,000 during the next six years."

"This appropriation has been recommended by the Provincial Roads Department and now awaits the action of

the biggest USED CAR event in Years

real bargains for all!

THE most sensational used car sale ever held in Canada is creating a furore! This month every used car in every Chevrolet dealer's showroom in Canada is being offered at a sensationally low price to make way for the New Chevrolets coming in to meet spring deliveries.

And we're right in the forefront of values. Ask anyone who's seen our good Used Cars. Ask anyone who's read the price tickets. Ask any of the satisfied buyers.

Better still, come in and see for yourself. There are still several astonishing bargains left . . . still a fairly wide selection of makes and models. But they're going fast. So act now, if you want to save money!

Come In! See these Amazing Values

Not a Blowout on Record...

How could it blow out—the Royal Master?

With such a massive carcass combining extra plies of web cord, extra rubber reinforcing?

With a great, deep, double-thick tread?

With sidewalls protected against scuffing?

With an entirely new design that takes care of every stress and strain of modern motoring—high speed, side-sway, instant braking?

With a new slow curing process that toughens the rubber not only against punctures but against the grinding abrasion of the road?

It is next to impossible for a Royal Master to blow out. The margins of safety are too great.

Not one Royal Master in a thousand will ever puncture.

Not one in five thousand will blow out under two years of service.

Not every man can use such a tire. Are you buying a tire to drive for only a year? Then Royal Masters are an extravagance. They last too long.

But if you keep a car as long as the average man does, Royal Masters are a positive economy for you. Under normal conditions, they will last as long as you keep your car.

And in Addition

- Easier steering—due to narrower tread and less road contact.
- Greater safety—sure traction, sure braking. No side-slip.
- Silence—That means no suction—no lost power.
- No shoulder wear—no cupping.
- Smarter style—gives an added look of distinction to the most luxurious car.

This crest appears in gold on every Royal Master-Tire

DOMINION TIRES

A. D. McLEOD, 755 View Street

the Provincial Legislature. This expenditure would include the resurfacing of 892 miles of main roads in addition to other maintenance and new construction. If approved the programme will be initiated this Spring. Quebec now has 10,531 miles of permanent roads, including 2,276 miles of gravel, 332 miles of sand and clay, 1,453 miles of waterbound macadam, 125 miles of bituminous macadam, 100 miles of cement concrete, 245 miles of bituminous concrete, with 1,500 miles of earth roads which have been graded or improved. The province's main highway system consists of forty-six roads with a total length of 4,823 miles, of which 4,243 miles are improved, 403 miles are under construction, with 177 yet to be improved.

OPEN IN WINTER

"Realizing the tourist situation exists

also in Winter, Quebec this year has been experimenting with the best methods of keeping roads open during the Winter, and for the first time the road from Montreal to Roules Point, N.Y., has been kept free from snow. As a result, many motorists from the United States took advantage of it, touring by motor to witness the Winter sports."

"As Canada's good roads advance, her motor transport and bus service is advancing. The great western empire is being opened up more and more each year. The railroads have done a lion's share. Much still rests with Canada herself."

HINTS FOR THE MOTORIST

About a year ago, transmissions with four forward speeds appeared on certain of the New models, in which first, second and reverse were obtained conventionally by means of the countershaft and second gear was the direct drive with no gears in action. The salient feature of these transmissions was the practically quiet third speed, the lower of the two service speeds or so-called "highs," in which the required reduction in the driving ratio was obtained by means of a unit, comprising two internal gears and two spur gears, mounted upon the through shaft. This combination of two external-internal gear pairs was found to operate relatively silently as compared with the ordinary reduction by spur gears through the countershaft and the four-

spped gear sets embodying it proved successful in increasing fuel economy and reducing engine wear and tear as well as in giving better car performance. However, four-speed transmissions are expensive and some engineers doubt whether the advantages they confer warrant their adoption, but there can be no doubt that the internal gear reduction arrangement, because of its quietness and high efficiency and the fact that it is thrown in by a positive clutch and thus can be engaged readily and silently, is an important advance in the technique of speed changing. The fact that the internal gear combination can be applied to secure the reduction required for second gear in a three-speed transmission has led to the development of such transmissions, with a quiet second-gear and such gear sets are beginning to appear on late models. In such a transmission, low and reverse are countershaft geared speeds, third is the direct drive and second, being obtained through internal gears, may be regarded as silent, as compared with the conventional second speed, as well as being more efficient and far more readily engageable through a wide variation of engine and car speeds. Undoubtedly with a practically quiet second gear, drivers will use it more freely thus reducing the abuse suffered by their engines through their unwillingness to "shift down," when this would be decidedly advantageous.

IGNITION AND HEADLIGHT TROUBLE

P. D. writes: The engine of my 1928 car sometimes stops dead and it takes from five minutes to half an hour to get it started again. On these occasions, the right headlight will not burn. The starter operates all right,

but while it is running, the ammeter shows no current. When I finally get the engine going, the right headlight comes on. What is wrong?

Answer: If the ammeter shows no current, while the engine is being cranked, the ignition circuit must be open. By detaching a plug-cable, under these circumstances, failure to get a spark from it, will prove the above to be the case. Just how the extinguishing of the right headlight is concerned with ignition failure, is not clear and can probably only be ascertained by going over the wiring carefully for crosses and also inspecting all contacts on the back of the lighting and ignition switch. If detaching the right headlight wire at the connection-block enables the engine to be started promptly, it would tend to indicate some interference with ignition, attributable to it. Sorry we cannot give you more definite assistance.

ANTI-FREEZE FOR THE CRANKCASE

P. C. asks: Can the freezing of water on the oil-screen be prevented by keeping a small quantity of denatured alcohol in the crankcase of an engine that stands idle in a very cold place? Answer: Yes. This expedient will mark all right, but if you will draw off a little liquid through the oil-pressure drain plug, every few hundred miles, after the engine has been shut down for a few minutes there should not be sufficient water collect to make the use of alcohol necessary. If you do use it, do not put in more than a half pint.

Questions of general interest to the motorist will be answered by Mr. Clough in this column, space permitting. If an immediate answer is desired, enclose self-addressed, stamped envelope.

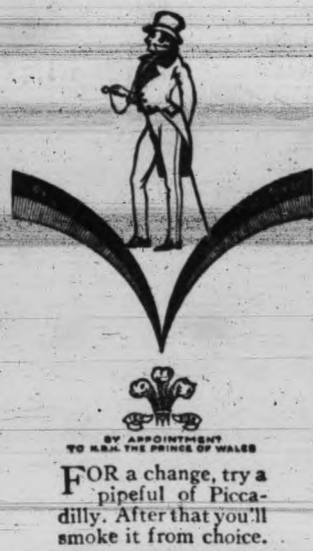

Meighen to Speak Over CNRV Monday

Rt. Hon. Arthur Meighen, P.C., K.C., will deliver an address over radio station CNRV, Vancouver, on Monday at 12:25 p.m. The broadcast will originate in the Hotel Vancouver, where Mr. Meighen will be speaking to the Vancouver Canadian Club. No subject has been announced yet.

For Cuts, Burns and Scalds!

There is no danger of infection if you bathe cuts and burns with Absorbine, Jr., the famous liniment and antiseptic. It is good for treating boils, abscesses, sores, carbuncles, ulcers, feline and run-around. Absorbine, Jr., takes out the pain, arrests inflammation, cleanses the sore or wound, and promotes rapid, healthy healing. It is not greasy and does not stain the skin or clothes. Always keep a bottle of Absorbine, Jr., handy in your medicine cabinet. \$1.25—at your druggists.

TRUCK SALES SET RECORDS

Large Increases in Dodge
Shipments During First
Months of Year

Record-breaking increases in Dodge Brothers truck shipments from the Toronto factory for the first quarter of this year reflect prosperous conditions throughout Canada and the increasing popularity of Dodge trucks. Each month of the first quarter has shown a substantial increase over the corresponding months of 1928, the increase for March being sixty-seven per cent over March, 1928, and the increase for the first quarter being forty-four per cent over the corresponding quarter of last year.

The three-ton units particularly reflect an unprecedented demand. Units of this capacity actually shipped up to March 31, added to unfilled orders on hand, show an increase of 100 per cent over the entire year of 1928.

Canadian Prosperity On Firm Foundation Says Chrysler Head

J. D. Mansfield Finds Abundant Evidence of Healthy
Progress After Coast-to-coast Tour; Spirit of
Buoyant Confidence in West Impresses Him.

The most significant thing in Canada's economic progress, these last few years is the unmistakable soundness and rightness of fundamentals, according to J. D. Mansfield, president and general manager of the Chrysler Corporation of Canada Limited, recently returned to the head offices in Windsor from a coast-to-coast trip embracing the principal producing and marketing centres.

"This trip certainly revealed to me the solid, substantial character of the under-plannings of our industry and commerce," said Mr. Mansfield in an interview. "I have always been bullish on Canada, but never on any previous trip have I seen such distinct evidence of vigorous economic health in practically every section and even in the smaller towns. You need not be a statistician, either, to be aware of this. It is something that everybody can see in the substantial buildings, thronged hotels, bustling department stores and busy streets. In the quick-stepping, alert-eyed men and women you meet on the streets."

BRITISH COLUMBIA

"In the West, this is particularly pronounced, though it is almost as marked in the thriving Maritimes. Villages have grown to towns and towns to cities in an amazingly short time. One can actually see the progress made within the last two or three years. Factories and warehouses are springing up with surprising rapidity and with every evidence of sound planning."

"What impressed me particularly was the spirit of buoyant confidence that I found practically everywhere in the West. It is not any short-sighted hopeful optimism, but the clear-purposed resoluteness and resourcefulness that envisions the future just as it meets the present with sure knowledge of ability to cope with conditions. To my mind, this is one of the most important signs of commercial and industrial progress. I believe it definitely marks the emergence of Canadian business from the chrysalis stage. You might call it a sort of coming-of-age, but comparable perhaps to that awakening consciousness which comes to the successful business man only after years of experience, telling him that rich years will follow poor years, that the law of averages never ceases to operate, that good management is the deter-

OUTLOOK ROSY IN CANADA HE SAYS AFTER TOUR

president and general manager of
the Chrysler Corporation of
Canada.

mining factor in modern industrial and
economic expansion.

FARMING

"The development of what I might call this modern executive attitude of mind is nowhere better exemplified than in the West—by diversified farming. Farmers seem to be learning the knack of spreading their risks. Of course, wheat will continue to be king so long as Canada continues the world's largest wheat exporter, but I believe each succeeding year is going to witness a steady general increase in diversification of produce as well as in definite study and development of export markets.

"Very significant of this trend to modern business ideas is the western farmer's greatly increased efficiency, due to the wide adoption of motorized,

modern machinery and equipment. Figures show that wheat production in Alberta, Saskatchewan and Manitoba, totaled over 400,000,000 bushels in 1928, an increase of over 500 per cent since 1905 when the two first-named provinces came into being. Again, consider that in 1911 there were 109,000 farms in the Prairie Provinces and the average wheat acreage was approximately 10,000,000 acres and average production, 207,000,000 bushels. Fifteen years later in 1926, while the rural population increased only fifty per cent, the number of farms had increased to 248,000, the average wheat acreage to 22,000,000 acres and the average production to 440,000,000 bushels—showing that the Western farmer with only half as many more hands is cultivating twice as much wheat and harvesting twice as much wheat.

PEACE RIVER

"Let us remember, too, the important developments which are pending the introduction of railways in the Northwest, particularly the Peace River country. Out there a crop of forty or fifty bushels of wheat to the acre is not at all exceptional, while the average wheat yield for all Alberta is around twenty bushels to the acre. With a railway outlet to the Pacific Coast, this section is bound to develop tremendously and all Canada will feel the beneficial effects."

"The outlook for Canada over the next ten years is indeed most encouraging," concluded Mr. Mansfield. "The immediate outlook is equally promising. Chrysler, Plymouth, Dodge and De Soto dealers with whom I conversed all across the continent are optimistic almost to a man, retail deliveries to date being well ahead of the same period a year ago. I firmly believe we have entered a period of prosperity that will continue, with only very minor setbacks, and these largely dependent on our vision and courage in meeting changed conditions. We are to-day in at the start of Canada's great and extensive economic development era. We have great responsibilities with commensurately great opportunities."

MODERN AUTO OFFERS STYLE

Buyer of To-day Also Seeks
Performance, Says De Soto
Corporation Official

The automobile of to-day offers the modern discriminating buyer performance and style, according to Russell Paige, vice-president in charge of sales for the De Soto Motor Corporation of Canada Limited, a division of Chrysler Motors. This was the consensus of opinion in a recent nation-wide survey by De Soto sales engineers, and it tells the story of the remarkable success of

A Tremendous Increase in Public Acceptance

FOR years McLaughlin-Buick has led the world in fine-car sales. For years the proven McLaughlin-Buick engineering principles have been acclaimed by an overwhelming majority.

But now a tremendous increase in public acceptance has resulted in establishing during the past month, a new sales record for all time.

Because here, in addition to the powerful, triple-sealed, valve-in-head engine; the famous torque-tube drive; the cantilever rear springs and the wonderful sealed chassis, are new, revolutionary standards of performance and riding ease, and new beauty and luxury of Masterpiece Bodies by Fisher!

You have but to drive this great car to understand why it is literally breaking all sales records for cars at or above its price. H13-4-23

WHEN BETTER AUTOMOBILES ARE BUILT — McLAUGHLIN-BUICK WILL BUILD THEM

The Blue Ribbon Car of the Low-Priced Sixes

DE SOTO Six has broken all sales records for any first-year car at any price. The motoring public has accepted it cordially as the highest value per motor dollar of any car among the low-priced sixes.

It is acknowledged to be all that a car at so moderate a cost can be—stylish—fast—power-
ful—dependable—mechanically sound—unusually safe with hydraulic four-wheel brakes—an amazingly easy car to ride in—a brilliant performer—a thrifty car to maintain.

This is the motor world's opinion and you will share it once you see and drive the De Soto Six yourself.

this car since its introduction to the public last August. Mr. Paige said:

"This survey was important because it gave us a definite picture of the popular car of to-day. The car owner of a few years ago," he continued, "While the prestige and reputation of the manufacturer are of prime importance now, the buyer particularly in the field of the popular priced six, places performance only second to style. The De Soto six offers both."

WHAT IS NEW?

"The buyer wants to know first of all what is new about the car he is interested in and why the new is better than the old model. He wants to learn what innovations introduced by the maker increase its dependability, safety in operation and ease of control without sacrificing other features of equal importance. While the De Soto Six style, its lines and general appearance, stand out prominently compared with other cars of much higher price, it is its behavior on the open road and in congested city traffic that has been mainly responsible for De Soto popularity. It explains why its reputation is that of a wonderfully performing six of the highest quality throughout."

"The motor-wise public knows what cars can be depended upon, the manufacturer who has built up permanent prestige, not only keeping pace with the times, but leading the field with new refinements in style, comfort and dependability."

SMOOTH OPERATION

"An entirely new driving sensation has been brought into its field by the De Soto Six, with its flashing acceleration, smooth operation and instantly effective braking power. Engineering features such as the new 'Silver Dome' high compression cylinder head, the two-therm, inverted pistons; the short, heavy and rigid crankshaft, are but a few reasons for the smooth flow of power at all speeds which it exhibits."

"The answer to this urge for newness is found in the De Soto. Every-

where there is a touch of startling originality that reflects outstanding progress in style and behavior and it is in those things the public is interested. No longer does the car owner have to regret in his ears the words of the old song, the plague of the motorist of yesterday, 'Get Out and Get Under.' Whether as driver or passenger, he can have faith in the motor and is more interested in features which add to the performance, please the eye and make for comfort."

STURDINESS OF BODY FEATURE

Whippet Fours and Sixes
Benefit From New Type of
Construction

Sturdiness to an unusual degree is characteristic of the new Whippet four and Whippet six chassis, which have been completely redesigned. Both pre-empting decided improvements over the former types employed.

These improvements include an increase of three inches each in the lower rails, the employment of heavier materials to give increased strength and stability and a new method of attaching the crossmembers to the side rails, a marked advance over previous practice.

The Whippet four side rail is 4 1/2 x 3 x 9-64, which is much heavier than in its predecessor, while the Whippet Six shows a side rail 5 1/2 x 3 x 9-64 inches.

FLANGES USED

A distinct improvement comes in the method of attaching the cross mem-

bers. In the case of the front member under the radiator, a flange is used so that the member is riveted to both the top and bottom horizontal flanges of the side rail. These flanges are carried forward and turned down so that the maximum value is secured from the metal used.

The intermediate crossmember follows the same construction by virtue of the gussets or reinforcements which are riveted to the lower horizontal flange, while the member proper is riveted to the upper horizontal flange.

UNUSUAL RIGIDITY

The same method is carried out in the rear member which is a combined

cross member and gasoline tank cover. This member is so formed that it is equally fastened to both the upper and lower flanges.

As a result of this advanced type of construction and the employment of heavy materials, the frame is of unusual rigidity and was adopted only after numerous experiments and road tests by the Willys-Overland engineering department proved its absolute efficiency.

A new laboratory in Berlin, Germany, is equipped to produce temperatures as low as 452 degrees below zero, or about eight points from absolute zero.

Before and After Baby Comes

STRENGTH and tranquil nerves are most important during this critical period.

The mother should be cheerful. Her vitality should be high. For nature demands that she nourish two instead of one.

The expectant mother is usually weak and nervous, and often continues so after baby is born.

A reliable tonic is then of definite help, for labor and strain always deplete the body's supply of mineral salts.

Fellows' Syrup helps to replenish these, increases the appetite, aids digestion, and improves the general health.

Born in Canada—this fine old tonic is now prescribed by physicians in 68 countries of the world.

FELLOWS' SYRUP

Try Fellows' Laxative Tablets—a vegetable compound, mild but effective.

NEW COUPES ANNOUNCED BY STUDEBAKER

Two and Four-passenger
Models on Commander
Chassis

Make Fine Cars For Business
and Sport Use

New Commander coupes for two and four passengers on both the Commander six and Commander eight chassis are announced by the Studebaker Corporation of Canada Limited. The Commander coupe for two is an ideal car for salesmen and other business and professional men. There is abundant space in the rear deck for luggage. The dust and rainproof cover of the rear deck can be locked with the same key that controls the co-incident steering and ignition lock, and the door lock.

FINE FINISH
The interior of the business coupe is finished in genuine leather, and possesses many conveniences. The rear window can be lowered to permit complete ventilation. The steering column and the rubber padded brake and clutch pedals are adjustable to permit the most comfortable driving position. Safety features include safety steel-core steering wheel, non-shatterable safety glass in the windshield and twin windshield wipers which permit a full view of the road in stormy weather.

The brilliant performance characteristics of Studebaker engineering is supplemented by exceptional riding ease in the new Commander models. The double frame construction assures a low centre of gravity for excellent roadability, while rough roads are smoothed out by hydraulic shock absorbers and long springs fitted with ball-bearing spring shackles—pioneered by Studebaker.

WOOD WHEELS
The Commander six coupe for two is finished in Manchuria blue with black running gear and ivory striping. The Commander eight is available in Molite brown. Wood wheels are standard equipment.

The four-passenger coupe, with a comfortable leather upholstered rumble seat in the rear deck, is an extremely popular car for sport or town use for the small family, and also serves as a desirable second car for the larger family. The wide driver's seat is roomy enough for three passengers and is upholstered in mohair.

Smart body lines are emphasized by attractive colors which carry out the sport motif of the four-passenger body. The Commander six is finished in Canton green, and the eight in Alhambra tan.

DODGE SALES HEAD NAMED

E. J. Cosford New Manager
of Truck Division in Canada

News of importance to the automotive industry is the announcement by J. D. Mansfield, president and general manager, Chrysler Corporation of Canada, Limited, of the appointment of E. J. Cosford as sales manager of the Truck Division Dodge Brothers (Canada) Limited.

Mr. Cosford has been in the Canadian automotive business for many years. With the Reo Motor Car Company of Canada, he was successively manager of the retail branch at Windsor, Ontario; manager of Reo interests in Eastern Canada and then assistant general manager for Canada.

Following his connections with Reo he was a sales executive with the Studebaker Corporation of Canada, first as wholesale manager for Eastern Canada; then assistant sales manager and later sales manager for all Canadian Studebaker activities.

As sales manager for the Dodge Brothers Truck Division, Mr. Cosford has full charge of all truck sales in Canada.

"The truck situation in Canada is in a very healthy condition, and we fully expect that 1929 will set a new record in truck sales," said Mr. Cosford.

The total value of the White House and its grounds is estimated at about \$21,936.00.

Skin Sufferers Try This Test

A Pure Antiseptic Treatment
Are you tormented with the agony of a burning itching skin which seems to defy relief? Have you the sores, crusts, eruptions, swellings, of skin diseases? Try the pure cooling liquid D.D.D. It penetrates the skin, soothes and cures the irritated tissue. A 50c bottle proves its merit or your druggist gives your money back. D.D.D. means skin health. (Use only D.D.D. Soap.)

Harley Street Doctor Wins Fishing Fame In Vancouver Island Club

Dr. Lewis Smith of London Winds Up Round-the-world Trip by Securing Title of Tye Man for 1928 After Thrilling Battle With One of Big Salmon of Campbell River.

To Lewis Smith of London, Eng., well-known Harley Street doctor, goes the coveted honor of being Tye man of the Campbell River for 1928, and all the glory that goes with membership in the world-famous Tye Club for which anglers from all parts of the world have sought since it was inaugurated in 1924.

With the reasonably light tackle that the club insists must be used Dr. Smith won his right to the gold medal that goes for a fifty-pounder, won the title of Tye man by catching the biggest salmon of the season and a place in the records of the club which establishes his fame for ever as an angler.

Dr. Smith's catch compares well with other catches that have made Tye men. The salmon which gave him the wonderful battle he so graphically describes in the Fishing Gazette, published in England, weighed 53½ pounds. M. E. Charleston of Vancouver, was the first Tye man with a 52½-pound fish which gave him the 1924 title. Dr. J. M. Gibson of Catalina Island, won the 1925 title with a 58½-pound fish. General Sir John Asser of Bermuda secured it the following year with a fifty-two pounder, and F. W. Coleman of Seattle was the 1927 Tye man with a 54½-pound fish.

HOW HE CAUGHT IT

Under the heading "Tye Fishing on Vancouver Island, How an Englishman Became Tye Man for 1928," Dr. Lewis alluringly describes the catch which made him a member of the Tye Club and his subsequent catches which won him highest honors.

There were but four days before me and I was due to leave," he writes. "Then my luck changed. It was a bright, sunny afternoon, about 4 o'clock, when I felt a sudden heavy tug on my line and struck hard as one must do with these big Tyes.

IN A FLURRY OF FOAM

"Like a flash he was away and the line was being torn off my reel at break-neck speed. After that I don't remember very much of what exactly happened. I know I sat down with the reel well up and as the good reel sang on my line and struck hard as one must do with these big Tyes.

Mr. Pennal's headquarters are in Regina.

WHIPPET HAS NEW CONTROL

Finger-tip System Finds
Favor With Automobile
Drivers

Distinctive features, mechanical perfection and beauty of design, as far as superior over those of the present day, light car as certain of the original Whippet features were over the light four-cylinder car of two and one-half years ago, are characteristic of the superior line of Whippet Fours and Sixes being presented by the Willys-Overland Company, and may have a marked effect in revolutionizing the light car field.

The bodies of the superior Whippet models have been newly designed, presenting greater beauty and larger size. The full crown one-piece fenders are sweeping in design and give an added touch of tone to the exterior appearance. The radiator is entirely new, being higher and larger, and gives the car a decided appearance of greater speed. The doors on all models have been widened, and with the increased roominess of the interiors provide ample room for entrance and exit.

FINGER-TIP CONTROL

Chief among the Whippet's mechanical features is the "finger-tip control," designed by many automotive experts as the greatest advance in driving convenience since the self-starter. By means of this "finger-tip control," all the functions of starting the motor, controlling the lighting system, and sounding the horn are concentrated on one single button—conveniently located in the centre of the steering wheel.

Another Whippet feature is the adoption of a new system of headlamps with a fixed focus arrangement. These lamps are double beamed, the upper beam being for fast driving, which necessitates the light being thrown forward along the road for a considerable distance, while the lower beam is not dimmed but simply a downward change in the direction of the beam to a shorter distance, thus giving full and complete illumination. The rear and stop lights are set higher and farther away from the body and fender so the largest license plates may be fitted without protruding over the side of the fender. The frame, which has been entirely redesigned, reveals a material improvement over the previous practice, and is marked by an increased sturdiness through the employment of new and heavier cross-member material.

STYLE OF BODY

Throughout, the Willys-Overland Engineers have aimed to produce a car not only of outstanding mechanical performance, but likewise the development of a style in body lines and finish, smoothness in color combination, that would place Whippet models in a class of their own.

Nurse: "Bobby, what would your father say if he saw you'd broken that 'mech' off?"

"Bobby," he'd say, "you're not so well made now as they were before the war."

Stenographer—I don't believe half I see in print.

Manager—Judging from your spelling, that must include what you see in the dictionary.

DR. LEWIS SMITH

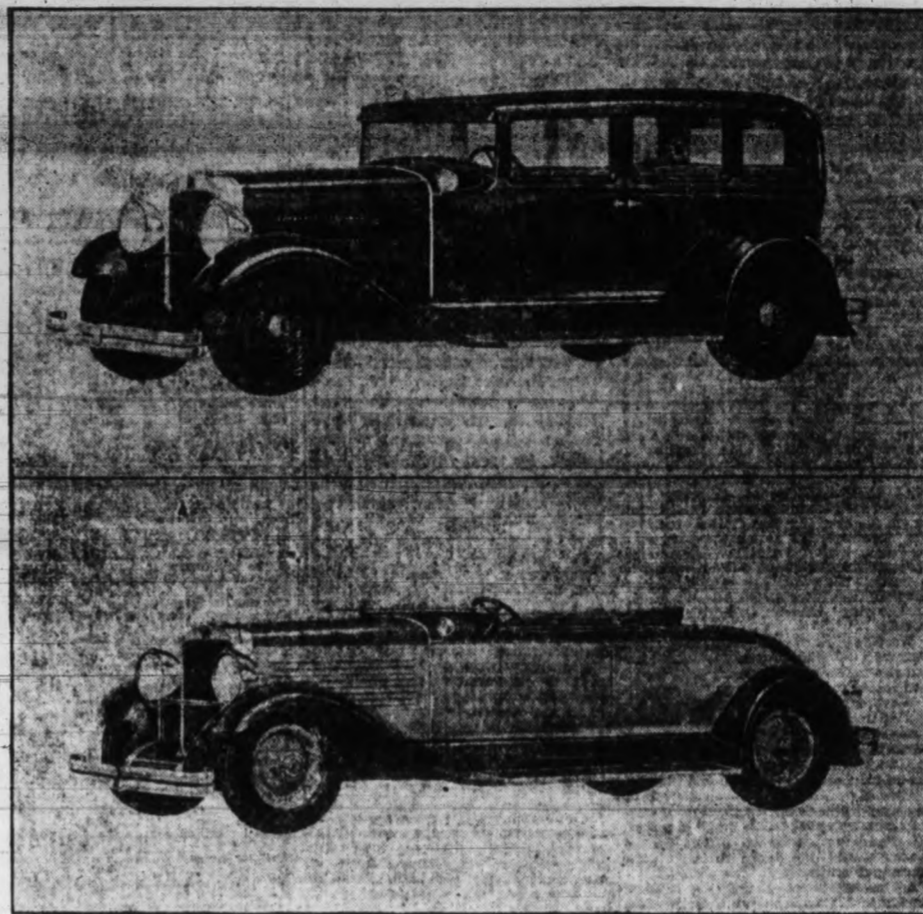

off line. And then I was almost surprised to find him, showing his silvery side, and knew the fight was over. . . and Joe had gaffed him into the boat and we two were shaking hands. He was a catch, thick, well conditioned beauty, silver bright with sea lice showing. A small head, no beak and a grand tail, thirty-eight half pounds, not a big fish as Tyes got, but his thirty pounds entitled him to a position of respectability in the Tye world, and made me a member of the Tye Club and permitted me now and evermore to wear the bronze button."

The doctor describes the battle with the fish he caught the next morning which won him the silver button and then that on the following day which made him Tye man.

THE PRI E

"Ye Gods, what a fight he put up," he says. "First a straight, furious rush; 120, 130, 140 yards at break-neck speed as though he would never stop with my reeling fingers on the spool and hand over reel-rim in a feeble attempt to slow him down. Then a sudden double-back towards the boat while one reeled in madly and prayed to save a slack line. Off again like a flash, this time on the surface with glimpses of brown and silver as he almost circled the boat."

NEW COMERS IN NASH "400" LINE

In this handsome new Special Six Seven Passenger Sedan (above), and dashing Special Six Roadster, The Nash Motors Company has supplied vital motoring needs in the moderate priced field.

"Early to Bed" Not So Good For Musician

"Early to bed and early to rise" may be a sound success formula, but it has undoubtedly been the ruin of many a great artist, according to Jean Goldkette, director of the Studebaker Champions, well-known radio concert orchestra. The programme of the Studebaker Champions is a very popular Sunday evening feature broadcast over nearly forty stations associated with the National Broadcasting Company.

Some ten years ago Goldkette had never been heard of in music. After a course in the Moscow Imperial Conservatory of Music he came to the United States to make his fortune.

After many vicissitudes he landed in Chicago. Musicians, as he knew them in Europe, were a starving lot. So Goldkette's ambition was for a business career. But he could not make himself get up in the morning in time for work. He secured a job in a factory, where he had to start work at 7 in the morning. It was too early for Goldkette, who usually spent half the night practicing and composing on the piano. He lost the job. He tried others, and lost them for the same reason.

To-day he is one of the outstanding musical directors in America and the originator of a new type of symphonic orchestra which has won him tremendous popularity. But if it hadn't been for a 7 o'clock factory whistle and that "early to bed—early to rise" formula for American business success he believes he would still be a factory hand.

The export trade of the United States for the fourth quarter of 1928 reached \$1,570,000,000 the highest since 1920.

Third Reading Given C.P.R. Branch Bill

Ottawa, April 13—A bill which enables the Canadian Pacific Railway to acquire the Lacombe and North-western Railway Company and a bill to authorize the railway to construct a line from Langan, Sask., to Prince Albert, Sask., was given third reading in the House of Commons last night.

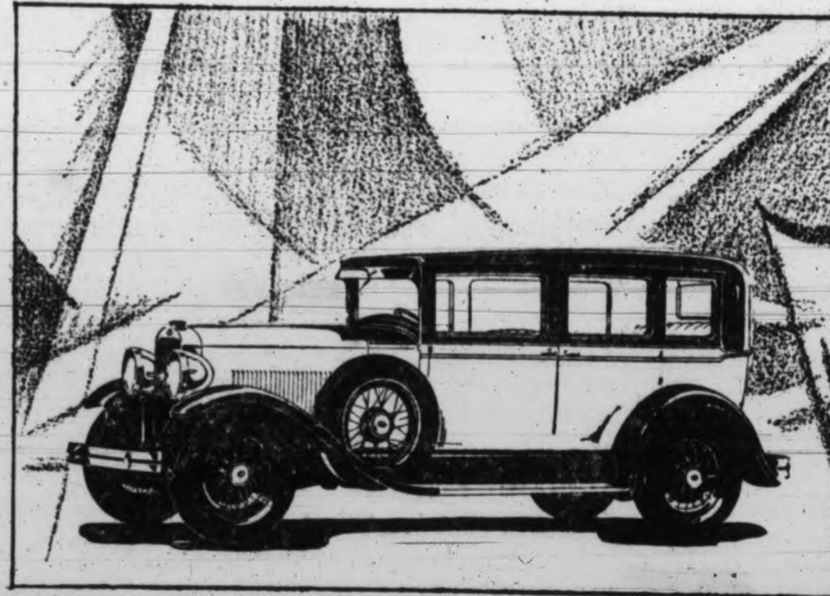

BUILT TO A FINE CAR IDEAL

THE Finer Oldsmobile is built as a fine-car should be built . . . to exacting standards of precision . . . to artistic conceptions of style . . . to an almost aristocratic idea of comfort.

Its engine is a fine car high-compression engine, developing fully 62 horsepower, offering notable refinements never before available in any but three or four of the highest-priced cars. For example, pressure lubricated piston-pins. These and such features as statically and dynamically balanced crankshaft, rubber engine mountings, rubber-silenced chassis, provide a delightful smoothness, even at thrillingly high speeds.

Its bodies are fine-car bodies . . . superb creations of Fisher skill and craftsmanship. Outside and inside they bear the unmistakable evidence of luxury . . . a richness of finish and completeness of appointments few cars at any price could rival.

And a host of extra features, additional refinements such as full-size radiator shutters, adjustable driver's seat, fine-car combination six-brake system, Lovejoy Shock Absorbers, make Oldsmobile's LOWER prices almost unbelievable. Come in and judge the car for yourself.

WHITNEY LETTER

By Branson, Brown & Co. Ltd.

HIGHER OVER THE WEEK-END

New York, April 13.—Whitney's of the Wall Street financial service says: "I believe that sufficient week-end profit taking was absorbed in the closing hour of yesterday's market so that what little remains will be insufficient to interfere with additional advance over the week-end. Preparations have been completed for the approximate \$300,000,000 disbursements in interest and dividends which will be made Monday."

Time money is now definitely available at one-half per cent below the 9 per cent rate, which has been in effect for weeks.

"It will be noted that the oil conservation programme is in accord with a plan which does not differ materially in its fundamentals from the plan which the industry has already submitted. The oil conservation programme, it is stated, will be the leading group of the market from this point on, closely followed by the steel. Yesterday's closing reaction again proves a decidedly attractive buying plant this morning."

COMMENT
Texas Gulf Sulphur has fulfilled predictions with the establishment of a new record for the issue in yesterday's market. I expect this advance to continue to-day, and would not hesitate in purchasing the stock within the range of 85 to 85 1/2.

"Yellow Truck and Coach has recorded another new top, reached to its previous top of the year, thereby completing its technical correction, and will continue its advance over the week-end, becoming firmly established above 30, perhaps in today's session thereby aiding the parent company General Motors, in an advance of its own, which should be much in evidence in to-day's market."

"The opportunity is still afforded to buy Standard Oil of N.J. below 60, Standard of N.Y. below 45 and Standard of California around 80, and these opportunities should not be lost."

"A new record for American Can has been recorded, but there is still no necessity for giving consideration to profit-taking in this issue."

"Protective committees representing both bondholders and stockholders of 'Interboro' Railway Trust, in its protective committee, these committees, representing the owners and creditors of the corporation, will work for the unification plan which will bring the stock back to its previous level of 100."

"The advance in U.S. Steel continues with every indication that it is to-day or at least by Monday, attention will be directed to the steel market. The advance in the steel market has been reached, and that early in the week we shall find this issue in the \$200 class, where it belongs."

"I continue to recommend the purchase of Associated Dry Goods, U.S. Ind. Alcohol, Marine Pfd., Monty Ward and Colorado Fuel."

Cash Grain Price Gaining on Futures

Chicago, April 13.—(By Branson, Brown & Co.) The Chicago Journal of Commerce to-day says: "While speculative trade in grain futures is fluctuating, awaiting the action of farm relief legislation at Washington, it is interesting to note that cash for grain at leading terminal markets, Chicago, Kansas City, St. Louis and Omaha, are gaining on the futures. It is also noted that there is no indication of liquidation of long-term in the speculative trade."

Lake of the Woods Milling Company of Winnipeg says: "Work on land was in progress last week, but by no means general. Some crops are reported, which seeding had begun. Heavy rain and snow were general throughout the three provinces in the latter part of the week. Topping of the soil, the moisture, however, improved the condition of the soil, especially in Alberta, where the land was dead and dry. Farmers can now go ahead and put in a crop with the assurance that there is sufficient moisture in the soil to assure germination."

TO-DAY'S EXCHANGE

New York, April 13.—Foreign exchanges irregular. Quotations in cents:
Great Britain—Demand 485, cables 485 1/2, 60-day bills on banks 486 1/2-16.

Pains in Back were Quickly Relieved

Says Manitoba Lady who used Dodd's Kidney Pills

"Dodd's Kidney Pills helped me right away," writes Mrs. T. H. Miller, a resident of Carleton Place, Ont. "I had a pain in my back and Dodd's Kidney Pills relieved me. I can highly recommend them to anyone suffering with Backache and Kidney Trouble. They are a great help to anyone affected in this way."

When you have Backache it is often a timely warning that the kidneys are not working as they should. Do not delay, but make and keep the body healthy by using Dodd's Kidney Pills. For over a third of a century they have been highly recommended as the best treatment for Ailing Kidneys. Others have found relief from Kidney Ailments—why not you?

"LOVE IS OF THE VALLEY"

By
DAVID LYALL

She spoke truly, being indeed on the verge of tears.

No compunction visited the heart of Lotta at the sight of the girl's evident distress. In some vague way she attributed their present misfortune to Beatrice as well as to her father. She had frequently come up against the Heron strain in her elder stepdaughter, something high and lofty and invincible, which had nothing to do with the mere commerce of life. At least, she thought it had nothing to do with it, whereas in Beatrice's case it was to be the dominating factor and was the mainspring of her action that day in visiting Madame Theodore and deciding on a business career. There is no sadder spectacle on God's earth than the poor gentleman stranded without means or friends, hedged about by the old traditions and conventions, the destruction of which caused her deeper mental distress than the material privations of poverty. And there are none more difficult to win than those who are natural and inherited pride urges her to hide her sufferings and to present a brave, uncomplicated, dignified front to the world.

It was the highest form of family pride which had enabled Beatrice to go to Madame Theodore, the pride which hates dishonor with an implacable hate. She had been better, that the step she contemplated would cut her off from her own social circle, and that for her there could be no retrieval. Yet it was her father's name, to shut the mouth of universal condemnation, she was willing to make what was undoubtedly to her a sacrifice of peculiar poignancy.

She suddenly realized that she had not sufficiently reckoned with her stepmother as a factor in the situation. At the back of her mind, possibly there had been a nebulous idea that the tragic turn of events, while it could not altogether sever their connection, might at least render close personal association neither possible nor desirable.

But there was Lotta, thrusting her rights in front, demanding that they were going to do with and for her. The whole of life needed fresh adjustment; it was even more complicated than Beatrice had imagined. She felt a sharp desire to get away from a strange weakening of all her powers.

"Well, talk it all over to-morrow," she said, rising to her feet. "I'm too tired to think any more."

"Tired?" Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

"No, no, I'm not tired," Lotta said, looking at her. "You're not tired, are you?"

she asked her stepmother to enlighten her further.

Lotta dropped her hands and glanced rapidly round the room.

"If we took some of the superfluous things out and put some leaves in the table, we could seat six easily, or even eight."

"Whatever are you talking about?" asked Ida, in a voice of complete mystification.

"And if you didn't mind sharing with me we could accommodate four, or even six, in the bedrooms, even supposing that Bee wanted to keep her attic. But perhaps she'll go and live with her dear Madame Theodore; then that would leave the clear floor for us and incidentally give us an extra room."

"You are thinking of boarders?" Lotta nodded.

"Yes, it's a paying game if you get the right sort of gentlemen only, and elderly for choice, for they like a bit of home comfort, and when they find it, don't want to change."

"But shall we be allowed to keep the house, or the furniture, even? Bee seemed to be doubtful about it the last time we discussed it."

"I'll be right up against it, and know what Bee has in her mind. I'll bestir myself. I'll make it my business to find a decent lawyer, and then I'll think I know of one. Then if we are allowed to sit on here, we can begin advertising and setting all sorts of agencies at once. You'd be willing to stop, I hope."

"Oh, yes, why not? I haven't any choice, have I? But I wouldn't be of much use. I could lay tables and arrange flowers and mend the linen."

"And look pretty, don't forget that. It would be a tremendous asset to the single gentlemen I have in my mind's eye."

That suggestion would have roused Beatrice to anger; it merely provoked a gratified smile on Ida's face. The future suddenly began to brighten and to present possibilities.

"Lizette isn't a bad sort, and if we can persuade her to stop on we might do worse. She had three or four boarders at three guineas a week, we should get our own board and Lizette's for nothing, and I can stop on and be earning good money. The wage she contributes to the rent if she didn't pay it altogether. I begin to see light, don't you?"

"It sounds all right, if we could get the boarders," said Ida, but there was a rather doubtful note in her voice.

"I think I could get the boarders," said Ida, but there was a rather doubtful note in her voice.

"I think I could get the boarders," said Ida, but there was a rather doubtful note in her voice.

THE TINYMITES

STORY BY HAL COCHRAN—PICTURES BY KNECK

READ THE STORY, THEN COLOR THE PICTURE

The Tynmites were tickled pink. Said Scouty, "Oh, gee, just to think that we're going through Thunderland. It fills me with delight. Before we found the Thunder Man I almost turned and quickly ran away from here. I thought that we were in an awful plight."

"The clouds seem, oh, so very high up here within the misty sky that I was really frightened, but I feel quite safe right now. It seems when we're in a mess, we have a heap of luck, I guess. No matter what our trouble is, we come through fine, somehow."

"Then Scouty piped up, 'Well, let's go! I'll be real tickled when I know how Mister Thunder Man runs things up in his weather land. I've seen it and seen it pour, but I would like to see much more. If everything's explained to us, I'm sure we'll understand.'"

The Thunder Man said, "Well, you

see, the weather's sort of up to me. If I think rain is needed, I just turn a storm cloud loose. But, if the earth needs bright sunlight, I keep the rain clouds closed up tight. I could have rained all the time, but frankly, what's the use?"

They walked through Thunderland a ways, and Scouty said, "I'm in a daze about the way you make the thunder that we often hear." The Thunder Man stopped. "Well, right now, I'll very gladly show you how. You'll hear a lot of noise, but there is nothing you need fear."

He reached behind a nearby cloud, and soon surprised the little crowd. He held a monstrous thunder drum, and then exclaimed, "Now hold your ears. I'm going to beat." The Tynmites found this was no treat. Scouty yelled, "Oh, kindly stop. We all have had enough."

Monday's Horoscope

MONDAY, APRIL 15, 1929

Threatening stars seem to rule strongly to-day, according to astrology, and it is

wise to be cautious in whatever offers any risk. It is a day likely to be most unfortunate in any sort of speculation, but it still offers many temptations to win easy money. Under this direction of the stars the judgment may be unreliable even in small matters. Decisions should be delayed. There is a sign read as warning that there

will be much muddled thinking on public questions and dangerous propaganda may be especially corrupting at this time. This is not a lucky day for aviation and a serious accident is foretold. Machinery may be especially treacherous while this configuration continues. Under this planetary government effort may be thwarted and initiative stopped.

Warning is given that quarrels may be easily started between nations as well as individuals under this star. Ecstasies and an exaggerated sense of individualism may be apparent in many persons who will be difficult to deal with while these aspects are strong.

Although reactionary forces that promise the swinging of the pendulum back to high women should be on their guard lest they make unreasonable demands on the family purse, for they will be susceptible to many shopping temptations while this rule prevails.

Persons whose birthdate it is have the augury of a year in which they must attain wisdom in managing their financial affairs. They should not seek changes of any sort. Children born on this day may be high strung and rather tenuous of ideas. Many subjects of this sign have talents as architects and builders. They may have real constructive genius.

CROSSWORD PUZZLE

HORIZONTAL

- Of what university is President Hoover a graduate?
- The spread of an arch.
- Electricified particle.
- Belong.
- Extra part.
- To exist.
- To quantify.
- What is the name used to describe the position of a golfer's feet while making a golf stroke?
- Kindled.
- Scalp covering.
- Shower.
- From what city does Vice-President Curtis come?
- Distinctive theory.
- What word is used to denote the end of a book?
- Chum.
- Swarmed.
- Portion of a school year.
- To overlap with a solid paint.
- What is the name of a young goat?
- To contaminate.
- To be a branch.
- Half an acre.
- A coral island.
- Membranous bag.
- English money.
- Nothing more than.
- Workman.

VERTICAL

- What part of Russia is in Asia?
- Diet of the foot.
- Variant of "a."
- Exploit.
- Heavenly body.
- Second hole in golf.
- A small particle of fire.
- Cooking utensil.
- Curved support of a bridge.
- Horn.
- Piercing.
- Machine used in cleaning cotton.
- Possessive possessive.
- Flabby.
- Sharpened as a razor.
- Like.
- Epithet.
- Imitated.
- A calendar containing astronomical data.
- A flared narrow flounce.
- Measure of area.
- Lively.
- Yeast.
- To allot.

HERE AND THERE

The total value of exports from this country during 1928 was \$5,129,000,000.

Tides in the Bay of Fundy raise to a height of 70 feet.

ANNA CASE WILL SING OVER ABC SUNDAY EVENING

To Be Heard in Programme With Rudolph Ganz at 7 o'clock To-morrow

The former star of the Metropolitan Opera Company, Anna Case and Rudolph Ganz, pianist-conductor, who at one time won the baton over the New York Symphony and the St. Louis Symphony orchestras, as well as the world-famous New York Philharmonic, will be the special guest artists of the De Forest programme to be broadcast over the Coast-to-Coast network Sunday evening at 7 o'clock, Pacific Standard time. In the West this broadcast will be released through stations of the ABC network.

The appearance of these two noted stars of the musical world marks the fourth of the splendid series of great artist concerts presented as the Spring feature of the De Forest hours.

HANDICAPPED IN YOUTH
In her youth, which was spent in the State of New Jersey, Anna Case was handicapped by parents whose religious beliefs made them frown upon the stage as a livelihood. Exposed to poverty made the possibility of obtaining the proper musical education remote, until a friendly neighbor offered her financial assistance to the extent of \$75. After a few lessons obtained by this money, Miss Case gave her first concert, through the proceeds of which she was able to repay the loan and begin the purchase of her first piano. Then came long hours with a musical coach, and finally an engagement as a church singer. Her first step into musical prominence was made through the governor of her native state, Governor Stokes, who ob-

COLEMAN TO TOUR P.G.E.

C.P.R. and C.N.R. Appoint Engineers to Assist in Railway Survey

Following the appointment of Canadian Pacific and Canadian National Railway engineers to co-operate with the Provincial Government in its survey of the Pacific Coast, Eastern Railway, it is announced that D. C. Coleman, vice-president of the C.P.R. western lines, will tour the provincially-owned railway next week with Hon. P. P. Burden, Acting Minister of Railways. They will go to the end of the steel at Quenel and motor from there up to Prince George through the country where it is expected the P.G.E. ultimately will be extended.

ENGINEERS NAMED

T. C. McNabb will represent the C.P.R. and Murray Hill the C.N.R. Both are well-known engineers in the service of the two transcontinental systems.

C. Rydell represents the Provincial Government, which will have charge of the investigation. These three experts will confer here shortly and examine the P.G.E. data already on file with the Government before commencing investigations in the field. The object of their survey will be to ascertain the value of the land grants set aside some years ago by the Legislature for the benefit of an extension of the railway north of that point to Prince George. He will also consider the relocation of the existing line south of Quenel.

Meanwhile J. Callaghan, Deputy Minister of Railway for Alberta, has reached Quenel and has commenced a survey which will select a route for an extension of the railway north of that point to Prince George. He will also consider the relocation of the existing line south of Quenel.

There are times when we question the pronouncements of the learned, but one of the things we have decided to prove for ourselves is the recent statement of a prominent naturalist that lions are near-sighted.

SUPPORT IS SOUGHT FOR LOCAL MUSICAL FESTIVAL

After Months of Telling Preparation, Third Annual Event Opens Next Tuesday Morning; Good Daily Attendances Will Show Community Appreciation; The Mendelssohn Choir and the Dr. Vogt Memorial Next Week; Victoria's String Quartette; Famous Cellist Retires With Glory; More Honors For English Conductor; Canadian Bach Singer to Take Part in Vogt Ceremony.

By G. J. D.

After many months in the herculean task of preparing the diversified and lengthy programme of a musical festival, President George Watson and other officers of the Victoria Musical Festival Association can well lean back and rest for a few short hours before the festival sessions open on Tuesday morning next. On the eve of this annual festival, the third in the Association's history, a few final words can appropriately be written on its behalf.

Given sunny days and clear nights, combined with the wholehearted support of the public of the Capital, this year's festival should prove a joyous and heartening experience.

The association's officers have done all that is humanly possible and it will be no fault of theirs if the five days festival does not reach to great heights.

IS COMMUNITY EFFORT

This is a community effort, and as such it should receive a community support. Nothing is successful without the people's endorsement. No organization, no body of enthusiasts, no group of devotees can flourish without the aid and encouragement of the general public. No matter how great the individual or the combined effort, and no matter how intelligent the arrangement, nothing can succeed without the hearty approbation of the public at large. It would prove of tremendous worth to all local women's and men's social clubs past the word around that there is a big musical festival in their midst. For the sake of art and culture in the city, they should be the resolve of all members of these organizations. It is little exertion enough when all things are considered, and the interest thus taken will be a gesture of thanks too, to the great mental strain of many anxious weeks on the part of the festival's management, which has been at all times enthusiastic, optimistic and harmonious.

HEALTHY SPIRIT PREVAILS

The prevailing spirit has again shown itself to be extraordinarily healthy, so much so indeed, that one cannot but be inclined to expect greater and better things in future years. Visiting adjudicators have paid high tributes to Victoria's youth and musical talent. Why not then, personal tributes from Victoria's citizens, in consideration and interest to local festival affairs? With good attendances the festival officers will fear no financial deficiency, and the festival will continue to live in the smile of fortune.

Last year the attendances in the concert hall exceeded the record totals of the first year. It is hoped this year public support will be commensurate with the cause. A week of music-making should bring no disaster, rather let it be desired that success will exceed expectations.

The evening programmes have been made particularly interesting, and the school authorities are assisting in the participation of many hundreds of school children in the choral, instrumental and folk-dancing classes.

CANADIAN SINGER AT VOGT MEMORIAL

It is interesting to note that among the soloists engaged for the Mendelssohn Choir's performance of Bach's Mass in A minor, which will be given at the Dr. Vogt Memorial window to the unveiling of its Memorial window to Dr. A. S. Vogt in St. Paul's Church, is the renowned Canadian Bach singer, Miss Beddoe. Miss Beddoe is a daughter of Thomas D. Beddoe, formerly of Toronto and Hamilton, who was widely known as a Canadian tenor in the "seventies and eighties." Mr. Beddoe still survives in New York. His memories of Dr. Vogt go back over fifty years.

Continuing its festival policy the Canadian Pacific Railway's seventh festival of the season held at Regina last month proved a great success. It was Regina's first folk-song festival. Others were held in this city (last Christmas), Vancouver, Quebec and Winnipeg. As in the case at other musical centres, Regina's programme included much music by Canadian composers, Toronto being especially represented. Each colony has its own folk-songs, opera, chamber music and choral works; these for the most part being written by Dr. Ernest MacMillan, Dr. Healey Willan, Leo Smith and Robert Manson.

MENDELSSOHN CHOIR AND DR. VOGT MEMORIAL

There has come to hand a circular from the famous Mendelssohn Choir of Toronto, which sets forth facts relative to the Dr. Vogt Memorial window and Bach's Mass in A minor performance for the dedication next Wednesday, April 17. All ex-members of the choir are invited to subscribe to the memorial, and the circular explains the design of the window which will be erected by an English firm. The general motif is the Te Deum, and outstanding of especial interest to Toronto people is the inclusion in the design of two medallions, one to represent Tchaikovsky's "Cherubine Song," the other, Paganini's "Children's Crusade," both of which were first performed at Toronto under Vogt.

Vogt's association with the Mendelssohn Choir has never been equalled, perhaps, in the same length of time by any similar body on the globe, and the greatest choir the world has ever known. Members nearest its rehearsal knew how it was done, and everybody under his magic hand with his baton, the supreme sensations when singing the words of the great masters. He sacrificed himself and his voice for his ideal. Particularly vivid are certain choruses in the Brahms Requiem; the phantom effect of the opening of Lotti's Crucifix; the surges of Elgar's "Caracacus"; the fury of "Scots Wha Hae"; the delicate ones of the Ave Maria.

Stella, the exultant double octaves of "How Sweet the Moonlight," the emotional tumults of the "Children's Crusade," and the omnipotent unities of colossal Sanctus in the B minor Mass.

VOGT CREATES MARVELOUS THINGS

Of the tune of his own choir, and not only says from the score before him. He possessed an uncanny sense of hearing, and he declared what he heard, he wished to create—greater and better.

VICTORIA STRING QUARTETTE MAKES FINE IMPRESSION

The Victoria String Quartette was off to a good start last Sunday afternoon in its first appearance since its reorganization. There was a large turnout of prominent musical people, and the keen interest displayed, and the enthusiastic reception of the four players augur well for its future. Milton Blackstone, the viola player of the famous Hart House String Quartette of Toronto, and a delegate to the National Council of Education, gave a delightfully instructive chat on chamber music. He said that the quartette of which he had the honor of being a member, had cost its sponsor, Vincent Massey, Canadian Ambassador to Washington, D.C., over \$30,000, and how pleased they all felt the quartette was assured to Canada for another five years.

'CELLIST AFTER THIRTY YEARS RETIRES IN GLORY

With unusual gifts, and of established musical integrity is Leo Schultz, a cellist, has since 1890 occupied the position as first cellist to New York Philharmonic Orchestra. Previous to 1890 he had already won fame and name. For nearly three years when he was only five—he was "toured" as a prodigy throughout Germany. After further study at the Kgl. Hochschule in Berlin, he became solo cellist to the great symphony orchestras of Berlin and Leipzig. When twenty-four he came to America, and for seven years soloist and principal cellist with the famous Boston Symphony Orchestra. This week glory and honor came to him on the occasion of his retirement from the New York Philharmonic, when Arturo Toscanini, said to be the greatest present day conductor, handed him his baton to conduct the orchestra in his own composition, an overture. A distinguished audience was present, who rose to cheer the cellist, then had known why not then, personal tributes from distinguished leaders' hands. Another surprise to the great cellist was a cheque for \$5,000 slipped in his pocket to mark his departure.

GOOSENS ADDS FRESH LAURELS

Eugene Goossens, the distinguished composer-conductor, has added fresh laurels to his alert musical career. Recently substituted for Leopold Stokowski, conductor of one of America's finest symphony orchestras, the Philadelphia Orchestra, it was said that perhaps the greatest compliment that could be paid to a conductor was to be named as the successor of Stokowski. Goossens adds the favorable impression upon Philadelphia orchestra audiences that he is a conductor of the highest characteristics, his authority and his profound knowledge of the music he places on his programmes. In one of the recent concerts, given by the orchestra, he conducted the "Der Freischütz" overture; the Beethoven Eighth Symphony, the Prelude to "Meistersinger," the Three Dances from "Hansel and Gretel," and the "Norfolk Rhapsody" of the English composer, Vaughan Williams.

'Wayfarer' Author Speaks On Monday

Rev. Dr. Crowther of Seattle at Metropolitan Church on Prohibition

Rev. J. E. Crowther, D.D., minister of University M.E. Church, Seattle, will be in Victoria on Monday and will speak in Metropolitan Church in the evening. Dr. Crowther is the author of the "Wayfarer," which has created a great impression wherever presented and is one of the most popular speakers on the Pacific Coast, having won international recognition. His address will be on the question of prohibition under the theme, "Christ or Barabbas."

Rev. Dr. Sipprell To Attend Mission Board Meeting In Toronto

Rev. W. J. Sipprell, D.D., pastor of Metropolitan U.M. Church, leaves for Toronto to speak at the Church of Canada, on Sunday and Monday evenings. He will then leave for Toronto to attend the meeting of the Foreign Mission Board of the United Church of Canada. During his absence his pulpit will be supplied by Rev. R. J. McIntyre. Rev. A. M. Sanderson, Dr. Wilson of this city, Dr. Sipprell expects to return on Saturday, May 3.

COLISEUM PLAYERS

PLEASE AUDIENCES IN FINE PRODUCTIONS

With a play which has caused much laughter and merriment among Coliseum patrons this week, the Coliseum Players, under the direction of Raymond "Toby" Leitch, will close the current week this evening with their production entitled "Toby-Hollywood Bound." There will be two shows tonight, the players taking the stage at 7.30 o'clock and again about 10 o'clock.

Mr. Leitch this week is in one of his finest roles, but the laurels in the current attraction must necessarily go to Leon Cluff for his fine performance as "Toby." Leitch, will close the current week this evening with their production entitled "Toby-Hollywood Bound." There will be two shows tonight, the players taking the stage at 7.30 o'clock and again about 10 o'clock.

As usual, Miss Leone Webber, daintily leading lady with the company, pleases her numerous friends and admirers, and wins plenty of applause by her charming impersonation of Miss Ade Daniels and Miss Esther Todd are the other four players, while Forrest Taylor, Loris Bagley and Paul Wallace complete the cast. It is a play worth seeing.

On the screen this week is a picture entitled "The Scarlet Lady," which stars Lyla de Putti. It is a story of Russian revolutionary days, and well portrays the stirring times of that period, following the Great War.

MOVING CAMERA PLATFORM USED FOR FILM WORK

Moving pictures that really move may be seen in "A Single Man," now playing at the Capitol Theatre as a Metro-Goldwyn-Mayer feature, co-starring Lew Cody and Helen Pringle.

In directing the filmization of the famous stage hit, Harry Beaumont shot nearly three-fourths of the picture from camera periscopes, moving platforms that enable the camera to follow the action literally.

By use of the moving camera platform, Beaumont obtained a number of novel scenes in which the audience experiences the impression of actually walking around the rooms in which the scenes were taken and being with the players as they go through the action.

Marceline Day and Edward Nugent head the elaborate supporting cast, which includes Kathlyn Williams, Eileen Manning and others.

"F. Hugh Herbert and George O'Hara adapted the play from the original by Hubert Henry Davies.

LOUISE LORRAINE WEARS WHITE FOR MOURNING IN FILM

Plain black, as a mourning costume, won't work on a very small woman.

So says Louise Lorraine, one of the smallest actresses before the camera, who attempted a mourning costume of plain black before the lens and discovered that it only looked like a chic street dress. Only when she used white to trim it could she obtain a proper effect.

LYTELL POPULAR AMONG FANS AS "THE LONE WOLF"

"The Lone Wolf" stories are among the most popular works of fiction to be made into motion pictures. Since the first "Lone Wolf" production several years ago, screen fans have been insistent in their demands that other

works of Louis Joseph Vance be made into photoplays.

Each year Columbia Pictures has released a "Lone Wolf" story with Bert Lytell in the title role. Lytell has become indelibly stamped with the character of the famous crackman and has won a large following among those who have never seen him in any other portrayal. To them Lytell is the "Lone Wolf."

Since the release of "Alias the Lone Wolf," last year Columbia has received several thousand requests for another feature depicting further adventures of the crackman. According to the demand Columbia produced "The Lone Wolf's Daughter," one of the greatest stories ever penned by Vance.

The production is being shown at the Dominion Theatre for the last time to-day. The cast includes, besides Lytell, Gertrude Olmstead, Charles Gerrard, Lillian Tishman, Donald Keith, Florence Allen, Robert Elliott and Ruth Cherrington. Albert S. Rogell directed.

SOUTH SEA PLAY CLOSING TO-NIGHT AT PLAYHOUSE

"Tropic Madness," fiery drama of love and languor in the South Seas, closes its local showing to-night at the Playhouse Theatre. Leatrice Joy, famous star of "Manslaughter," "The Ten Commandments" and a score of other successes has the leading role in a cast that includes such well-known players as Lena Malin, George Barnard, Henry Seelye and David Durand.

The action of the story is laid on a volcanic island in the Pacific, and the terrific eruption of the volcano forms a mighty thrill climax to the drama. It is a gripping story of the love of two women, and a society woman of the old world, the other a daughter of the "islands. Backed with stirring action and startling new thrills it is a drama that no one should miss.

"DESERT SONG" BROKE RECORDS

Lee Parvin, manager of Lillian Albertson's thrilling operetta, "The Desert Song," is in Victoria to-day conferring with Manager Deaneham of the Royal Victoria Theatre in reference to the forthcoming engagement of "The Desert Song," which will open a three-night stay at the Royal Victoria Theatre Monday, April 22.

Mr. Parvin states with considerable degree of pride that "The Desert Song" broke every record ever known in California where it played sixty weeks to a gross business well over \$1,000,000. The piece opened in Los Angeles at the Windsor Square Theatre, December 29, 1927. The capacity of this theatre not proving large enough, it was moved after three weeks to the Mason Opera House, where it played eleven weeks to the absolute capacity of the Branger playhouse. It was then taken to San Francisco where it played eleven weeks to the biggest business ever recorded in that city.

Returning to the scene of its earlier triumphs, it opened a return engagement this time at Miss Albertson's own Majestic Theatre, where it played

JAPANESE MOVIE QUEEN

Miss Sumiko Kurishima, awarded a movie contract after she was chosen as the most beautiful girl in Japan in a nation-wide contest, has proved a sensation in the two pictures she has made. The young star intends to visit Hollywood shortly.

NEW COLORS IN BEDROOM FURNITURE

We invite your inspection of our large stock of Bedroom Suites. The new colors, rose, mauve, green and silver-tone, are much in evidence. A Five-piece Suite, including dresser, chiffonier, vanity, bed and bench, \$139.50. Easy Terms.

825 Fort Street Phone 5119

thirty weeks, then returning to San Francisco for five weeks, after which it played the larger cities in the state. Returning to Los Angeles, it played a farewell return engagement at the Mayan Theatre, after which it left for an extended tour of Western America. "The Desert Song" will be seen in Victoria in its original entirety, according to Mr. Parvin. Perry Askam and Elvira Tanzi still head the original cast and company of 100. One of the features of the performance will be the symphony orchestra under the leadership of Cecil Stewart.

Manager Deaneham discloses the fact that the entire Metropolitan Theatre in Seattle was sold out before the company reached town and another week was put in to supply the demand for seats.

GARDEN COMEDIES PLEASE AUDIENCE

Co-optimists Score Big Hit in Double Bill of Brilliant Comedy

Two sparkling farce comedies presented by the popular Co-Optimists Comedy Company composed a most successful double bill at the Crystal Garden last night.

The two plays offered wide scope for the talents of the Co-Optimists and delighted an audience which took no opportunity to evince its appreciation.

"Between the Soup and the Savoury," a most amusing play dealing with a life in a big country house, was very cleverly presented by Mrs. Taylor, as the cook, Miss Doris Hassell, as the parlor maid, and Miss Betty Jennings as Tweeny, the kitchen maid.

Twenty purloins—some love letters from the room of the daughter of the house, and thus precipitates a quarrel between the latter and her fiancé. The pathetic little kitchen maid makes believe the letters have been written to herself by an imaginary lover. Stung by the taunts of the "superior" parlor maid, she boasts that she has a lover and produces the letters as proof. The cook discovers the fraud but good-naturedly agrees not to disclose it to the parlor maid, also promising as a great favor, to take Tweeny to "see her mother next Sunday"—the cook's idea of the highest possible form of entertainment.

"Elegant Edward" is the story of the adventures of a "gentleman crook" in attempting to rob Mrs. Treherne of a diamond necklace. Entering her apartment, he finds that he has been preceded by another burglar, whom he drives off the premises. Then he is surprised by Mrs. Treherne. He tells her that he is Sir John Carey and that he is investigating a suspicious noise in her apartment. Mrs. Treherne is sympathetic but obviously suspicious.

Week-end Cables and Special Dispatches From Across the Atlantic

Thousands Plan to Visit War Graves

More British to Make Pilgrimages to Flanders This Summer

London, April 13.—Although this year there is not to be a repetition of the pilgrimage to the War Graves, organized last summer by the British Legion, there will be a number of separate pilgrimages which will bring the total number of visitors to more than the 11,000 of last year.

Most of the British Legion pilgrimages will be arranged, as last year, to cover the week-end of August Bank Holiday. In a pilgrimage from the London area it is expected that more than 1,000 people will take part. The party will be billeted in Amiens, and will go from there daily to visit the war cemeteries, the famous battlefields and the more important memorials.

LORD HAIG'S VIEW

Some of these pilgrims may be able to arrange ceremonies in Flanders for August 7, two days after Bank Holiday. Lord Haig took the view that if any one day were to be celebrated in Flanders by the British visitors it should be August 7, the day took the great offensive. It was for that reason that last year the great Vespers ceremony, at which the Prince of Wales was present, was fixed for August 7. A pilgrimage will go from Kent on one week-end during July. Most of the British Legion pilgrimages are at their busiest during the holiday season, and especially at August Bank Holiday time. Many missed the great pilgrimage last year and are unable to get away in August this year.

"TO THE MISSING"

The Imperial War Graves Commission has arranged to unveil at Valenciennes one of the four impressive new memorials "to the missing" in the first week in August. Many of the pilgrims will probably wish to be present then, especially if the date is fixed near the beginning of the week. Other memorials "to the missing," one at Cambrai and the other at Ploegsteert, will be unveiled in June, and one at Le Touret will be unveiled about the end of September.

In addition to the Legion pilgrimages, hundreds of other visits have been or will be arranged by travel agencies or other organizations. Every one of last year's 11,000 pilgrims has told others how easy it is to visit Flanders and how impressive the experience is, so that many thousands more are expected to make the journey.

London Delighted By New Warship Named After City

London, April 13.—Now H.M.S. London is berthed at Gravesend, Londoners have an opportunity of seeing a ship bearing the name of the capital and one of the newest cruisers.

Those who take an interest in nautical affairs are surprised at the extent of freedom from waterline to deck on these new ships. This is a development that has come from the application of what is known as the standard displacement for 10,000-ton cruisers and it makes them look more like liners than fighting ships.

Since a vessel of the size of H.M.S. London cannot come nearer to the city than Gravesend, the ship has had to go to the shipyard. The Lord Mayor, with the Sheriff and Corporation, traveled to Tilbury by train and then were taken to the ship by admiral's barge.

The following day the visit was returned. Twenty officers and 200 men, accompanied by the band of the gunners, marched through the city. The Lord Mayor, in his robes of office, with the sheriffs in their scarlet, filed up between the ranks in the Guildhall, escorted by Capt. Rogers. The Lord Mayor told of London City's pride in having a man-of-war bearing its name, and a first London launched 300 years ago, and of the glory of the immediately preceding London's doings in the Dardanelles.

Then Sir Kynaston Studd asked the ship's acceptance of three handsome pieces of silver plate. Sir Charles Wakeford rose to present his ensign. Promptly at the word of command a midshipman with two petty officers marched in the hall to the dais.

"It is my privilege to ask you, sir, to accept this White Ensign to be flown from one of London's citizens who is going to the ship," said Sir Charles Wakeford. "It is an honor to be in command of a ship of this name," he said, "but I feel that to be in command of London is an even greater honor."

ROYAL WEDDING

Most recent of numerous royal weddings in Europe was the marriage of Infanta Isabel Alfonso of Spain, and Count Zamorsky of Poland, shown here after the ceremony in the palace at Madrid.

Invisible Ray To Guard Rare Relics In Exhibit

London, April 13.—The invisible ray known as the "Radivisor" is to be used to protect a priceless collection of historical relics and old silver which will be on view in May at Seaford House, Belgrave Square, the residence of Lord and Lady Howard de Walden, in aid of Queen Charlotte's Hospital.

The decision to use the ray was taken after prolonged discussion of the measures to be taken for safeguarding the exhibition by the grand committee, over which Princess Marie Louise presided, decided that the ray, with the aid of a small staff of detectives, afforded the most effective safeguard.

INGENIOUS BURGLAR ALARM

By the use of the ray, bells will ring all over Seaford House if any unauthorized persons attempt to secure access to the exhibits. Apparatus will be arranged in such a way that the invisible ray will "beam" from concealed and secret places across rooms. The rays will act on sensitive selenium cells, also hidden from prying eyes, thus making electrical circuits. As soon as anyone—even a cat or rat—crosses the path of the ray, the electrical circuit is broken and the alarm bells ring. The invention can also be arranged so that the bells will ring on a door being opened—or even when the door handle is turned.

Foreign Office Men Get Country Home

London, April 13.—More than one good cause is served by the acquisition of Swakeleys—a quaintly-named Charles I manor house near Uxbridge—by the Foreign Office Sports Association.

The association has entered into an agreement with the National Trust to maintain the architectural features of the mansion and to protect the amenities of thirty acres of adjoining land. This agreement, signed by the National Trust and the Society for Protection of Ancient Buildings, two bodies that have been trying for years to preserve this unique specimen of Stuart domestic architecture from building encroachments.

The owner contributed in no small measure to the movement for preservation by offering to sell the mansion and grounds on favorable terms to anyone who would undertake not to destroy the house and its surroundings, but to make the movement made slow headway against public indifference and calls on behalf of more urgent preservation schemes.

The idea of converting Swakeleys into a Foreign Office country club was put forward first by Lord Gerald Wellesley, a former member of the Diplomatic Service. The scheme has been carried through mainly owing to the persistent efforts and practical support of another retired diplomat, Merwyn Herbert. The Foreign Office staff consists mostly of modestly-paid clerical workers, and to them Swakeleys will be a most attractive rendezvous. It will be especially useful also as a place where members of the Foreign Office can spend their leave at home. Swakeleys is named after a fourteenth-century manor belonging to a Robert Swakeleys, but the present mansion was one of the first in England built by a member of a noble family, a "mercantile prince" of the sixteenth century.

Little Princess's Visit Aids Recovery of King George

"Ganpa" Was Bored At Bognor, But Elizabeth Gave Him Plenty to Think About

LONDON, April 13.—All the King's doctors and all the King's men couldn't have put Britain's monarch so happily on the road to recovery as a little three-year-old girl has done. As a result, the darling of the British public's loyal heart is Princess Elizabeth, third lady of this land—she is preceded in rank only by her grandmother, Queen Mary, and by her mother, the Duchess of York—and here's the way it came about.

King George is making his slow recovery to normal strength and health at Craigwell House down at Bognor. But time hangs heavily on his hands. He never has been a great reader or student. He is being spared the perusal of bundles of state papers, which used to take up so much of his days. He got "fed up" with simply sitting in an invalid's chair in the sun room and looking out at the sea.

THE KING WAS BORED

They brought down from Buckingham Palace his best crystal set so he could listen in. And they brought his pet parrot, which he had been fond of since he was a boy.

But it was all to no avail. The King was bored, plainly bored. Then came a happy thought. The Duke and Duchess of York were going to Norway to attend the wedding of the Crown Prince of that country. They would send Princess Elizabeth down to Craigwell House to prattle to her grandfather.

The King has always been fond of children. Princess Elizabeth and he are tremendous pals, and she is now just at the age when she says many delightful things. For instance, there is a yarn being passed around the upper circle which shows that the little Princess is not going to suffer boredom without a protest.

A FRANK DISMISSAL

A very important woman called at the home of the Duke and Duchess of York. While waiting to see the Duchess, at her own request, she was ushered into the playroom of the Princess. She asked a few banal questions, which the little girl promptly answered. Then she called came to the end of her string and a long and painful silence ensued. Whereupon

it is supplemented by another message when important developments occur later in the evening.

Special Report Gives King All News of Commons

London, April 13.—Every day when the House of Commons is sitting, a specially written description of the proceedings is telegraphed to the King, wherever he may be staying.

This duty in former times was discharged by the Prime Minister personally, but for some years now it has been carried out by the Vice-Chamberlain of the Household, who at present is F.C. Thomson, the member for South Aberdeen and Scottish Whigs the secretary of a harpist in the last House of Commons. The message, which is usually about 500 words in length, is dispatched in time to reach His Majesty about the dinner hour. Occasionally

it is supplemented by another message when important developments occur later in the evening.

A wide latitude is given to the writer of the chronicle, and as a rule, it is no formal record of the main events in the House. Color is given to the message by the inclusion of comments on political tendencies, on the currents and cross-currents of party activities at Westminster, and of brief descriptive sketches of the personalities who have figured most prominently in the day's proceedings. Such chronicles in the past have been known to include even the latest party joke. But although the message has frequently been written in a vein far removed from the style adopted in the "minutes and proceedings," its purpose is mainly informative, and the practice has been for many years in the Royal Household to file the messages for future reference.

CAROL AND MME. LUPECU

Apparently heedless of the court intrigues that swirl about them, former Crown Prince Carol and the beautiful blonde Mme. Lupecu, for whom he has named the throne of Roumania, are familiar figures at continental racing places. How they are pictured together at the automobile races in the picture above.

Princess Elizabeth . . . had lots to talk about with "Ganpa."

The Princess rang the bell. When a servant came, she said: "This lady wants to go home."

"The little girl was carefully coached before she went to Bognor. 'Ganpa' would not be well enough to play 'bears' with her, one of their favorite romping games. But that was all right. She had lots to tell him. There was Christmas, for instance. 'Ganpa' had been all the while she had been about the new additions to her nursery family. And she took the King in on a tremendous secret. It seems that one of her nurses had finally explained to her that she had a very exalted rank. She summed it up for 'Ganpa' in a sentence.

"Me Lisbeth—Princess." Then the little girl looked out of the window and she had lots to discuss with 'Ganpa'. It was the first time in her life that she had seen the sea and sand on its shores. These things gave rise to endless questions which 'Ganpa' could answer, because he used to be a sailor.

So the King spent happy hours trying to convey to her child mind how much water there is in the sea and what strange fish live in it and what big ships it bears on its waves.

"Ganpa" WENT SHOPPING

The send intrigued Elizabeth so much that she very next day came down to Bognor and shopped just like any other woman. She bought various molds, and a little pail and shovel, and that afternoon when the sun was warmest, the little Princess with one of her nurses spent a happy hour on the sands.

That led to more excited conversations with 'Ganpa' the next day, and everyone at Bognor says she has been the best tonic the King has had during all his long, dangerous illness.

All these beauties can be seen just now in St. James's Park, which is just one minute's walk from Charing Cross. St. James's is surely the most beautiful park any capital ever had, with its orderly wilderness, its bird sanctuary and its air of calm. It might be called the King's front garden, for it stretches the whole length of the Mall from the courtyard of Buckingham Palace to Charing Cross.

The Prince of Wales and his brothers are fond of walking there in the cool of summer evenings, when the setting sun makes the whole scene one of splendor.

The Earl of Balfour used to be seen there almost every day, and whenever possible the members of the Cabinet make their way to Downing Street through its winding paths. Ramsay MacDonald, when he was Prime Minister, found the park suitable for his usual early morning ramble, and for years during the war, Lloyd George made a daily circuit of the then dry lake.

But the statesman who appreciates it more than all others is Mr. Baldwin. He loves to steal away there for a quiet, contemplative smoke. It was during the general strike in 1926 that Mr. Baldwin first discovered the peacefulness of the park. When things looked their blackest, when there had been Cabinet meetings, consultations and conferences, he would go there for reflection, and spent hours in watching the pelicans strutting up and down by the lake side.

STEALS CANNED MUSIC

London, April 13.—A van containing 2,000 phonograph records rolled along Old Street, stopped and the driver got out. He entered a building and while there, someone made off with the records, leaving the empty van standing.

New Song For King Stirrs Enthusiasm

London, April 13.—An amazing scene accompanied the first singing of "God Bless King George," the British Song Society's new number, written by W. Allen Barker and composed by H. C. G. Stevens. When, the other night, Olive Sturgess, at the Central Hall, reached the chorus:

"God bless King George, Great Britain's King,
His sons of Empire pray,
May health and peace, with love attend,
And sunshine light his way."

the vast audience were so moved that, half-way through, they stood up and joined heartily in the singing.

HERE ARE LATEST EPIGRAMS, ALL FROM LORD DEWAR

London, April 13.—Some of Lord Dewar's latest epigrams are:

"Samson got some wonderful advertising results when he took two columns and certainly brought down the house."

"If a man upon his trade relies, he must either bust or advertise."

"The lions of society are tigers for publicity."

"Were it not for a man's faults he might live and die without ever hearing his name mentioned."

"Nothing deflates so fast as a punctured reputation."

"Some people are always looking for a new kind of mistake to make."

"Success is merely a matter of buying your experience cheap and selling it at a profit."

"Many a false step is made by standing still."

"Footprints on the sands of time are not made by sitting down."

Abbreviated version: Attempts to distinguish between the gentleman and the "gent" recall a definition attributed to Judge Wightman, the father-in-law of Matthew Arnold. Once, in the course of examination, a witness referred to a certain person connected with the case as "an independent gent."

"An independent what?" inquired Wightman.

"A gent, my lord," replied the witness.

"Oh, I think I understand," said the judge. "That's something short of a gentleman, isn't it?"

Actress Now Eighty Remembers Soldiers Coming From Crimea

London, April 13.—Dame Madge Kendal, whose eightieth birthday was honored this week, is one of the picturesque figures surviving among us.

She is often linked in memory with Lady Frances Balfour, though their interests and their opinions run on different lines. Both possess the rich vitality of their period, and also an individuality that shows itself by their style of dress, which yields nothing to modern fashions, yet does not look strange.

Dame Madge comes of a theatrical family, and began her stage life at the age of five or six. She was a sister of Tom, Richard and John, who brought a new naturalism into the English theatre. "The Kendals" was a household word among all Victorian theatregoers, and though the present generation never saw them act, the enthusiasm of the elders and the charm of Dame Madge herself still keep alive something of their art.

In a birthday message, she says she can just remember the return of the soldiers from the Crimea, and can recall the sweet face of Florence Nightingale—that angel of the wards whose great work for the wounded laid the foundations of modern hospitals. And she can remember the grave words spoken by her father during the years when she grew from childhood to girlhood. The times were troublous; the intense excitement of the war had left its aftermath. Men had faced the horrors of war, but as war could be, they, women had waited with anguish of heart.

When victory came, the revolution of feeling took much the same directions as it did in 1918—sixty-three years later. There was, her father often said, a turning-away from religion. Weaker men and women tried to forget God by hectic living, seeking some compensation for the failure of their faith. Subject to the variation of time, conditions were much the same in the late fifties as they have been since the War.

VERSATILE CLOCK

London, April 16.—The clock made for Pope Sixtus V. now in the medieval room of the British Museum, is three stories high. It tells on its dials the fast days, signs of the Zodiac, the motions of the sun and moon on their courses. The gods of the days and weeks are represented. The four ages of man strike the quarters on a bell.

Queen Emma, 71, Goes On Long Trip For Art's Sake

LONDON, April 13.—Emma, Dowager Queen of Holland, the other day broke all recent royal records for hostile and long travel, despite her seventy-one years, the lure being masterpieces of Dutch painting.

For two months there has been an exhibition of Dutch art for the period 1450-1900 at the Royal Art Academy in London.

Andrew Mellon, secretary of the United States treasury; Mrs. Schwab, the steel magnate; the Governor Fuller of Massachusetts; Jules Beche, the New York banker, and Jacob Epstein, the Baltimore capitalist, sent priceless Rembrandts which had not been seen in Europe for many years. Bankers Beche and J. P. Morgan also sent their paintings by Frans Hals. More than 200,000 people have paid admission to see the wonderful exhibition. Queen Emma of Holland, the greatest royal connoisseur of paintings in Europe, decided to come to London, despite the pleadings of her family.

A 560-MILE TRIP

It meant 400 miles round trip by sea in stormy weather and 160 miles round trip by rail. But the old queen kept absolutely to schedule. Early birds at the galleries found themselves barred from a room by a couple of London detectives. Inside the room they saw a sweet-faced old lady who wore gold "specs." Her bright silvery hair was done up at the back in a knob. On her head she wore a black, old-fashioned bonnet tied under her chin. The only touch of color on it was a slender white facing of satin.

She wore a business-like black cloth suit which came way down to her feet. In one hand she gripped her handbag and in the other she held her umbrella.

She was accompanied by Dr. Schmidt, the famous Amsterdam Rijks Museum, who discussed the pictures with her. The old queen tirelessly went from room to room, spending a considerable time before each picture. Naturally she spent most of her time before the foreign-owned pictures, most of which were new to her. When one of her entourage suggested she rest, she replied: "No, I came over to see pictures and pictures I am going to see."

She stood a long time before Jules Beche's "Jesus Christ" by Rembrandt. "That alone is worth the trip," she observed.

PART OF THE CROWD

Then the old queen did a gracious thing. She noticed the crowds were

Queen Emma . . . just like your own Aunt Emma, pictured as she arrived in London to see some famous paintings.

being kept out of each room as she entered it. She asked that this order be abrogated. From that time she was just one of a crowd and seemed thoroughly to enjoy it.

She stopped at 2 o'clock to take a sandwich and a cup of coffee and then indefatigably resumed her tour of the galleries. It was well after 3 in the evening when she called it a day.

Queen Emma married William III of Holland and was left a widow thirty-eight years ago. She acted as regent for eight years until her daughter, Queen Wilhelmina, became legally of age.

Lloyd George Happy Again As Fight Starts

Bombardment By Conservatives and Labor Advertises Liberal Policies

London, April 13.—Rapid progress is being made with the parliamentary work of clearing the way for the dissolution, which is expected to take place not later than May 10, so that the general election may take place on or about May 30.

Fears are being expressed that an election campaign centring on Whit Monday as nomination day will be very unpopular in health resorts; and in Manchester, where Whitecliffe is observed as a general holiday, protests are being made by all the political parties. Whether these protests and fears are likely to lead to any change in the dates is doubtful; although it must be kept in mind that the dates have not yet been definitely fixed.

Naturally there is much interest in the results, although it should be remembered that they will not necessarily provide clear pointers for the general election, seeing that the polls are being taken on the old registers. The new registers, which come into force as from May 1, will contain the names of over 6,000,000 new voters, including many women, and the result of the general election will depend very largely on how they vote.

IN THE LIMELIGHT

All parties are trying to secure the attention of the new electorate and for the moment, at all events, that astute electioneer, Lloyd George, can claim that he has secured for the Liberals very considerable publicity. His scheme for the relief, or indeed, for the abolition, of unemployment, has certainly aroused both criticism and discussion.

Conservatives and Labor, who have been bombarding one another in a rather desultory fashion at long range, have now changed their target and are combining to give Lloyd George and his scheme an intensive bombardment. This, of course, suits Lloyd George exceedingly. In the first place, he loves controversy, and in the second, the bombardment only serves to draw the attention of the electors to the Liberal proposals. There was always the risk that they might perish still-born, but that danger seems to be past. Right they may be, quite prominently among the election issues.

The effect of the bombardment has been to invigorate Lloyd George. He has quite regained his old platform liveliness, and the series of speeches which he delivered in Cheshire and North Wales were reminiscent of old days.

Mr. Baldwin has taken the field, but his speeches are devoted more to criticism of the Liberal and Labor programmes than to an exposition of what the Conservatives mean to do. His party would like a lead, but the Prime Minister does not seem to be in a hurry, and perhaps the fact that some of the Conservative proposals were inevitably connected with the budget has compelled the Prime Minister to delay the unfolding of his full programme.

What the country will think of the various issues is, however, a great secret which none of the parties will be able to penetrate before the result of the election is known. There is very little material for the political tipster to go upon, and the result appears to be as uncertain as that of the Grand National!

Televox Lights Flying Field On Siren's Call

New York, April 16.—"Mr. Televox," the famous mechanical robot manufactured by the Westinghouse Electric Manufacturing Company of Pittsburgh, the other evening demonstrated his extraordinary serviceableness, when, in obedience to the warning call of the siren of an approaching aeroplane, he turned on a flood of light over the air port at Newark, New Jersey, without the aid of a human hand.

"The air port pilot who made the test approached repeatedly from various directions at different altitudes, and each time the Televox robot automatically switched on the flood of light over the field the 24,000,000 candlepower electric light transformed the landing area from midnight darkness almost to daylight. The pilot would have had difficulty in locating the field some times but for the prompt illumination in response to his calls.

BOOKS OF THE DAY

Of knowledge and goodwill?

Coast Erosion North of Cowichan Head By Robert Connell

THE visitor to Cordova Bay looking north along the shore-line can see in the distance a high cliff of pale color, resembling the south shore of James Island further off. To reach Cowichan Head by the sea shore is an arduous undertaking. The road is preferable. Mr. A. H. Morrison and I went out there the other day, taking a road that turns off at right angles, a mile or two beyond Elk Lake. After passing Hamlet, with its new face the road runs along the edge of one of the ridges of sandy soil that rise above the Maywood claylands of the old farms in the valley. To-day the sides of the ridges are being cleared and planted with strawberries, for which they give a warm and early soil. Crossing the broad acres opened to the plow by the men of an earlier generation, with great barns and comfortable houses, we come to a steep winding descent that brings us in a few minutes to the broad flats that represent a filled-in lagoon and a raising of the shore-line comparatively recent years. In the early Spring, before the

varied greens of the later season have clothed the starkness of the low-lying ground, the scene is a desolate one. On land to the left and now enclosed by already old fences lie innumerable small, irregular patches of land, some of which are a somewhat similar condition, though on a very greatly reduced scale. The land on the right is cleared of debris and its covering of short grass is cut in places by ditches filled with water of a dark brown color from the peaty soil. Further on the pasture gives place to a dense thicket of salmonberry eight or ten feet high, above which rise the wooded slopes. This is the character of the area about the end of the road at what is now called "Island View Park" from its delightful outlook on the San Juan Archipelago.

RIVERS OF SAND

Following the beach, where the low tide gave

us an unimpeded if somewhat too yielding a footing we came at length under the high cliffs of sand which furnish the material for lagoon bars and resulting natural reclamation areas. Perhaps one of the first things that struck us was the recent character of the erosion from which these cliffs have been cut. It is only necessary to see how it has cut into the tree-covered sandy slopes that mark a long, resting stage in this work of coastal demolition. The slopes are of sand and at the same angle as the new ones lower down that are forming to-day, but they have in the process of the years grown a carpet of moss and plants and an open forest of firs. Into this the forces of destruction are boldly and vigorously cutting their way, and the new slopes are dotted with trees upturned by them.

In doing so they produce certain structural peculiarities. There are first of all the cliffs of sand with little scores between, marking different beds. Back into these cliffs are cut sharp V-shaped notches through which the drainage from

above passes and by which they are cut and enlarged. In some places, very noticeably towards the south end, the erosion has proceeded to a point where there may be seen pyramids of sand standing out from the main body like the "hoodoos" of the Thompson River country. These sand-pyramids are capped by clay, which can be quite easily traced as a broad dark damp band for a long distance, dipping from the summit of the cliffs so persistently that at last it reaches sea-level and disappears below the sand at Cowichan Head. It is characterized by the presence of fossil shells of interglacial age.

Much of the sand is as fine as clay with a pleasant soft smooth feeling, but it is in reality a very fine sandstone made up of microscopic particles of quartz, feldspar, hornblende, epidote, etc., but with the first two minerals in by far the larger quantity, so that the color is very pale. It stands up well in spite of its softness, and boys have carved their initials on the walls. At the base of the cliffs, where they meet the shore, allu-

viat cones or steep-sided fan-shaped deltas are built out onto the beach. In some cases the transporting agent is water, and the wet sand has run across the strand, extending its lobes across logs and boulders indiscriminately. In others gravity alone seems responsible, and here the critical angle of the sand exactly corresponds with the wooded slopes. Along the exposed cliffs beyond the first little point the sand is in continual movement. Everywhere streams of sand run downward and the pebbles of the gravel come racing down, jumping from slope to slope. Along these slopes the wind, too, plays its part, and even in a quite moderate breeze one can see the sand lifted and carried along horizontally.

Above the clay belt a few feet is a line of unconformity. Here the upper beds of sand cut across the beveled edges of the underlying beds in a very regular fashion like the relations be-

tween forest and topset beds in a delta, but whether that is the interpretation it is impossible to say without a closer examination than we could give in the time at our disposal.

There is a second piece of raised beach near Cowichan Head with a little Summer cottage and a charming piece of woodland behind. These moist woods are the favorite haunts of the trillium and the wild hyacinth, whose white flowers, especially those of the former, make the forest floor a place of beauty in scene and color in the appropriate season. Here an air of security reigns. The sea rests from her work. The old cliffs behind are shrouded by their sheerness and their sloping sides are now thickly timbered. But about the sea one can never tell. Mariners and landmen alike have learned to hold her a fickle jade, nor for the matter of that are her sisters of the atmosphere more to be trusted, for it is they, frost and rain in particular, that have torn afresh the healed flanks of the cliffs.

Dreamed the "Cloudscraper" 47 Years Ago; Now Architect Gets His First Recognition

SOMETIMES dreams do come true—although occasionally the dreamer has to wait a long, long time.

Forty-seven years ago a Minneapolis architect, just turned thirty-four, dreamed of a new kind of building for big cities, a building that should tower high in the air, relying on steel instead of stone for its strength, lifting its occupants three and four times as high above the streets as any buildings that then existed.

He devised a formula by which such buildings could be erected. He patented it, and he foresaw himself growing rich and famous collecting royalties from the construction of all such buildings.

ARCHITECTS DERIDED HIM

But instead he won ridicule and derision. Architects and builders called him a crank, and "crack-brained" was one of the nicest adjectives applied to him. Then, later, when his idea came into use, he couldn't collect his royalties. Unless—but it's time to go back and start at the beginning.

The architect is Leroy S. Buffington, builder of many of the best-known structures in the Northwestern United States and Canada. He has designed forty-two hotels, the old Minnesota state capitol, numerous apartment houses, railway stations and many University of Minnesota buildings.

In 1882 he had just completed a seven-story office building in Minneapolis, using more cast iron and I-beams than was usual at that time. Musings on his accomplishment, he thought somewhat as follows:

"Some time, even in this vast country, land is going to be too valuable in our big cities to confine our buildings to seven or eight stories. Some method must be devised whereby we can build much higher."

So he set himself the task of finding such a method—although the finding of architects and structural engineers of the day said it was impossible.

"My first real inspiration," he said, "came when I read a translation of the 'Clouds of the Future' by a French architect, in which he said: 'A practical architect might not unreasonably conceive the idea of erecting a vast edifice whose frame should be entirely of iron and clothing that frame with stone.' But iron must be kept in masonry; it cannot be allied with masonry."

TRIED MANY PLANS

"For many nights I sat at my drawing desk, working out plans and then abandoning them because of their impracticability. At last the idea came into my mind of a cloudscraper—that is, what they should be called, for skyscraper means nothing—in which the masonry veneer was supported at each successive story on an iron shelf.

"Two years after I set to work on the project I drew up an application for a patent. I drew up plans for a twenty-eight-story building in accordance with my theory and at the same time erected the West Hotel here, adopting in its construction the same principles. It still stands and is as strong now as the day it was built.

"Finally, in 1888, I was granted a patent. Then you should have heard

Leroy S. Buffington... his dream took form in steel and stone

the decision. 'Crack' 'fool' 'notoriety' and 'Mae' 'epitaph' were hurled at me. I still have 500 clippings from various publications of that time, telling what a half-brained rascal I was. Everyone just knew I belonged in an asylum.

"But in a few years it became evident that there were quite a few men willing to take my ideas and put them into operation. Cloudscrapers, according to my plans, began going up in a modest way. I called the attention of the building and owners to the fact that they were infringing on my patent. They refused to settle and I went to

court with several of them. The result was that I spent \$30,000 and never collected a cent. Year after year I tried to cash in on my idea—but always I was done out of my royalties.

"Until just the other day."

GETS FIRST ROYALTY

The old gentleman pointed out of his office window to the towering frame of a building under construction nearby.

"You see that cloudscraper going up down there—the Rand building," he said. "I'm receiving my first royalty off of that. And I didn't know a thing about it until the other day, long after it was started."

"I can't realize it yet, but it's true. After thirty years of litigation, after my patents have expired, along comes a man I never saw and generously offers to pay me a royalty on my invention, which he could have used the same as the others, without cost.

"It's just a recognition where recognition is due," he told me. "The exact amount he would have had to pay had my patents been in force and had I made them stick in the courts."

"I am old, but I'm not broke and an object of charity. The cheque is quite acceptable to me for its intrinsic value, but much more than that I appreciate the recognition. For there is no doubt about it, as that Rand has learned after extensive investigation, that I did what no one else did—invented one of the three stages of architectural construction."

WELT OBLIGED TO PAY

The building on which Mr. Buffington got his royalty is being built by Rufus R. Rand, millionaire Minneapolis capitalist.

"In the old days," Mr. Rand explained, "my grandfather had an office in the same building with Mr. Buffington. I remember him telling me that Mr. Buffington was the real father of the skyscraper and that he was eulogized out of the benefits he was entitled to. I have since satisfied myself that such is the case."

"Without the genius of Mr. Buffington, my new building probably could not be erected to-day. Should I deprive him of his royalties just because I could do so under the law?"

Now, what we should say reversing the ritual, is this: "Well, if you were a young man, I probably would do this or that about it. But I am not; I am I and you are you, and I am who I am and you are what you are, with different impulses from mine, different heritages, different tempers, different viewpoints, you'll have to handle this job your own way—and may the Lord have mercy on your soul."

Now, Dr. Will C. Durant is a professional philosopher—Dr. Durant is credited with having said that a man past thirty is incapable of love; and I, as one of a selected group, am asked to answer the question: "What is scolding?"

A personal opinion emotionally expressed!

Now a personal opinion is a good thing in its place, but just as soon as it turns to carping and criticism, there is nothing in the world that we have less need of than that very thing.

I wonder how many parents realize that when they scold children, almost invariably, it is relief they are seeking for themselves. It acts as an outlet, a safety valve for their own strained, outraged nerves. It is an "emotional explosion," in psychological parlance.

Behind it all, or under it, is the burden of responsibility. It is right to assume that all parents wish to do what is right by their children—that feeling, and the responsibility that goes with it becomes reflex after a while, the parents themselves are unconscious of it. But this very thing, this latent feeling of being accountable for a child's behavior, makes all of us the more vulnerable to any breach in that behavior.

A child misbehaves. It reflects instantly on the capacity of the parent to control, at least in that parent's mind it does, and the reaction it sets up is instant defence. Scolding follows.

Scolding is more than mere out-spoken criticism and complaining. It is almost entirely selfish in its inception, being both a defence and relief to the scolder.

Nothing was ever gained by scolding. Telling a child of his faults is a different story. Certainly that is necessary, as we know, but it should be done without heat or anger, or what is worse, still, sarcasm. Sarcasm is lost on little children, but it is quickly understood by older ones. It is silly and extremely cruel.

I should try to keep scolding out of the home as I would disease. It is a bad habit, and the worse of it is that not only the culprit but the scolder is made a sufferer. It soon loses its efficacy as a weapon, and at best the only thing it does accomplish is fear. That, as we know, is a very questionable authority.

It is the very thing we are trying to get away from in our advanced knowledge of children and their early training.

Is Thirty The Love Deadline?

By IRVIN S. COBB

The trouble with a professional alienist is that he never meets persons. He only meets subjects.

And the trouble with a professional philosopher is that he tries to measure the infinity of human nature by the little tape-measure of his own experiences, his own limited observations, his own faulty powers of deduction.

The alienist doesn't say: Here is a seemingly attractive individual. I shall cultivate him. He might make a good friend, a sprightly companion. Not at all. What inwardly he says is: "Here is a case. I shall study its inhibitions. It may constitute a new type. I might even be able to put it into an article or a lecture." He has a perfectly rotten time, going along through life. He's bound to have. Existence for him is a cold-index system, a filing-cabinet full of neatly-labeled specimens, an orderly collection of disordered curios, and this world is a gaily colored "shoebox" in which all creation is asked and each living creature—with the exception of himself and—possibly a few of his brother-alienists—is mentally out of focus.

On the other hand, the philosopher says: "Ah, here now we have a condition. I shall apply to it the processes of my own peculiar and personal school of philosophy." And, having arrived at a conclusion, will broadcast it forth as being positively the last word on that particular topic. He has a lovely time of it. Anybody who thinks he is infallible always does have a lovely time of it—while he lasts.

To be sure, the philosopher is like the run of us except that we apply to a concrete example our own little separate philosophies, whereas the philosopher, having the entire race of the whole universe spread himself out so that you can look right through him and see his back sander-bush.

A friend comes to us with a harassing private problem. He has reached that deplorable stage where he seeks advice for solving a problem which, in the final analysis, only he can solve. He follows an ancient formula. He says to us: "If you were in my place what would you do about it?"

And glumly we answer: "Well, old man, if I were you I'd do this—and so about it."

Now, what we should say reversing the ritual, is this: "Well, if you were a young man, I probably would do this or that about it. But I am not; I am I and you are you, and I am who I am and you are what you are, with different impulses from mine, different heritages, different tempers, different viewpoints, you'll have to handle this job your own way—and may the Lord have mercy on your soul."

Now, Dr. Will C. Durant is a professional philosopher—Dr. Durant is credited with having said that a man past thirty is incapable of love; and I, as one of a selected group, am asked to answer the question: "What is scolding?"

A personal opinion emotionally expressed!

Now a personal opinion is a good thing in its place, but just as soon as it turns to carping and criticism, there is nothing in the world that we have less need of than that very thing.

I wonder how many parents realize that when they scold children, almost invariably, it is relief they are seeking for themselves. It acts as an outlet, a safety valve for their own strained, outraged nerves. It is an "emotional explosion," in psychological parlance.

Behind it all, or under it, is the burden of responsibility. It is right to assume that all parents wish to do what is right by their children—that feeling, and the responsibility that goes with it becomes reflex after a while, the parents themselves are unconscious of it. But this very thing, this latent feeling of being accountable for a child's behavior, makes all of us the more vulnerable to any breach in that behavior.

Now, Dr. Will C. Durant is a professional philosopher—Dr. Durant is credited with having said that a man past thirty is incapable of love; and I, as one of a selected group, am asked to answer the question: "What is scolding?"

A personal opinion emotionally expressed!

Now a personal opinion is a good thing in its place, but just as soon as it turns to carping and criticism, there is nothing in the world that we have less need of than that very thing.

I wonder how many parents realize that when they scold children, almost invariably, it is relief they are seeking for themselves. It acts as an outlet, a safety valve for their own strained, outraged nerves. It is an "emotional explosion," in psychological parlance.

Behind it all, or under it, is the burden of responsibility. It is right to assume that all parents wish to do what is right by their children—that feeling, and the responsibility that goes with it becomes reflex after a while, the parents themselves are unconscious of it. But this very thing, this latent feeling of being accountable for a child's behavior, makes all of us the more vulnerable to any breach in that behavior.

A child misbehaves. It reflects instantly on the capacity of the parent to control, at least in that parent's mind it does, and the reaction it sets up is instant defence. Scolding follows.

Scolding is more than mere out-spoken criticism and complaining. It is almost entirely selfish in its inception, being both a defence and relief to the scolder.

Nothing was ever gained by scolding. Telling a child of his faults is a different story. Certainly that is necessary, as we know, but it should be done without heat or anger, or what is worse, still, sarcasm. Sarcasm is lost on little children, but it is quickly understood by older ones. It is silly and extremely cruel.

I should try to keep scolding out of the home as I would disease. It is a bad habit, and the worse of it is that not only the culprit but the scolder is made a sufferer. It soon loses its efficacy as a weapon, and at best the only thing it does accomplish is fear. That, as we know, is a very questionable authority.

It is the very thing we are trying to get away from in our advanced knowledge of children and their early training.

Lead models of dogs have been found by an expedition of the University of Pennsylvania in Palestine, says Popular Mechanics Magazine. The figures are believed to be at least 3,300 years old, and show that dogs then closely resembled some of the modern species.

Above is pictured the burning plane in which Dorothy Galloway, another passenger and a pilot lost their lives. This photo was taken just after the crash at the Charlotte, N.C., airport. At the right is Dorothy Galloway, twenty-two-year-old bride.

DOROTHY GALLOWAY and the love she bore her husband have been sacrificed on a fiery-burning pyre of gasoline and wood and canvas. There was tragedy enough in the swift earthward swoop of the aeroplane that carried her and two companions to their death, but there was drama too in the story of her short-lived romance.

Pretty, popular and twenty-two, Dorothy married John G. Galloway three months ago. Friends said it was a good match. She was high-spirited, fun-loving and one of the best liked members of the younger set. He was a business man, prosperous and just a bit mysterious.

Soon after the marriage, the young husband became a victim of wanderlust. At irregular intervals he would leave the home on Brevard Street and travel about the country—but not in delayed until the woman's husband connection with his business. Dorothy would stay at home, a silent but uncomplaining bride.

"It wasn't desertion, for Galloway kept her well supplied with funds, sent while on his unexplained excursions about the country. But Dorothy Galloway never knew

the equation at all. About loving, as of our times. Look at DeWolf Hopper, the Husband of His Country. Look— for all I know to the contrary—average established philosophizing gent of 1928.

I have an elderly friend and a true philosopher—although he doesn't know it—and vehemently would deny it did you accuse him of such a thing, who, to my way of thinking, summed up the whole matter in a paragraph. That is to say, he summed it up by leaving it open for discussion at both ends, which is the proper way for leaving all discussions.

He was speaking, by indirection, of his son-in-law. He was very fond of one of them and not in the least fond of the other.

"This here loving business is a funny thing," he said musingly. "Take my two daughters—two as sweet girls as you'd find anywhere on this earth. Take it the way it was with them. It was like as if two lovely butterflies came sailing along on a Summer's day and one of 'em lit on a tuberosa and the other one lit on a manure pile. How're you going to figure out this thing of falling in love, anyway?"

I leave his final question for Doctor Durant and the rest of the world to ponder over.

(Copyrighted, 1928, by the Bell Syndicate Inc.)

COULDN'T BE MISTAKEN AS TO SPEED OF AUTO

The other day in the Los Angeles traffic court a ducky was on trial for speeding. He had vehemently denied the charge but the arresting officer pointed out to the court that inasmuch as the car had no speedometer, the ducky couldn't possibly have a fair idea of how fast he was actually going.

"Boss," declared the ducky earnestly, "I don't need no speedometer to tell how fast Ah's goin'." When Ah goes ten miles an hour, mah lamps rattle; when Ah goes fifteen mah mudguards rattle; at twenty mah bones rattle; an' de one Ah went as fast as de officer says, Lizzie jolt shook herself all to pieces an' ain't never been de same since."

LITTLE CHANGE IN DOGS

Lead models of dogs have been found by an expedition of the University of Pennsylvania in Palestine, says Popular Mechanics Magazine. The figures are believed to be at least 3,300 years old, and show that dogs then closely resembled some of the modern species.

"Here's Your Dog, Lady; Back From The Laundry, All Fresh and Clean"

"HERE'S your dog, back from the laundry, all fresh and clean!"

Mrs. Helen Irene Yancey has found a new profession, and is entitled to call herself the only woman who operates a laundry exclusively for dogs—with a few cats and canaries also accommodated now and then.

For a number of years, Mrs. Yancey has been conducting a pet shop in the East. Some time ago she decided that there was a field for the person who would guarantee to keep pets spruce and trim for their owners.

So, in the basement of her home, she set aside a large room for her new beauty parlor and dog laundry. In it there are a steam bath, a bathing pool, a fan that blows hot air and a sizeable tub in which anything from a Pomeranian to a German Shepherd can be given a very adequate bath.

BOYS ARE ASSISTANTS

A staff of assistants, mostly boys in short pants, was hired next. Then Mrs. Yancey sat back and waited for business.

It came, with a rush. Stylish owners of stylish dogs got the idea at once. Now Mrs. Yancey has a great many customers who not only send their dogs in for a bath twice a week, but have them come in once a month for a manicure.

Mrs. Yancey specializes in trimming and polishing the nails of a dog's feet. She does the same for cats; indeed, many women bring their cats in to have their claws dulled, so that they cannot scratch so easily. Canaries, also, undergo treatments occasionally. But dogs provide the bulk of the trade.

A dog lover, however, such attention," says Mrs. Yancey. "And dogs appreciate the care that is given him. You'd be surprised at the results that come from a thorough bath and cleaning."

Steam baths are very popular with the dogs. Many of them don't like to be manhandled so well, however. One has to be very careful, for it is a difficult task. The dog has to be muzzled while it is being done.

"NO TICKEE, NO DOGGIE"

Mrs. Helen Irene Yancey, operator of Atlanta's dog laundry, is shown above busily doting up a member of canine aristocracy. Fido—or maybe it's Quenelle—is soon to be returned home in the dog laundry's truck, shown below with the youngsters who are Mrs. Yancey's able assistants in her unique enterprise.

Mrs. Helen Irene Yancey, operator of Atlanta's dog laundry, is shown above busily doting up a member of canine aristocracy. Fido—or maybe it's Quenelle—is soon to be returned home in the dog laundry's truck, shown below with the youngsters who are Mrs. Yancey's able assistants in her unique enterprise.

Some dogs, she says, resent all attention they get at her beauty parlor. Others, however, get to like it, and act peevish and sullen if their masters forget to take them around every so often.

A DOG LAUNDRY TRUCK

Because her business has grown so large, Mrs. Yancey recently bought a regular dog laundry truck, which makes scheduled trips about Atlanta to collect and return her canine clientele. This truck is manned by boys, and when the work of bathing, scrubbing and brushing gets under way it is the boys also who wield the soap and brushes, while Mrs. Yancey supervises things.

She herself does all the manicuring, a much more delicate operation. She also tends to a pet's eyes and nose, and will doctor sores or cuts.

Mrs. Yancey likes her work, not only because it is remunerative, but because she has a strong fondness for animal pets for almost any kind. While her regular customers are chiefly dogs, with a sprinkling of cats and birds, she has a sort of private zoo, in the yard behind her house, where she keeps monkeys and other tropical animals.

So far as is known, she is the only woman in the United States who is engaged in business of this kind. In London and Paris there are similar shops, but Atlanta is believed to be the only American city to have one.

Don't Scold the Child to Satisfy Your Vanity

By OLIVE ROBERTS BARTON

WONDER how many parents realize that when they scold children, almost invariably, it is relief they are seeking for themselves. It acts as an outlet, a safety valve for their own strained, outraged nerves. It is an "emotional explosion," in psychological parlance.

Behind it all, or under it, is the burden of responsibility. It is right to assume that all parents wish to do what is right by their children—that feeling, and the responsibility that goes with it becomes reflex after a while, the parents themselves are unconscious of it. But this very thing, this latent feeling of being accountable for a child's behavior, makes all of us the more vulnerable to any breach in that behavior.

AFTER 500 YEARS, FRANCE REDISCOVERS JOAN OF ARC

Foch's Death Recalls Greatest Woman In History, Also a Military Hero, Whose Feats Make Those of Atlantic Fliers Look Tame

PARIS—In this age of feminine achievement, France has suddenly discovered, from a modern point of view, the greatest woman champion of authentic history. For sheer dash and daring, for girlishness and practical judgment, for idealism and her power to attract men, her record defies all competition.

Marshal Foch's death has turned new attention on her life, for she, too, was a military hero.

No movie contracts or beauty contests, no front-page marriage or divorce scandal, but for just good girl stuff she makes female channel swimmers and Atlantic fliers look like beginners in the possibilities of womanhood. She started being a wilful little girl in the old home town about 500 years ago and now they are laying with reverence marble cornerstones along the road where her restless steps took her.

IS HONORED TO-DAY

Crowds gather, prayers are uttered, men and women bow their heads along the Sacred March of Jeanne d'Arc. But 500 years ago her father threatened to drown her if she didn't stay at home, clean up the family kitchen and look after the sheep.

Jeanne told her father and her husky brothers where to go off, started out on her own and lived the most romantic, colorful and tragic story in the history of France. She wasn't really a

bad girl because she died a virgin, and she remains a saint in the eyes of the church and immortal in the memory of man.

The real greatness of Jeanne d'Arc, as conceived in modern minds, has been emphasized as a result of these ceremonies dedicating cornerstones along her old line of march and recalling her exploits in honor of the anniversary of the commencement of her crusade on February 22, 1429. She started something, and in changing the destiny of France she set a record for women that still stands. Without any absence of reverence, attention has been called to her remarkable moral strength, her stamina, her amazing endurance and fortitude, and the physical strain and suffering which she must have endured.

A COUNTRY GIRL

At sixteen, Jeanne was a country girl, lithe of limb, broad-shouldered and deep-breasted, according to the best accounts. She was handy about the house. She had a loving nature and was tender; that love and tenderness that later brought her to wash men's wounds and console her dying enemies. She was deeply religious.

As a shepherdess she had much time to think in the fields and she meditated about the sorry state of affairs of France under the corrupt court and the British invasion. She had a vision and heard a call for the like of which history of France. She wasn't really a

To-day—Along the Path She Trod

These people are gathered here at Vaucouleurs at "The Gate of France," where Joan of Arc is supposed to have passed 500 years ago on her way to Chinon for an audience with the king of France, assembling after five centuries to honor the memory of the Maid of Orleans. She was the greatest woman champion of authentic history, whose feats make those of channel swimmers and transatlantic fliers look tame in comparison.

finer in a sanatorium, but such was her strength of character that she went through with it.

She had a good deal of charm and personal magnetism, and she was very attractive girl, as most historians agree. She didn't have a horse, but got an uncle to buy her a truck horse for sixteen francs, or the price of a couple of cocktails in a Paris bar to-day. With this lumbering mount she rode from Vaucouleurs to Chinon, 360 miles in eleven days, with only half a dozen companions. She was eighteen, pretty, riding over bad roads beset constantly by attack from robbers and molestation by her own company.

INDEFATIGABLE IN SADDLE

In the saddle the girl was indefatigable and tired out the best riders in her following. In 160 days of military marching she covered a distance equal to six times the distance between Paris and Cannes, which is the course over which the best French women riders to-day race for the honor of champion horsewoman. The modern riders stop at hotels for the night, get baths, have maid attendance, have themselves and their horses rubbed and receive police protection en route. Jeanne once went seven days without removing her coat of mail. When she led Charles to Rheims to be crowned king she nearly killed him by the speed of her travel.

Men followed her, eagerly. She

picked them up as she went along and had 10,000 with her at Orleans. She could count men ready to die for her as the modern movie queen's press agent counts her love letters.

Also Jeanne was very much of a woman and appreciated how important it was for her to look well. As soon as she began to get on she quit the home-town truck horse and chose horses that would carry her properly. She finally commandeered the best horses in the royal stables and settled on white as the most appropriate background for her type and her mission. The strappings of her white horse were all in white and she wore a white coat of mail. With this picturesque appearance she rode over France with a fury that to-day amazes admirers when they study the distances she covered.

But for all her dash and fire Jeanne d'Arc was a woman and a very human one. After campaigning for about a year her nerves began to break and wounded three times, her magnificent body weakened. She became irritable over delays in achieving her mission, grew over-impulsive and took unnecessary risks. She issued conflicting and unreasonable orders.

SPIRIT STILL LIVES

Yet the spirit of the wilful girl lives after 500 years. It is recalled that Jeanne, a prisoner, twice tried to escape and once jumped seventy feet to gain

her liberty and continue the fight, only to suffer more agony. She faced the fagots in Rouen with unfaltering faith and courage, but only a few short months before she had believed that she was tired of the life when she told the archbishop of Rheims that she "wished it would please God now to let me lay down arms; I would go to serve my father and mother in guarding the flock with my brothers and sister."

Nothing has happened of importance in the old home town in the past 500 years except ceremonials to this girl. Her inspiration is such that an organization is now being formed, with membership representing all parts of France, of descendants of Jeanne d'Arc, despite the fact that, historically and otherwise, she has always been accepted as a virgin. Members do not question her reputation, but claim descent through brothers, the sister, aunts and uncles, and so popular is the idea that the list threatens to challenge in size that of descendants of the passengers of the Mayflower.

PHOTOGRAPH IMMENSE AREA

Civil flying operations are rapidly increasing in Canada, year by year, and one of the fields in which the most marked advance has been made is that of aerial surveying. The preliminary report for 1928 of the photographic work for survey purposes done by the Topographical Survey, Department of the Interior, in co-operation with the Royal Canadian Air Force, shows in round numbers a total of 53,500 square miles of territory covered.

Prim Sister—I think it's a shame, Peggy, the way you lead men on. I can do to hold them back.

Mary Pickford "Grows Up" and Does a Mighty Thorough Job of It—And Talks

MARY PICKFORD as a jazz-mad, flirtatious flapper! It's difficult to imagine "America's sweetheart" in such a role, isn't it? But that's exactly the character you will find in her latest film, "Coquette."

Miss Pickford already has won nearly every honor filmdom has to offer, including the reputation of being the most popular screen actress. For a time she was the undisputed queen without a doubt. Then her pictures started falling off at the box office. People tired of seeing her as a little girl all the time.

But Mary has grown up. As the fun-loving Southern girl in "Coquette," she displays a beauty that was hidden in her kid roles. To be sure she grew up somewhat in "My Best Girl," but that picture was only a stepping stone to her complete change would not be too abrupt. Now she is on her way back to claim the title she once held—screenland's most popular actress. And she will be crowned as soon as her new film is released.

FIRST TALKING FILM

When Mary makes a change she certainly does a thorough job of it. "Coquette" is not only her first production as a grown-up flapper, but it is her first talking film as well. Millions of movie fans will hear her voice for the first time and they will hear her speak with a Southern accent with remarkable correctness for this picture.

The writer thinks Miss Pickford deserves a big hand for her courage. Most of our movie folk have been scared to death the first time they faced the microphone. But here is an actress who even dared to acquire an unnatural accent for her first attempt.

It is hard to realize that the girl in "Coquette" actually is Mary Pickford—we have seen her for so long as such an entirely different character. Her love scenes with Johnny Mack Brown will rival anything the silver sheet has to offer.

BROWN DOES WELL

Johnny Mack Brown as the lover also gives a remarkable performance and it is quite probable that this film Mary's younger brother.

Mary Pickford... you'd hardly know her, she's changed so.

will do nearly as much for him as "My Best Girl" did for young "Buddy" Rogers. Mary's father, John St. John, strenuously disapproves of Brown and eventually shoots him because he thinks he has despoiled his daughter's name. Another good word should be said for Johnny Besant, who plays "Coquette" also brings forth Mary's ability as a truly dramatic actress.

The dialogue for the picture was which heretofore has been latent. In written, by Sam Taylor, who also the courtroom scenes where her father directed it. For both pieces of work Sam deserves credit. His lines were heart, she does as fine a piece of acting as good as the manner in which they were spoken by all the characters.

There's a lot of praise for Miss Pickford and her film in those lines, but I sincerely believe it is merited.

New Carbon Arc Lamp Brings Sunshine Into the Home In Any Kind of Weather

By ISRAEL KLEIN

THE sun is being brought into the homes of persons who seldom before have enjoyed much of its health-giving rays. Those who work by night and sleep by day, indoor workers, shut-ins and others deprived of natural sunlight may now take advantage of this new "sun" at whatever time they have for leisure.

For this is an artificial sun, really a carbon-arc lamp using carbon sticks as its electrodes to produce all the rays of natural sunshine, even beyond the visible spectrum. For years physicians have been using mercury-vapor lamps that produce the ultra-violet rays of sunlight for the most part. These lamps, it is agreed, are too powerful and dangerous for popular use.

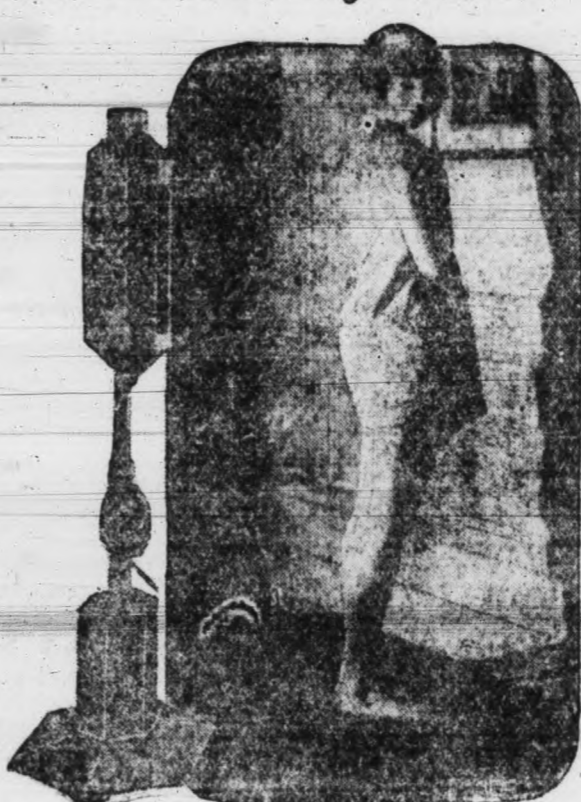

Ultra-violet rays are the extremely short, invisible rays of sunshine that have been found to prevent rickets in children and to help build up the body. But they must be used cautiously and under a physician's direction, or they might go so far as to destroy the live tissues of the body and result in being a detriment rather than a help to the person using them.

THIS LAMP DIFFERENT

The new type of "sunshine" lamp has been designed to furnish not only these ultra-violet rays—although in much more moderate quantity—but all the other healthful rays of natural sunlight. This includes the warm rays beyond the red side of the spectrum, or series of colors that make up the white light of the sun, as well as the bright visible rays between the two extremes of red and violet.

What brought about the production of this sunshine lamp of the carbon-arc type was a study of the amount of sunshine we were actually getting all year round. Observations were taken in fifty-six cities, including Florida and California with those of the north.

Averaging up the amount of sunshine in these cities, month by month, it was found that the average city enjoyed only about four hours of sun-

Taking the sun ray treatment

shine in January up to ten hours in June and July. Even this average amount could not actually be used, for much of this sunshine came at times when most of the population is indoors at work or when the dust and smoke that usually rests over large cities shut out much of it.

To prove that sunshine has much to do with our health, a study of the death rate in these fifty-six cities over several years showed that it was highest in March, after a comparatively sunless winter and decreased toward summer as more sun was available. The mortality rate seems to follow the sun by about two months—reaching its

high peak in March after the sun had reached its lowest efficiency in January, and showing a low figure in September, two months after the peak of sunshine.

A way to make up for the lost sunshine during the winter months was found by Roy Mott, a young research engineer. What he did was to hollow out ordinary sticks of carbon that are ordinary used in arc lamps, and insert a metal that, when burned in the intense heat of the carbon arc, emitted a light practically duplicating the light we get from the sun.

This metal is the rare earth substance called cerium. Burned in this manner, the cerium-carbon arc is said to produce even more effective light than sunlight itself, although it is not so powerful. It contains the ultra-violet light of sunlight in practically the same proportion, emits all the other health-giving rays of the sun up beyond the red and infra-red at the other end of the spectrum and even produces tiny rays below the ultra-violet that the sun seems to be weak in. These tiny penetrating rays, however, are shut out by a glass filter in the lamp designed for the use of these carbons.

MIXING THE RAYS

Mott went further by stuffing carbon sticks with other substances that would give other forms of light—strong in ultra-violet or in infra-red, so that the healthful effects of these rays may be concentrated for quicker results. These carbons, like the mercury vapor lamps, are too dangerous for popular use. They have to be taken like medicine, under the prescription and care of a physician.

The lamp with the "sunshine" carbons, however, is merely a substitute for ordinary sunlight when the natural sun isn't available. It has been put to use in Los Angeles, where there would seem to be plenty of sunlight, as well as in Portland, Me., and it has been found in the soundings of many an actress who used to wonder what the sun felt like.

Politicians Worried By Women's Demand For More Freedom

London, April 13—As the general election looms nearer, candidates are endeavoring to discover what political questions feminist societies regard as especially important. A leading article in The Vote states the feminist position briefly but comprehensively. Women now have equal voting rights with men, "but their political opinions are certainly not equal to that of men and women's economic position is no way compares with that of men."

Therefore, the Equal Rights General Election Committee is arranging to put before the leaders of the three political parties, "the special concerns of women." It is necessary, first, to have equal opportunities and equal seats and all the Government posts save one. The House of Lords is

penalized than a married man, and both should only lose their jobs for bad workmanship." In industry, women ask that "no restrictions shall be placed on the work of women which are not imposed on men's work."

Candidates of all parties will find these demands somewhat embarrassing, and clear cut replies will probably not be forthcoming.

British Plan Schools to Train Super-salesmen

London, April 13—The prince of Wales's wish, expressed during his speech at the British Industries Fair banquet—that super-salesmen might be drawn from the ranks of the public schools—is to be realized.

A remarkable school, to be opened in September, will have as its aim the training of its pupils in commerce, industry and agriculture. It will be situated at Kinnel Hall, a magnificent Queen Anne building at Abergele, North Wales, which overlooks the famous Vale of Clwyd, and is surrounded by a park of some hundreds of acres.

TO FILL NATIONAL NEED The governing council of the school,

which will accommodate 450 boarders and staff, have expressed their belief that it will fill a great and growing national need. Such educationists as the Hon. W. N. Bruce, Pro-Chancellor of the University of Wales, Lord Teynham, and Brig-General the Hon. G. G. Bruce, leader of the Mount Everest expedition, are serving on this council. Miss M. Bolam, late of Reading University, is the only woman member. The headmaster, F. H. Robinson, a distinguished lecturer on economic subjects, has been removed for years as a keen student of industrial and commercial problems. Boys will be admitted to the preparatory department at the age of ten, and remain in the school until they are aged nineteen. Pupils will take courses in either commerce, engineering and applied science, agriculture, or arts. Well equipped laboratories will be installed, and the teaching of modern languages will receive great attention.

FISHING INDUSTRY WAS FIRST

Fishing may well be regarded as the first industry to be systematically persecuted by Europeans in what is today the Canadian domain. It has never since ceased to yield a perennial harvest both to Europe and America.

Water containing magnesium and calcium salts does not swell gelatin as much as soft water does.

Doctor Who Invaded Antarctic Wastes For Capt. Scott Now Dead

London (By Mail)—The death has taken place at sea of Surgeon-Captain Edward Leicester Atkinson, D.S.O., the Arctic explorer, who commanded the expedition which found Captain Scott in 1912. A sad feature of the captain's death is that he was only married last November.

Captain Atkinson was a Yorkshire man, who, besides having a distinguished career in the Navy, was, at the time of his death, the youngest surgeon-captain. Captain Atkinson's first big adventure began in 1910, when he accompanied Captain Scott on his last journey to the Antarctic, and was left in charge of the ship when the famous explorer set off for the South Pole. In 1912 he led the expedition which found the bodies of the lost adventurers nearly a year after Scott and his party had reached their objective. Atkinson and the relief party sighted the "little tent of death," and inside found the bodies of Captain Scott, Dr. Wilson, and Lieut. Bowers, who, without food, had raised their tent for the last time and remained to meet death with quiet fortitude. Petty Officer Evans had died, on the Beardmore Glacier, on February 17, while Captain Oates had

walked away to his death rather than be a drag on his companions. Captain Atkinson secured the records of the party and erected a cairn over the spot where the tent was found. He made a journey twenty-three miles south in an attempt to find the body of Captain Oates, but no trace of it was found. Near the site of his departure from his comrades a cairn and cross were erected.

Prince Ignores Fashion Rules To See Fights

London, April 13—A lot has been made of the news that the Prince of Wales appeared the other night at a boxing contest wearing a soft shirt and a pullover under a dinner jacket. The truth is that he broke the conventions for very sensible reasons. He suffered from a heavy cold, which prevented him from going to Bognor to see the King, and though it has moderated, it has left him with a cough and catarrh. Rather than miss his engagement he took precautions against the draughts of the Queen's Hall.

So young men who wish to dress like the Prince had better choose their occasions very carefully before they appear in public in evening dress with a pullover.

Historic Portland Vase Due For Auction Block

London, April 13—A certain mystery surrounds the identity of "William Lloyd," the man who smashed the Portland vase in February, 1845. He is described in the account of his trial as tall and delicate-looking, and very sullen and reserved. He refused his name and address, but was identified by his landlady as William Lloyd, describing himself as a scene painter at Covent Garden, with relations in Dublin, whence he came. Later it was stated that he was really a student of Dublin University on vacation in London. He was very anxious to conceal his act from the University authorities, and apparently he succeeded in this. When released on the payment of his fine he expressed remorse for an act for which no adequate reparation could be made, and which he attributed to impotence. He told his landlady that he had been drinking heavily, and that he did not know what he did, but that he did not wish to give their names.

THE wonderful work of Doubleday in reconstructing the Portland Vase of ancient Roman workmanship from the fragments into which it had been shattered—a drawing of the pieces hangs in the Gem Room of the British Museum—was only rendered possible by

the fact that copies by Josiah Wedgwood were in existence. When the vase came into the possession of the Duke of Portland, Wedgwood borrowed it, and it was in his keeping for many months. He made a limited number of copies in Jasper ware of the kind which has made his name famous, and these were sold at £50 apiece. The last time that one of these copies came into the market it fetched £500. If the vase itself should eventually leave the country, as seems probable, since the Duke of Portland is to offer it for sale at Christie's, all we should have to remind us of a treasure that the nation had almost come to regard as its own would be Wedgwood's work, which, faithful as it is, lacks the beautiful quality of the original material.

CANADA'S MINERAL PRODUCTION

Canada's mineral industry, third in importance among the primary industries of the Dominion, being surpassed in output value only by the great basic industries of agriculture and forestry, brings to the nation a prestige far beyond the monetary measure of the mineral output. According to the Dominion Bureau of Statistics, Canada is first in nickel, first in asbestos, second in copper, third in silver, third in silver, fourth in lead and copper, and sixth in zinc and iron. The world producers and enjoys an enviable position in the mining world. In the light of the progress that has been made, Canada's future in mining seems brighter than ever before.

Indian boys and girls in Canada to the number of 14,720 are enrolled in the 344 Indian schools maintained by the Department of Indian Affairs.

"Trader Horn" to Be Recorded By Talking Movies Of Natives and Animals of African Jungles

THE jungle may recover but it will never be the same. For an entire section of Hollywood is being moved into the heart of Africa. And because this involves the setting up of an electric plant for giant arc lights, all the newest sound equipment, radio devices, specially equipped "gas guns" and caravans of films, cameras and what-not, the most extraordinary safari that jungleland has ever seen will start moving inland from the British East African coast sometime early in May. This pageant will resemble something half-way between a circus parade and a military invasion.

ADVANCE PARTY PLANS ROUTE

The take-off began when Director W. S. Van Dyke, with a company of three actors and a technical staff of twenty-five, sailed from New York on the Ile de France to make a film version of "Trader Horn." The actors are Edwin Booth, Harry Carey and Duncan Renaldo.

Van Dyke, who has had nine

scouts making preliminary plans in Africa, is well aware that he faces physical problems hitherto unknown to the film industry. "One of my instructions is to catch, with the new talkie devices, the sounds of every beast and bird of the jungle," sighed Van Dyke. "They will be the only sounds in the picture, by the way. Of course, any number of picture people have taken wild animal life. But this is the first time an experiment has been made on the varied noises of the jungle."

TAKE HEAVY EQUIPMENT

"Anyone who has had experience with the difficulties of sound production under even ideal circumstances must have some idea of our problem. We are carrying every conceivable item in sound equipment—for we must be prepared for any emergency."

That is, however, but one item. Somehow a ninety-ton electric generator must be hauled through a vast country which is prepared only for light travel. Existing

bridges cannot possibly hold the weight. Roads will have to be cleared through the thick of the jungle. From this special electrical unit will flare the tower areas, which will turn the great sections of darkness into daylight. How the sudden illumination of their land will affect the natives and beasts, the director does not pretend to know. The results, he presumes, will be startling, to say the least.

TO EMPLOY THOUSANDS

Each member of the party will bring fifty natives. This will bring the party up to more than 1,250, without counting the armies of native extras to be employed.

Because of the unprecedented nature of the exploit, the documented approval of four governments has been necessary.

"The preliminary work has been astounding," Van Dyke reported. "The governments not only have had to give their consent, but to give the aid of their experts so that this safari can

move with as little unpleasant interruption as possible. The election of President Hoover has helped us a great deal, for the Belgian government had been a bit skeptical. But Mr. Hoover's work in Belgium during the war settled our difficulties. You see, our most important scenes must be taken in the wildest parts of the Uganda country in the Belgian Congo. There we will have to use thousands of the native pigmies.

PLAN TO "GAS" GAME

Also the Belgian government, seeking to preserve its animal life, has great herds of elephants which have been tamed and protected—just as America has created a preserve in the Yellowstone. This herd will be one of the animal groups employed.

"We do not intend to kill the game, unless absolutely necessary. And so we are taking gas guns and gas bombs, such as were used in the war. When this gas is shot the animal will keel over and seem to be dead.

And we may be able to get some very interesting shots of the animals when they come out of their stupor."

ALL COMFORTS OF HOME

Hollywood actors being what they are, all the comforts of home are to be provided wherever possible. Some of the de luxe features of this effort, which will require more than a year, are a complete electrical refrigeration system; an elaborate electric fan system to keep the performers cool while they work and sleep; a special spraying system to keep off the mosquitoes, flies and insects in general; a British medical expert on fevers, waters and tropical diseases; a medicine chest of vaccines and inoculations to ward off illness; special sleeping equipment and a thousand odds-and-ends which would tend to keep the stars in good humor.

For with so terrific an expense entailed, any temperamental outburst or walk-out would be nothing short of disastrous.

Even Savages Buy Fountain Pens, and We Lose 5,000,000 a Year, Says Dean of Industry

JULIUS SCHNELL is one of those who know the pen is mightier than the sword. He may be slightly prejudiced, because he happens to be the dean of fountain pen makers.

But in Zanzibar, China, Cape Town and various strategic jungle points he has twenty-nine agencies for his products and sales reports show, he says, that the heathen desire nothing more than nice, shiny fountain pens.

You've no idea how many savages can find for fountain pens. On well state occasions they make attractive, colorful implements. A necklace of them is considered very chic. They're fine for tattooing, too, and decorating shields. Of course, if one has been to the mission school, a pen can be used for writing.

A YANKEE PRODUCT

"They're one of the commodities," said Schnell, "for which the west had established a world market—just as for motor cars and typewriters and soap."

This little Alaskan, quite wealthy now, knows a lot about fountain pens, her in Paris, and after realizing what

having made millions of them since 1892. He holds eight patents on various parts and can make a complete pen himself—an accomplishment, he admits, matched only by about a dozen other men in the world. He's self-made, self-educated and has been through a business course that would seem incredible to young men of today.

"I took my training in Alsace," he recalled, "and it was only because of a crippled thumb that I escaped serving in the German army and was permitted to learn a trade at an early age."

"According to the Alaskan custom I was apprenticed to a machinist. He lived six miles away from my father's farm, which necessitated a twelve-mile walk for me each day. For six months, I received no pay at all, then ten cents a day."

A COMMON PRACTICE

"But I considered this no hardship, since there was nothing unusual about it."

"Once an aunt sent for me to visit her in Paris, and after realizing what

Julius Schnell knows a lot about fountain pens. He has made millions of dollars making millions of them, and even sells them to savages.

a city was like, my next step was to work my way over to America. Once here, I found it to be the land of promise I had hoped."

For years Schnell worked for others. "Then at fifty-six," he said, "I decided to make some money for myself."

He has invented much of the machinery used in his own establishment. Recently, when a skilled workman in his shop was ill, Schnell himself took his place at the intricate machine and before the man returned he had invented a new device which could produce just thirty times as fast as the old one.

Schnell says that the fountain pen business on this continent now represents a \$70,000,000 industry, and that there are 20,000,000 fountain pens made each year. Fortunately, however, there are 5,000,000 lost or broken each year, which seems to indicate that there always will be the need for a few million more.

"I called on Jackson this evening," said Dr. Jones.

"Did you?" remarked his wife, pleasantly. "How are they?"

"On all right, I think. Jackson was beating his wife when I got there."

"What?" gasped Mrs. Jones.

"He stopped when I went in, although I begged him to go on."

"You brute! You mean to say you stood there and saw that accursed beating his wife?"

Jones smiled calmly. "Any man could beat her," he said, "if he held the cards that Jackson had."

Solicitor at Shoreland County Court—Have you no control over your wife? Husband—Nothing to speak about.

Edwina Booth, pictured above, is scarcely better known here than she will be in the African jungle, where she'll play the feminine lead in the talkie version of "Trader Horn." For Edwina, of Provo, Utah, is a brand new find in filmdom. Upper right are W. S. Van Dyke, director, and Clyde DeVinna, electrical technician. Lower right is Harry Carey, who takes role of Trader Horn.

Ancients Thought Drilling Hole in Head Cure For Headaches

By DR. MORRIS FISHBEIN

The idea that a headache can be relieved by pressing the roof of the mouth is only one of the numerous silly superstitions that are related to the relief of headache.

The earliest notion was that of the ancients, who believed that headache was due to the development within the skull of some demon of ill health and that the proper way to cure the headache was to make a hole for the demon to get out. This they did by trephining the skull, taking out a small piece of bone about the size of a button.

Skulls have been found thousands of years old which have been trephined in this way. After the trephining, the medicine man conjured forth the demon by the use of magic.

HOW IT'S EXPLAINED

The technique of the thumb applied to the roof of the mouth serves, of course,

to get the mind off the headache and on the pain in the roof of the mouth. Sometimes a temporary diversion of the attention from the headache to some other point will have this result.

Headache is not a disease in itself—it is a symptom of disease and there are innumerable causes. The pain in the head is not always the same. It is customary to relate this to constant cause, whereas actually the same person may have different headaches at different times due to different causes.

No doubt, the amount of circulation of blood in the brain and of fluid in the spinal cord and in the brain have something to do with headache.

Poisons of various kinds are associated with headaches, as are also the beginnings of most infectious diseases. Some headaches come from exhaustion, such as that of eyestrain, worry and agitation, or disturbance of the emotions. Long exposure of the head to the sun may cause a headache, and continuous noise and confusion may produce it.

PINCHING THE TOE

Thus headaches that are due to psychological conflicts, to emotions or to agitation may be relieved occasionally by distraction of the attention to

other things. In such cases, pinching the toe, the wearing of some foolish mechanical device, or pressing the thumb on the roof of the mouth may seem to relieve the headache.

In cases in which there is an actual physical cause such as a disease of the kidneys, of digestion, or an infectious disease, the treatment of the cause is far more important than the treatment of the headache.

Two neighbors who were always quarreling, and had already appeared before the magistrate once, stood again in the court to seek settlement of their grievances. "Now, look here," said the magistrate, severely, "I told you last time you were here to offer each other the pipe of peace."

"Yes, sir," said one of the men, "I've done that."

"Ah," said the magistrate, smiling, "And you—" turning to the other man—"did you not accept the pipe of peace?"

"Oh, yes," replied the other, "I couldn't dodge it—it happened to be a hose pipe."

A minister, in addressing his flock, began: "As I gaze about I see before me a great many bright and shining faces." Just then eighty-seven powder puffs came out.

Connell Writes of Roy Chapman Andrews Expedition Into Central Asia and Sacred Mountain of Arishan

By Robert Connell
Noted Island Naturalist

THE Roy Chapman Andrews expedition into Central Asia appealed to people more than scientific expeditions usually do. At least, it did so after the news came that its workers had discovered in the Flaming Cliffs of Djadokhta not only wonderfully preserved skeletons of dinosaurs but the eggs of those ancient giant reptiles. So plentiful indeed are the eggs and the nests in which they were laid that their discoverers speak of the places as "dinosaur rookeries." Why the eggs should impart a sense of reality to the reptilian inhabitants of the ancient world it would be hard to say. The fact remains that the dinosaur took on a new lease of life in the minds of newspaper readers when the red Cretaceous sands of Mongolia gave up to American curiosity the beginnings of each little dinosaurian life.

The dinosaur remains are, however, only a portion of the fossil discoveries of the Mongolian expedition. Their importance is great and, although dinosaurs attain lengths of eighty feet, it is of course not strictly commensurate with or dependent upon their size. A large number of other remains of quite as great if not greater interest have been found in that strange land, but they have lacked the vividly spectacular appeal of the more monstrous creatures. A number of rare primitive and as yet undescribed mammals are represented in the Upper Cretaceous beds, while in the early Tertiary are the fossils of animals, especially of the tapir and rhinoceros group, with American and European affinities. They show that there was then migration from and to America as well as to Europe. They also record the conditions under which they lived. The rivers were bordered by trees, and the grassy plains were more widespread than now, when the wind-blown sands demonstrate the comparative aridity of the great valleys. The desert sections show that there was then migration from and to America as well as to Europe. They also record the conditions under which they lived. "SELENIUM" IS MAGIC PASSWORD OF MODERN SCIENTIFIC WONDERS

Will the Sun One Day Light Our Street Lamps, on Retiring, and Burglars' Shadows Trap the Thieves?

What a funny old world this will be when the sun, retiring for the night, will turn on for us the light that supplants itself? Yet that day is coming, if present experiments being carried on in many corners of the globe turn out as they have promised to do.

Street lamps that turn themselves on when darkness comes; burglars who switch on the alarms to catch themselves, by their shadows; and marvelous trains that will light up as soon as they enter a tunnel, are but a few of the wonders promised by the action of the selenium cells, operated by light rays.

The following account by a writer in *Tit-Bits*, pictures some of the latest experiments along these lines, and makes interesting reading:

"The day when the setting sun, without any human aid, will automatically turn on our electric lights and economically switch them off again at dawn is at hand. Already certain of the street lamps at Barnes are operated by Nature in this way. We are at the beginning of an era in which natural and artificial light will be harnessed.

"In a heavily-curtained laboratory in Coventry Street, London, I witnessed the first scientific miracles of 1929. By means of a single ray of light the demonstrator opened the door, stopped a model train, flooded a model window front with light, started a burglar alarm, and rang a fire bell.

"The secret of those wonders was a new invention known as the selenium bridge. Its chief constituent is selenium, that mysterious non-metallic element whose resistance to an electric current alters according to the amount of light thrown upon it. Selenium is the centre of all systems that aim at harnessing light, and the selenium cell is the vital part of Baird's Television apparatus.

"The demonstrator first showed the radiolux bridge attached to an ordinary street lamp. It is placed at the top to catch the full light of day. With other lamps in the laboratory, he created effects similar to sunrise and sunset, and it was an amazing spec-

tacle to see the street lamp switch itself on as the 'daylight' faded, and then turn itself off again immediately the 'daylight' had gained sufficient strength.

"Not only are the lamps automatically lit at dusk, but even during a thick fog. Any atmospheric condition that lessens the light from the sun affects the selenium bridge and switches on the street lamps. The same system is being adapted to the automatic lighting of railway carriages (a model train lit up immediately it passed from the light of the laboratory to the darkness of a tunnel), of factories, stores, and docks, of railway signals and station lights.

"The automatic stopping of trains is another innovation achieved by the radiolux. The apparatus is placed on the line, a beam of light being thrown across the rails, and immediately the wheel of the train cuts this beam, if only for a fraction of a second, the bridge operates a switch which either affects a distant signal or, if the train is in danger, pulls it up and gives an audible and visible signal in the driver's cabin. The Great Western Railway is now laying a section of its track with this device to give it a trial on a full-sized scale.

"By means of an infra-red (invisible) ray of light, which is opposite a radiolux bridge, a room can be effectively guarded against burglars. For if the intruder's path crosses that of the invisible beam, he affects the selenium and sets off an alarm, even though the room is in complete darkness.

"The last experiment, the demonstrator explained, had no commercial value, but showed the potentialities of the new invention. He invited me to shut the door of the laboratory and set myself that it was properly closed. When this was done, he took an ordinary hand torch, applied the beam to the lock, and immediately the door swung open.

"The radiolux bridge was concealed in the lock, and on being brought into a strong light, it operated a switch which released the catch and pushed the door ajar."

BEDTIME STORY

Uncle Wiggily's Early Clover

Copyright, 1929, by McClure News-Syndicate

By HOWARD R. GARIS

"What is the matter with my wife this morning?" asked Uncle Wiggily of Nurse Jane Fuzzy Wuzzy as he hopped down to breakfast in his hollow stump bungalow. "Isn't she going to eat?"

"Not just now," replied the muskrat lady housekeeper in her funny, little, squeaking voice. "Mrs. Longears has a headache. I'll get your breakfast and then I'll carry her up a cup of carrot coffee."

"Oh, that's too bad!" said Uncle Wiggily, kindly. "Now, I'll tell you what to do, Janie, my dear." Uncle Wiggily could call his housekeeper "dear" on account of knowing her so many years. "You pour out a cup of carrot coffee and I'll take it up to Mrs. Longears," said the rabbit gentleman. "Then I'll eat my breakfast."

So it was done that way and when

"What's this? Early clover!"

Uncle Wiggily hopped up to his wife's room with the coffee made from golden carrots, she said to him in a weak and headache sort of voice:

"Thank you, Wiggily, dear. And do you think while you are out adventuring to-day, that you could find some early clover? I think if I had some early Spring clover salad I would feel much better."

"You shall have some fresh clover

"The main destination between the moth and the butterfly is that the former have antennae (the commonest), and the latter have feelers the shape of drumsticks. There are, of course, other distinctions, but to all intents and purposes the one I have pointed out is sufficient to distinguish between any moth or butterfly one is likely to catch here.

"The last point I wish to write on is the catching of specimens, and how to kill them without cyanide of potassium. If a butterfly is caught by somebody who doesn't collect, but who wishes to preserve the specimen for a friend that does, the best way to kill it painlessly is to administer a sharp pinch to the body where the wings grow. This puts the butterfly out of any pain.

"It is far more merciful to kill the creature immediately, than to keep it alive for perhaps a day until it can be killed in cyanide of potassium. The dead butterfly should then be put in a dry place where ants or other insects won't eat it, until the entomologist can come to claim the insect."

Jack Lockwill's Police Dog

By Gilbert Patten
(Creator of Frank Merriwell)

The country was wildly picturesque and beautiful. Southward rose blue, blue mountains, clothed in spring verdure. The Canadian line was not far away, to the north. Here, on "The Old Montreal Trail," stood the ancient Colonial house known as "Ivor's Loss." A mother—Jack Lockwill's mother—leaned against a pillar of the main porch, waiting impatiently for her son.

Far down the road, rose a tiny cloud of dust. Watching it, Mrs. Lockwill soon saw a horseman riding madly toward her, with two riders pursuing him.

Choked with amazement and alarm, Mrs. Lockwill recognized the boy who was being so hotly pursued by the mounted constables. It was Jack—Jack, her own son! Astride his calico broncho, he reined into the yard and sprang from the saddle before the pony came to a full stop. His mother, her eyes wide with terror, ran forth and placed herself between him and the "Gray Riders."

(To Be Continued)

DONNY HEARS THE "HUM-BIRDS" SING; AS WHO HAS NOT?

Even Norah, the Pussy Cat, Purred When She Heard the Gay Song of the Strange, Shy Hum-bird.

Donald turned the dials of the radio receiver impatiently. Bedtime stories, stock market quotations, political speeches and marine warning signals came in quick succession, and were as quickly rejected. All of a sudden the boy sat bolt upright while he switched about the tuning dial and volume control, feverishly anxious to capture more of some broadcast he had heard.

"The Hum-Bird sits on a telegraph wire, and hums a gay tune—" Donald heard, and then the voice on the radio was blotted out by a burst of static. "The Hum-Bird is invisible, of course, and only the very keenest pair of ears can detect it." Donny heard a moment later, and then the distant station faded entirely and was lost.

"That's funny," mused the boy aloud. "I have heard of a humming bird, and of a humbug, but a Hum-Bird is something new. I wonder what it is!"

Supper time cut short the radio hour, and Donald forgot all about the Hum-Bird in the press of homework that night. It was some days later that the boy, walking along beside a tall hedge that lined the path to school, thought of the Hum-Bird again.

Distinctly rising on the soft April breeze, a low humming sound was coming from behind and beyond a hedge. Donny thought of the words of the radio speaker, and his eyes popped open wide. Through the first gap in the hedge he peered into a trim little garden. Nearby was a new stucco house, and the humming noise came from a vacuum cleaner. Donny realized, as his hopes crashed. That was not the Hum-Bird.

It was some days later that Donny heard another humming sound, or nights to be exact: for it was at night time as he raced home from Uncle Jim's, where he had been visiting. It was a cold clear night, and the humming seemed to come from the telegraph wires too!

Donny got more and more excited as he listened for the sound seemed to be following him as he trotted home along the path. Then he came to a telegraph pole, and discovered that the sound was only that caused by the singing of the wires on a frosty night. For the second time his hopes were dashed.

Donny was dressing for breakfast

next morning, when he heard his mother humming as she went about her work of setting the table. He recognized the tune, and commenced to hum himself. His sister, Eunice, took up the tune, and joined in the humming. Presently even the pussy cat, washing herself on the window sill in the early morning sunlight, began to purr.

"That's it!" exclaimed Donny. "It's the Hum-Bird. It must be somewhere near, for we are all humming, even Norah, the pussy cat."

With that Donny raced for the door to look into the garden. But there was nothing on the telegraph wires, and while a number of meadow larks were gaily singing in the field, the humming noise was not to be heard outside.

"Mother, why does Norah purr?" asked Donny, closely watching the cat, as she swept a long red tongue over her glossy fur, and purred contentedly.

"Because she is happy, I suppose," said Donny's mother, and unconsciously answered the boy's riddle.

"That's it," mused Donny. "The Hum-Bird is near when people are happy—people are happy when the Hum-Bird is near. Now which is it? It is all very puzzling. But because he is afraid of being laughed at, Donny said nothing to his mother just then, but kept his secret to himself.

That night Donny tried again on the radio to bring in the mysterious station from which he had heard about the Hum-Bird. As luck would have it, the night was good for reception, and his long lost station came in loud and well. Donny held his breath as he recognized the same voice as had heard before. His eyes danced with delight as the radio gave him the real answer to his riddle.

"The Hum-Bird dwells in the hearts of all of us," said the radio speaker. "When we are happy, it sings all day long. When others hear the Hum-Bird, they too are happy, and the world becomes a brighter and happier place in which to live." The voice trailed off, and the distant station faded once more into a jangle of noises, squeals and howls. But Donny did not mind. He had learned the secret, and ever after that when he heard anyone humming he smiled, for there, he knew, the Hum-Bird was hard at work, making people happy.

Donny was dressing for breakfast

back the tone-arm to the initial playing position.

It is arranged so that, by means of an escapement movement adapted to lower or raise the contact roll, the gramophone is stopped automatically after the last of the repetitions previously fixed by the apparatus.

NO WONDER

Doctor—"And did you give your husband the sleeping draught I ordered, Mrs. Brown?"

"Oh, yes, doctor. You told me to give him as much as I could get on a three-penny bit, but as I hadn't a three-penny bit I used three pennies, and he's been sleeping peacefully for nearly three days."

Approximately 48.3 per cent of the 40,000 graduates of Pennsylvania high schools for the school year 1927-28 are continuing their education.

A junior clerk was "on the carpet," and at the conclusion of his wiggling he was told to get rid of his supercilious air. Next morning he appeared at the office with his hair cut.

She had been turning over every article the weary salesman had placed before her, but nothing seemed to be just what she wanted.

"I am afraid there's nothing here to suit," she said at last, and then in a burst of confidence, whispered: "You see, to-morrow is my husband's birthday and I wanted to surprise him."

The man behind the counter gave her a searching look.

"Well," he suggested icily, "why not hide behind a chair and yell 'Boo!' at him?"

"I am afraid there's nothing here to suit," she said at last, and then in a burst of confidence, whispered: "You see, to-morrow is my husband's birthday and I wanted to surprise him."

The man behind the counter gave her a searching look.

"Well," he suggested icily, "why not hide behind a chair and yell 'Boo!' at him?"

A Junior clerk was "on the carpet," and at the conclusion of his wiggling he was told to get rid of his supercilious air. Next morning he appeared at the office with his hair cut.

She had been turning over every article the weary salesman had placed before her, but nothing seemed to be just what she wanted.

"I am afraid there's nothing here to suit," she said at last, and then in a burst of confidence, whispered: "You see, to-morrow is my husband's birthday and I wanted to surprise him."

Fashions, Fads, Fancies and Home Life

THERE'S A SHORT CUT TO LONG COATS

Varied Modes In Favor On Smart Park Avenue

By BETSY SCHUYLER

New York, April 13.—The long and the short of the Spring coat problem is just that—the long and the short of it.

Judging by the fashion parade down Park Avenue any of these fair days, the chic woman may have her coat anywhere from her hips to her heels and its all right, socially and sartorially speaking.

Small women like Mrs. Sherburn M. Becker Jr., Betty Gerard, Hope Bennett and a number of others look exceedingly jaunty in the Spring suit that cuts its coat smartly at the hip-line or even shorter.

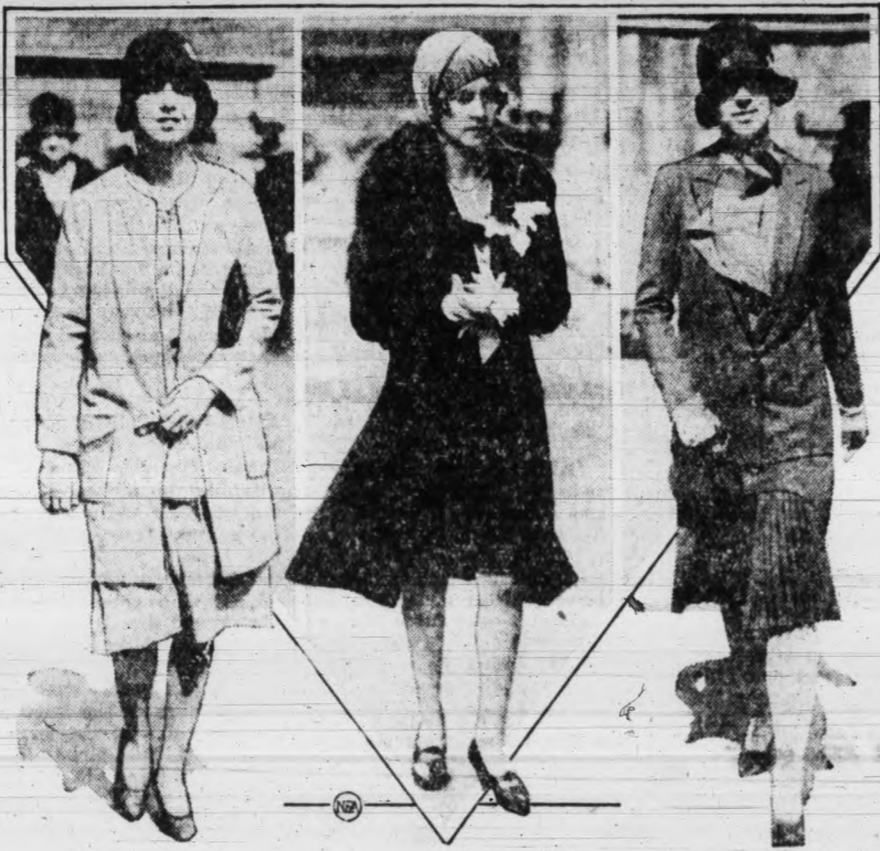

Genevieve Clendenin has a very chic Oxford cloth suit with such a coat and an unusual skirt with a rounding section of pleats across the front. She wore a red felt hat and carried a red purse one day, an exceedingly happy combination for early Spring.

WHEN STYLES BLOOM

Many flowers bloom along the Avenue now. I do not mean just the lovely window boxes of geraniums, daffs, crocuses and so on. Katherine Tod wears her orchids or gardenias every day I have seen her recently—just one or two which are charming against her fox fur or the soft kasha of one of her new suits.

Floral patterns in fabrics are receiving the praise of being chosen by smart social registries this Spring. Cornelia Grant has a lovely little rose print blouse with a black suit. Mrs. Lewis Latham Clarke wore a very Springlike foulard patterned in green, beige and black flowers and made with the most feminine ruffles here and ruffles there.

The vogue for the fitted fashions grows apace. I noticed Mrs. Irving Berlin wearing a heavy off-white satin

Mrs. Robert Byrne

Miss Emma Cudahy

Miss Genevieve Clendenin

at the Embassy Club last week that was intricately cut and fitted to her slim figure. The beautiful simplicity was a perfect setting for the former Elin Mackay's lovely charm.

Emma Cudahy is another who wears fitted things perfectly. At Pierre's the other day she wore a gorgeous black velvet ensemble with princess lines to the coat and a sweet off-white chiffon blouse. The coat was collared in lynx and she wore atop her costume a metal brocade turban that added a regal note.

It is noticeable that as costumes grow more intricate and dressy, gloves run in the other direction. The authentic glove, the one every nine out of every ten is wearing, is the pull-on of delicate hue, with neither button nor decoration save stitching. Mrs. Robert M. Byrne, the former Marion Gould, is one who wears fawn or other delicate shades with all her street things and thereby puts the finishing touch on her chic. Incidentally, she has a sweet new little suit of the "dress-maker" type, of pale grey kasha with rounding neckline and one of those open-worked very fine sweater blouses that tuck into the skirt.

WHERE RED DASHES

Navy blue and red outfits are having a vogue. There's a dash of red in every Park Avenue luncheon lately. Mrs. James B. Cleva has a hand-blocked blouse with a black unfinished worsted suit that used scarlet for its up and down lines. She emphasizes this by a scarlet boutonniere.

Satin blouses gleam royally under many of the new little suits now. Mrs. Sherburn M. Becker Jr. has a rose beige satin one with an unusual rounding collar with the neckline standing high like a Chinese coat. Katherine T. Lapsley has a sweet bluish lavender satin blouse with a grey suit that is a charming note with the darker background.

THERE'S A LIMIT!

"Individual" Dress Requires Unerring Taste

Eccentricity Is Not Excused By Originality

By JEAN PATOU

Paris, April 13.—The number of printed mousselines de robe gowns that have been seen and will still be seen this coming Summer is fully justified by the very qualities of this fabric. Its lightness and artistic color effects are two factors that are bound to please women, especially in a Summer fabric. Its popularity, however, runs the risk of the commonplace. On the Riviera, where advance Summer creations are already to be seen, printed mousselines are certainly to the fore and were it not for the marvelous effect of sunlight on these variegated colorings, one might be apt to regard them as rather ordinary.

On the other hand, it is curious to note how these women who endeavor to dress differently from the others eschew the ubiquitous mousseline for plainer and somewhat more severe fabrics. They always are immediately singled out in any public function and the sobriety of their dress combined with perfect taste immediately bestows a cachet of distinction on their outfit.

DRESSY FOR PERSONALITY

While I quite approve of those women who do not tire of gayly

For the woman who would be distinctive Patou creates original costumes. (Left to right) A reddish brown plaid taffeta frock with organdie bow and fluted insets of organdie in sleeves. A black moire ensemble has its coat tucked horizontally and its lower edge pleated on the sides and its suspender frock completed by a minutely hand-tucked blouse of white crepe de Chine. The white hat is lined with white velvet to give the face a soft line.

Gay Mousselines to Be Much Seen This Summer

printed mousselines. I also admire those who make an attempt at individuality. The smart woman who selects the printed material knows that the really chic dress will always stand out in a crowd. My unreserved approval, however, goes to the woman who dresses in an original way, distinctly personal, on condition that this originality does not border on eccentricity. This merely represents two ways of interpreting prevailing fashions, but people whose business it is to interpret the mode have not failed to register that society leaders have made it a point to sponsor inconspicuous styles at all gala functions.

INDIVIDUAL—AND POPULAR

Black, relieved with white, is usually chosen by the individualists. From a technical point of view, a remarkable feature is that most of these women favor rather stiff fabrics for this style of dress—lightweight taffetas or moires suitable for Summer wear.

Organdie has made a decided bid for favor this season in the guise of trimming. Its effect is always pleasing and gay when used on taffetas, especially if the latter is one of the new tartan prints. The first dress made of these tartan silks, seen in public would seem to have proved very successful and I predict with a considerable amount of certainty that they will be seen in all smart places in the course of the Summer season.

PSYCHIC ADVENTURES OF GREAT MEN AND WOMEN

How Saint-Saens' Requiem Was Born Through a Friend's Death in Battle

By J. F. GLASS

Camille Flammarion, the French astronomer and writer on psychic subjects, has cited Camille Saint-Saens, the great French composer, as an example of the "independence of the soul relatively to the body."

"He died on December 16, 1921, aged eighty-six years," says Flammarion. "On the previous 16th of October he had lunched at my table at the Juvis Observatory. His spirit was as young as it had been at twenty, yet he complained of the failure of his organism. He suffered from his legs. At the same time, Le Menestrel published an article full of the spirit of youth from his pen, on Berlioz. While his body perished his soul remained in full force."

In view of the celebrated scientist's statement, it is interesting to note that Saint-Saens himself rather vigorously combated the idea of there being a soul or a God. Perhaps, having perpetuated his own being in his immortal symphonies, he felt it necessary that it should survive in other form and was not interested in the subject of the Hereafter. Nevertheless, he was not aware of psychic phenomena, although his impressions do not clothe such phenomena in a supernatural atmosphere.

Perhaps the most striking of Saint-Saens' psychic experiences concerned the writing of his Requiem. The Requiem was begun in 1871, more than half a century before the

human being, and that we have everything to learn."

Saint-Saens' narrative does indeed seem to be concerned with telepathy. But the two principal facts he presents give cause for all sorts of speculation.

In the midst of physical and mental contentment he was seized suddenly by profound anxiety and a premonition of misfortune.

Simultaneously he "heard" musical lines of a funeral nature which ran through his head.

One event—the death of his friend, Regnault—appears to have been responsible for both these happenings. How did this come to be?

Incomes For Wives

By OLIVE ROBERTS BARTON

A writer pens this remark: "The great danger of women working outside of the home and keeping up their home duties as well, is that the male will get to expect it, and eventually all males will continue to expect it. They will take it as a matter of course and women won't dare stop."

Very well. How about this? I heard two women talking the other day. One was protesting a suggestion the other had made about a foursome holiday. "I don't think we can go," said Number One. "Jim thinks it's foolish to spend money on hotels the way they charge, and we'd be gone three days!"

"For goodness sake! Don't be a curstard pie," said Number Two. "Why don't you let Jim spend a little money on you? Get him into the habit. I take everything Dick can beg or scrape for me and look for more. The more you expect the more you'll get."

I know a woman who has a fine position as personnel manager in a store. Ten years ago she was cleaning her windows and washing her dishes in canebark dresses. Her Winter coat cost \$50 and lasted two years. Their Summer vacation consisted of three weeks on a farm in fruit season, and putting up enough stuff to last through the Winter.

Now she wears dresses of material with no equivalent in English. Her Summer and Winter furs set her back about \$1,000 a year. She has hats, shoes and lingerie in keeping, and perfume at \$20 an ounce. She has a car, and a vacation home, and everything from Hawaii to Europe. Her husband still buys two suits a year, walks to work, eats three meals a day and sleeps in the bed he always slept in. And he gets little more out of all his wife's increased income than peace.

But he surely does thank heaven for that!

TAFFETA VOGUE

Taffeta is conspicuous as a medium for party frocks and as a medium for less formal attire. Seams and edges are finished in taffeta instead of flat crepe on many of the new frocks.

YOUR CHILDREN

by Olive Roberts Barton
©1928 by NEA Service, Inc.

No government is any stronger than the laws it can enforce. No home government is any stronger than the laws its parents can enforce. Does this mean that a cat-and-dog tail should hang behind the door to be brought out and down on tender little hides when the least jot or tittle of the family commandments is transgressed? It does not. It means that the

Three of the boys usually answered roll call, but the fourth, an under-sized pale little fellow who was chronically tired, reduced the grocery bill considerably. He almost always missed one meal and sometimes two or three. Starvation did not—could not cure him of his unpunctuality.

In another home where the discipline was an adamant as the laws of the Greeks and Persians, it was announced that any child not in the house by four fifteen got a switching. The result at first was satisfaction enough from a military point of view. Law and order obtained and the smart fry were in the pen right on the mark every day at four fifteen.

But, eventually they discovered that on days they could not possibly be home on time they were punished whether it was their fault or not, and they lost respect for that law. They took to coming in when they got ready, and their switchings as something unpleasant and inevitable but not prohibitive.

RESPECT BRINGS OBEDIENCE

Punishment does not always enforce law. When will some parents learn that? All obedience must be founded upon respect. Punishment, especially corporal punishment, puts no premium on respect, you may be sure.

The laws of every home should be reasonable in character and few in number. And every parent should remember that there are times that obedience to even the most reasonable laws is not possible.

You cannot make blanket rules and expect every child in the family to obey them every day to the letter. To expect it would be the most foolish thing in the world.

The length of the longest snake in the New York Zoo is 26½ feet long.

A well-known city accountant visited his bookmaker to draw his winnings. "Good morning," he said, "that's a lovely carnation you are wearing in your button-hole. I think it's out of my garden."

"It's certainly not," the bookmaker replied. "Well, I'm positive it is," retorted the other. "What about a bet on it?" queried the bookie.

"I wouldn't take your money on a certainty," added the accountant. "Oh, if there's a catch it's worth a come to me," the bookie exclaimed. "I've got to put your money up."

From the extreme south point of Texas, due north to the boundary of the United States, the air line is about 1,600 miles.

From July 14 to 17, 1911, 88.15 inches of rain fell at Baguio in the Philippine Islands. More than 15 inches fell on one day.

Some parrots have been known to live sixty years.

SONG IN THE TUB

By Gladys Hasty Carroll
Illustrated By Samuel Cahan

"O H. YBS, I think Wil-lard quite a lamb," Valeria Andrews was answering a question. "As a brother-in-law he's not to be surpassed. But as a husband! Poor Fern has her troubles. He will sing in his tub."

"Really?" Gail Ruyland ground out her cigarette, tossing the butt over the window ledge into the garden. Miss Dorothea pushed a lacquered box toward her and she dipped in two fingers. "That mightn't be so bad in times of peace. Bit of a tonic, maybe, after a heavy night out. Or hasn't he a good voice?"

"About like Horace's, as I remember it," said Miss Dorothea, lifting her eyebrows at Valeria.

Valeria nodded humorously. "And Fern detests it, or any sort of noise. So it won't always be times of peace, Gail. And I think she's right. I heard him, too. Enervating, rather."

"I'd never thought about it much, not having brothers," pondered Vic Mason. "I wonder—"

"And I wonder," interrupted Miss Dorothea in sudden impatience, "where's tea?"

Colleen, who had stopped for a minute beyond the portieres to tuck in a straying black curl and straighten her cap, caught up the tray from the hall-stand and went briskly out to the sun-room.

"Tea, Miss Dorothea."

She smiled around at them brightly as if they had been five or six children listlessly getting through a rainy day. And as she gave an instant to thinking of them as she scurried back down the hall they seemed that to her, despite her less than nineteen years and her eyes that laughed blue and her round little Irish body. To think of sitting for hours smoking and drinking tea and deciding whether you'd like to hear a man sing songs while he was taking a bath! What earthly difference could it make, one way or the other?

In the kitchen muffin pans soaked by the sink, and the copper teakettle waited its daily polish, and Mr. Horace sat on the cooking table, looking out gloomily over the knee that he was holding hunched close to his chin.

"Goodness me!" said Colleen. "And you still here!"

"Still here," replied Mr. Horace. "You haven't told me yet."

"Told you what?" asked Colleen.

"Whether you'll marry me."

"Oh, the saints!" said Colleen.

She tied a blue print apron over her ruffled white one and went into the pantry for soap powder to sprinkle into the muffin tins. When she came back with the box in her hand she stood for a minute in the doorway looking at Mr. Horace with a wrinkle between her eyes. There are no words to describe Colleen in a blue print apron tied over a ruffled white one, with a wrinkle between her eyes.

"I don't know, but what I'd better," she said.

"You had," Mr. Horace told her.

SHE considered it, shaking the box vigorously and scrubbing a cup of one of the pans with a noisy wire dishcloth.

"What," she asked once above the din, "would you do if I didn't?"

"Nothing," he shouted back.

Colleen thought that likely. It was what she had done ever since she first saw him. She scrubbed a few minutes longer, and then spoke softly through the echoes:

"What would you do if I did, Mr. Horace?"

"Anything."

She put down her pans and

her wire dishcloth and came halfway across the room. Little silvery bubbles were dropping off her fingers.

"Would you get dishcloths?"

Mr. Horace bent over and watched his heel tapping against the leaf of the table.

"Oh, I suppose so. But what do we care? Let the family rant. I fancy we'd manage some."

Colleen stamped her foot and there was a rain of silvery bubbles.

"I say, would you get dishcloths?"

Mr. Horace shrugged. "Sure."

She went a few steps nearer and cocked her curly head on one side. Colleen had just one dimple. It was in her left cheek. She cocked her left cheek up.

"Would you—work?"

Mr. Horace nodded. "Sure—that is, if anybody'd hire me."

Colleen drew in a quick little breath.

"Then," she said, "I'll think you over, Mr. Horace."

It sounds little enough, but consider that Mr. Horace had asked her eight times before and got less. He went out the door and through the hall and up the stairs the way he had moved in the days before he had become a cynic for want of something else to be. Even his mother noticed it, who rarely noticed anything.

"Found amusement at last, I hope," she remarked to her confidential maid, from the midst of witch hazel pads.

In the kitchen Colleen whirled a faucet to let hot water come hissing out of a pipe, and made a great tumult with her wire dishcloth.

Colleen had much and many to think about. She had to think of Jack Starr, who was forty and fat and darling and had looked at her with dog eyes since she was seven. And when she had thought of Jack Starr she had to think of Jim Delaney, who was twenty and big and full of the blarney and stood singing and jolly under her window nights when there were worse things they might be doing. Now there was Mr. Horace, who was twenty-nine years old, that splendid age, with brown eyes and yellow hair, like a golden Welsh boy.

Three blocks of fine houses, two blocks of little stores, one

"As a brother-in-law he's not to be surpassed—but as a husband!—poor Fern has her troubles—he will sing in his tub."

but who was going to the devil because he had two big hands and nothing to do with them. Jack Starr and Jim Delaney and Eddie and Mike and Don and Peter Bill—and Mr. Horace. To think some girls sat and thought for hours about whether they'd like to hear a man sing while he was taking a bath! Jack Starr and Jim Delaney—

BUT while she finished polishing the copper teakettle the wrinkle began to clear away from between her eyes, and a bit of a grin trembled about the corners of her mouth.

Five minutes later she had closed the door on her afternoon of tea service at the Morrisons and was running down the street. Baredhead she was, in the April wind, but with a bright blue coat swirled about herself and her round chin ended deep into the scrap of fur on the collar.

Three blocks of fine houses, two blocks of little stores, one

block of lesser houses, and then the garage.

The garage was busy at this hour of the day. Young fellows, black with oil and dirt, clad in blue overalls and tight little black visored caps, were running up and down with tin cans and hose and pieces of chamois. Rush of cold engines, splash of water, clank of radiator hoods, shout of raucous voices—a deafening bedlam of repair.

The flight of stairs at the side of the building was ill-lit, but Colleen found it easily and went running up, flying into the crowded, stuffy little office at the top. Into Jack Starr's office, a curve of blue and a tangle of blood red and a dimple and a rakish black curl.

He sat in his swivel chair, forty and fat and darling, looking at her with dog eyes. She perched on his desk, as tender and as cheerful and as Irish as a four-leaf clover, and held one of his hands between both hers. She told him he was getting thin, and though he had tipped

the scales at 197 that noon, he believed her. She told him he was getting tired and needed an assistant up here, and he said he would get one. Colleen suggested Jim Delaney.

"Yeah," he said bitterly. "You're lookin' to marryin' that feller." He drew his hand away. Colleen found it again and looked straight into his eyes, her own as blue as the hair, ribbon of the little girl who used to sit in front of you at school.

She told him that she was thinking about him, that, of course, she would like to see Jim Delaney get ahead, but that she, Colleen, was thinking about him, Jack Starr. She told him that even if she didn't love him the marrying way, she loved him just the same, and that if she ever did marry anybody it would be partly because she wanted Jack Starr dropping in to supper now and then, the way he had before her father died. He believed her. He put his hand on her head.

"So you'll take Jim Delaney up here to-morrow mornin', Jackie? Promise! Lay down and cut me in two?"

"Lay me down and cut me in two," said Jack Starr.

Colleen blew him a kiss from the stairs. The April wind caught at her curls and she dipped her chin so deep into her collar that her dimple popped out.

She said to herself, "So that's that. He's old and he's fat—but he's good and he's mine."

Then into the glaring, noisy cavern underneath, Jim Delaney dropped his oil can and came running, blue overalls and black visored, to help her into his little old high-bodied car.

When they had turned south on Laurel Street, that grew more dim with every block, she would not even let him put his arm around her. She drew tall and slim and blue into her corner, and told him he was black and oily. He set his heel on the accelerator and said it wasn't the first time, and, besides, she didn't like it any better than she did. She asked him why he didn't get another job.

"As if," raged Jim Delaney, "a feller had half a show!"

COLLEEN bent forward, her elbow on her knee, her chin in her hand, and seemed to meditate. When at last she looked around at him, he was very sweet and serious, and she put two fingers on his arm. She told him that she would provide him another job if he would do her a favor. He said he would, sheepishly rubbing her shoulder with his, and she told him that she wanted him to get a fellow she

"Yeah," said Jim Delaney furiously. "I bet it's one of that gang that hangs around your house all the time."

"Stop the car, Jim," Colleen said, sitting straight like a lady, with her hand on the door. "I got to drop in at the corner drug. I'm obliged for the lift. Now, Jim, I just want you to know that it don't make any difference who that job is for. You promised to do me that favor—and I've done you mine already. Jack Starr is goin' to take you upstairs as his assistant to-morrow mornin'! Now you start climbin' for, Lord knows, you got far enough to go. I hope you do yourself proud. I'm sure—and marry—Henry Ford's daughter-in-law!"

From the sidewalk she blew him a kiss. A very cool, daring little kiss.

"And that's that!" she said again to herself. "It's a red head and green eyes you got, Jimmie, darlin'—and they're two colors I don't like to see together 'cept at Christmas."

The old druggist was almost asleep on a packing box when she came in, and watched her through half-shut lids as she went into the shadows of the telephone booth.

"Hullo. Didn't know as you'd be in. . . . Look, this is Colleen, and I decided I'd better. . . . No, here now! Listen! It's got to be right away. I'll fix everything and meet you at Park and Lisbon. Nine o'clock. . . . Wait a minute—remember all you promised? All right, then—what? I don't! Well—listen! See-e you later—darlin'!"

And then she disappeared out the back door into the alley. She had not been in the drug store more than two minutes, but the old druggist stood up from his packing box, looking quite wide-awake, and young, and alive.

"Golly!" he said to nobody at all. "Ain't that girl springy!"

A BLOCK away Colleen was

running up two steep flights of stairs, twisting a key in a noisy lock, and turning on a gas light above a shabby bureau. Down on her knees there in the dimness she rumpled the contents of three drawers and finally stood up with her arms full of white. A last Summer's tub silk dress with big pearl buttons and a narrow kid belt. A scrap or two of crepe de Chine and ribbon, much laundered and frayed from wear. A little gros-grain ribbon hat with a limp silk pompon on the left side. Four sheer silk stockings, one with a hole in the heel, and two with holes in the toes. Canvas Oxford, almost new.

Out of her blue coat and ratine dress and brogues, Colleen stood for a minute before the narrow mirror.

"Lord, but I'm nice," said Colleen.

Then for a quick needle for the holes in the toes, and into the scraps of crepe de Chine and the last Summer's tub silk dress and the grosgrain hat—and over it all the bright blue cloak. She glanced once again at the mirror with a queer little lift of her shoulders, and then was turning out the light and twisting the key and running down the two flights of stairs. Eddie and Mike and Don, strolling up and down below, stopped her for a minute.

"Where to, Colleen? Take us!" And "Aw, Colleen, we're just waitin' for Pete and his ol' banjo. Got an April tune for you."

Colleen stood still and looked at them. So big and dear they were, these boys that she had rolled marbles with in the alley. So young, too, playing tunes under her window with Peter Bill's "ol' banjo."

"Say to Peter Bill I'm sorry," she said, and then she ran.

"But I got to go out. I'll be home to-morrow night, though, and you got to come in, every blessed one of you. I'll make you pancakes. . . . No, you can't come with me. I got an important engagement."

And she tossed a kiss to them.

Having burned her last bridge, she went on with her chin up and a dimple under her pompon. Colleen in a last Summer's tub silk dress walked to the corner of Park and Lisbon Streets, almost in the shadow of a great gray stone building that raised dim, twin spires and a gleaming cross against the still Spring sky.

When she came back at 8 o'clock the next morning, she looked about the same. The old druggist recognized her as she swung off the trolley at his corner, and he rubbed his chin. "That's the girl that was in here telephonin' last night," he said. "Golly!" All the children playing in the alley recognize her, and shouted and waived their hands. But after all, she was not the same. She did not even look quite the same. When she was behind her own closed door, darting little, desperate glances about her sitting-room and through into her kitchen, she did not look at all the same. There was a faint white crease where the dimple had been. Suddenly she dropped down on the old couch and covered her face with her hands.

SHE was Colleen Morrison.

She was married to Mr. Horace. She was Mr. Horace's wife. She was all that Mr. Horace had. She had taken everything away from him to give him herself, just because she thought she could run any man's life as well as she had run Jack Starr's and Jim Delaney's and Eddie's and Mike's and Don's and Peter Bill's. She had thought she was so strong and wise. But now she knew she wasn't at all. She was just Colleen, a little Irish girl, suddenly terribly in love with a golden Welsh boy, wanting his comfort and happiness more than anything else in the world. And what had she done for him? Taken him away from his home and his friends and his fortune. Tossed over her own little source of income that had been from his mother. Sent him to wash cars and pump gas and run up and down with oil cans. Colleen, Colleen. Oh, to be sure, he had been happy last night, a hundred times happier than she had ever seen him before. But that had been at the big, glittering hotel where the last of his allowance had taken them. That had been across the table from her in the music-filled dining room, while they danced under the colored lights, and upstairs in their velvet-hung suite, more luxurious than anything in his mother's house. What would it mean to him to come in here to-night? To have worked for nine hours in the grime of a garage, and to come here and see it as the place where he had to live? Mr. Horace, married to her—and the garage and these three rooms. Colleen, Colleen.

"Oh, well," she said suddenly sitting straight. "I got a day of it ahead of me."

She had. Such a day. With her curls pinned high on the top of her head and an all-over apron buttoned around her, she swept and brushed and scrubbed and polished and dusted. With a tam over the curls and the blue coat over the apron, she ran out to a little department store for cretonnes and cotton-linens and saucers, down to the basement grocery for pot roast meat and carrots and a brown loaf of bread and a jar of jam.

"Oh, well," she said suddenly sitting straight. "I got a day of it ahead of me."

At 6 o'clock Mr. Horace stood in the doorway, glancing about, sniffing a little very long and lean in his blue overalls, and very very dirty, but golden through it all, with his black-visored cap in his hand. Colleen must have felt him there, for though he made no sound, she came out of the kitchen as if she had been called. Colleen with her curls down and a black-visored cap on her head, child's.

"Welcome home, darlin'."

"What kind of a day! Guess you never found their wash-room!"

"Colleen! You little!"—He took two steps toward her and then stopped sharply, thrusting

his hands into his hip pockets. "Whew! That's right, guess I'm in no state to touch a girl, am I? Particularly this kind of girl. Say, what a great old duffer I look! We got a place where I can scrub up?"

Yes, there was, a bathroom. Oh, he was so good. She led him over to it and brought him soap and towels and a big pitcher of hot water. He was standing by the bowl, his head almost touching the ceiling.

"Say, a tub and everything. Pretty special, aren't we? Thanks, sweetheart."

Oh, he was good. He was going to pretend he was happy. He would be gay while he was with her and do his thinking when he was alone. He was alone now. She spoke against the door.

"Darlin', you didn't say—how the day went."

"Great," he called back. "Going to get inside of an engine to-morrow." And then, after a minute, "Say, don't we get good force on the water here for being up so high?"

He was good. She must not make him keep this up any longer. She would go away and leave him to himself.

Out in the kitchen she leaned against the window. What had she done? What was he thinking while he was alone?

And then it came dancing through the keyhole of the bathroom door above the rush of water into the tub. Half a whistle, half a song, with very little music, but so full of satisfaction and content and carelessness that not even Colleen could hear in it anything else.

"Lucky in love! Lucky in love! What else matters if you're lucky in love? Good breaks!"

The dimple popped out on Colleen's left cheek. And—ever so slow and deep and pink—a dimple grew into her right cheek where there had never been one before. Her two hands came together, and her voice was soft with happiness.

"Thanks be!" she said. "Thanks be! That man's never grievein'. He sings in his tub."

THE END

Specialized Gardens
Are Delight Of Connoisseurs

By ROMANE B. WARE

In gardening it is generally noticed that women as a group grow a large variety of flowers whereas men specialize upon one or two kinds. It is these specialized gardens I will consider today. The principal flowers that are grown in these gardens are gladioli, peonies, iris, dahlias and roses. They are all interesting and each has its ardent supporters.

Generally, if you are going to grow any great variety of these flowers you will wish to plant them some place by themselves. Neither roses, dahlias nor gladioli lend themselves to planting in the mixed border. They are all glorious by themselves but they require specialized care before they will give their best and you can not give it to them in the general border. Peonies and iris work in well with other things but the connoisseur will enjoy them the most in gardens where they are by themselves. There their qualities and habits may be studied and they may be given the special care and the cultivation it would be impractical to give in the border.

The specialized garden can well be set off apart from the rest of the yard screened by shrubs so that it becomes a hidden joy into which you may invite your friends at blooming time to enjoy the glory of the blossoms.

In the specialized garden you may plant the flowers in rows which makes it easy to cultivate them and fertilize them as they need it. A garden in rows is not particularly artistic and this is another reason for screening it off from the rest of the garden. These specialized gardens are where the most of the flowers we see in the show come from. They are a hobby with their owners and it is this group of owners that make up the bulk of the shows. You will get a great deal of satisfaction from a hobby of this kind and there are few types of gardening that are more interesting.

If you have no hobby in plants now, try one of those mentioned above. There is a lot of satisfaction in developing new things from seed and in growing them and in the end there is a great field for improvement. Start in a small way and as your knowledge grows you will find it most fascinating.

BOW SCARE

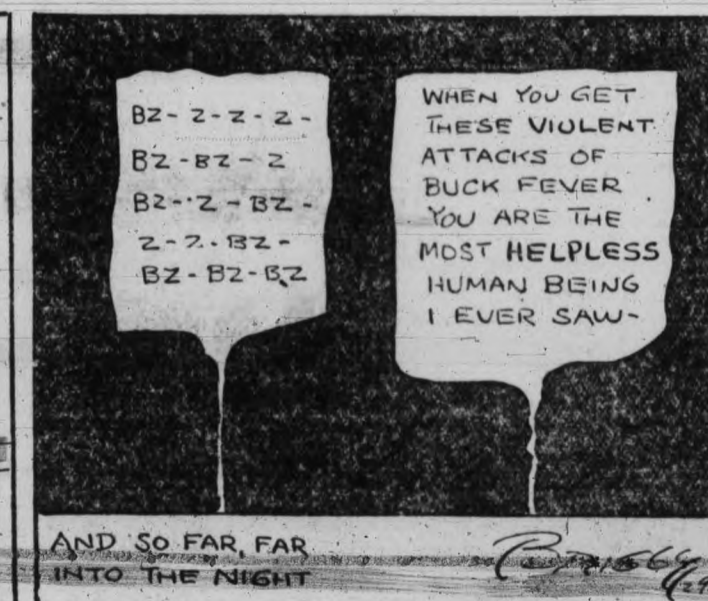

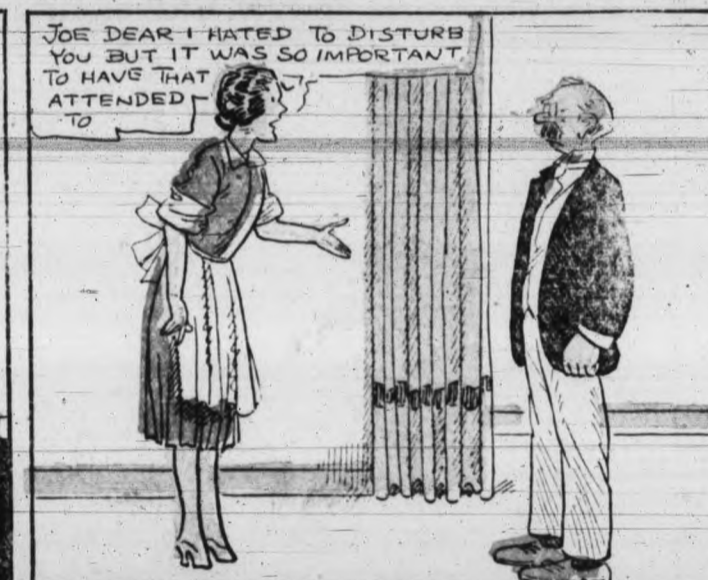

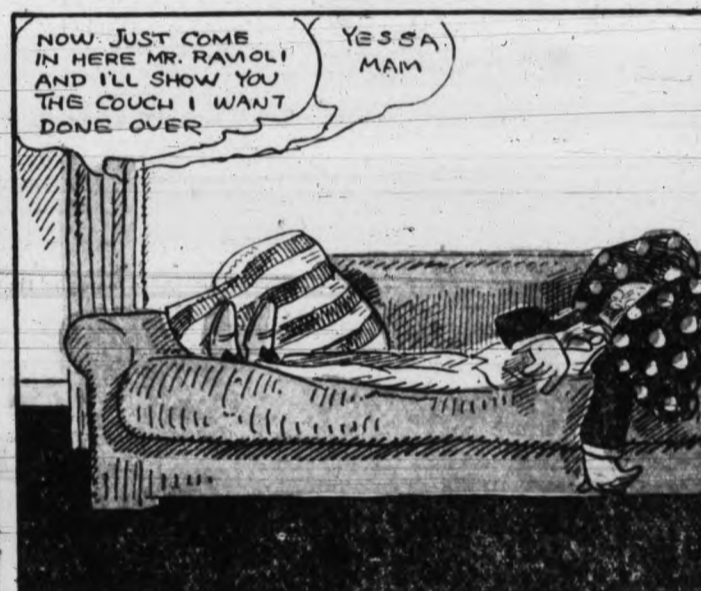

The new scare is the one of slender dimensions that ties in a bow with long ends, under the chin, in demure fashion. One completing a grey silk jersey sports frock has four tones of pink in it.

"Goodness me," said Colleen, "still here!"
"Still here," replied Mr. Horace, "I haven't told me yet."
"Told you what?" asked Colleen.
"Whether you'll marry me."
